

Politician Characteristics: Exploratory Fixed-Effect Results

Input: `politicians_characteristics_byprov.csv`
Full unchanged control composition

August 2026

Abstract

This report compares 32 fixed-effect specifications. For each specification, the top row presents the baseline politician event study for event years -5 through 4, with -1 omitted, before and after pretrend rotation. The lower panel presents the DiD interaction of `post` $\times$ `treat` $\times$ `downup_ac_pop`, constructed following `_app19_polischar_fe12_did_downup_inter_plot.do`. The prior event-time interaction with `downup_ac_pop` is not included. Rotated pre-period and post-period averages are computed from the rotated coefficients with the corresponding transformed covariance matrix.

1 Fixed-effect specification 1

Baseline event study: original

Baseline event study: pretrend rotated

DiD interaction: $\text{post} \times \text{treat} \times \text{downup_ac_pop}$

Corrected DiD interaction output is not yet available for FE 1.
Expected file: politician_byprov_fe01.did_interaction_rural_acpop_all_1.png

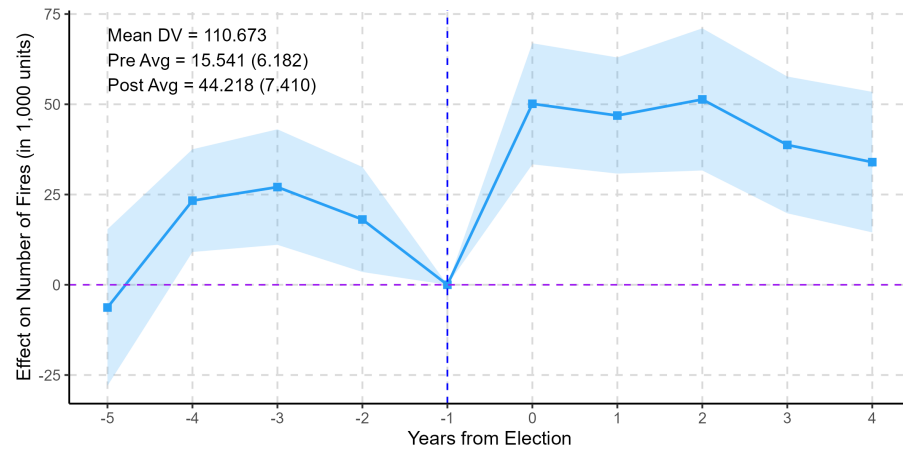

Baseline event-study estimates: specification 1

Event time	Original $\hat{\beta}$	Original 95% CI	Rotated $\hat{\beta}$	Rotated 95% CI
-5	5.3383	[-15.6858, 26.3624]	-21.5446	[-33.5408, -9.5484]
-4	29.6496	[13.9215, 45.3777]	9.4874	[-0.3984, 19.3733]
