

Politician cohort-event-time FE sweep

Current politicians_characteristics_byprov.csv

Treatment definition: downup_ac_pop

Politician event window: relative years -5 to 4; omitted period -1

Common addition to every specification: cohort-specific relative-year fixed effects

Politicians: relative_year_bin_aux#cohort_id

Interaction plots: every displayed lincom subtracts the control-pre estimate; control pre is normalized to zero

The treated-control post contrast is unchanged because the common control-pre baseline cancels

Interaction figures omit confidence intervals and report exact p-values rounded to three decimals

Availability note

All 32 politician event studies are included in original and rotated form.

All 32 politician DiD interaction plots are included.

No protest analysis is included in this report.

Fixed-effect variables used

The labels below correspond to the exact Stata variables used in the FE definitions.

Grid x cohort	<code>unique_small_grid_id_cohort</code>
month-year x cohort	<code>monthyearco</code>
province-cohort linear month-year trend	<code>province_cohort#c.monthyear</code>
government year	<code>yeargov</code>
province-cohort x election year	<code>province_cohort#election_year</code>
province-cohort x election year x government year	<code>province_cohort#election_year#yeargov</code>
Added to every politician FE:	<code>relative_year_bin_aux#cohort_id</code>

Fixed-effect specifications FE1-FE8

FE01	Grid x cohort
FE02	Grid x cohort; month-year x cohort
FE03	Grid x cohort; province-cohort linear month-year trend
FE04	Grid x cohort; government year
FE05	Grid x cohort; province-cohort x election year
FE06	Grid x cohort; province-cohort x election year x government year
FE07	Grid x cohort; month-year x cohort; province-cohort linear month-year trend
FE08	Grid x cohort; month-year x cohort; government year

Fixed-effect specifications FE9-FE16

FE09	Grid x cohort; month-year x cohort; province-cohort x election year
FE10	Grid x cohort; month-year x cohort; province-cohort x election year x government year
FE11	Grid x cohort; province-cohort linear month-year trend; government year
FE12	Grid x cohort; province-cohort linear month-year trend; province-cohort x election year
FE13	Grid x cohort; province-cohort linear month-year trend; province-cohort x election year x government year
FE14	Grid x cohort; government year; province-cohort x election year
FE15	Grid x cohort; government year; province-cohort x election year x government year
FE16	Grid x cohort; province-cohort x election year; province-cohort x election year x government year

Fixed-effect specifications FE17-FE24

FE17	Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year
FE18	Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year
FE19	Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year x government year
FE20	Grid x cohort; month-year x cohort; government year; province-cohort x election year
FE21	Grid x cohort; month-year x cohort; government year; province-cohort x election year x government year
FE22	Grid x cohort; month-year x cohort; province-cohort x election year; province-cohort x election year x government year
FE23	Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year
FE24	Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year x government year

Fixed-effect specifications FE25-FE32

FE25 Grid x cohort; province-cohort linear month-year trend; province-cohort x election year; province-cohort x election year x government year

FE26 Grid x cohort; government year; province-cohort x election year; province-cohort x election year x government year

FE27 Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year

FE28 Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year x government year

FE29 Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year; province-cohort x election year x government year

FE30 Grid x cohort; month-year x cohort; government year; province-cohort x election year; province-cohort x election year x government year

FE31 Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year; province-cohort x election year x government year

FE32 Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year; province-cohort x election year x government year

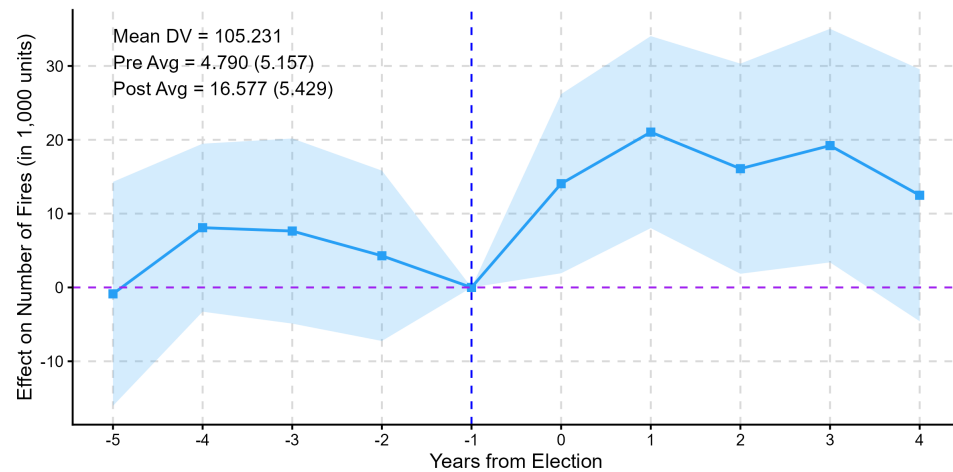

FE01: politician event study and DiD interaction

Base absorbed variables: Grid x cohort

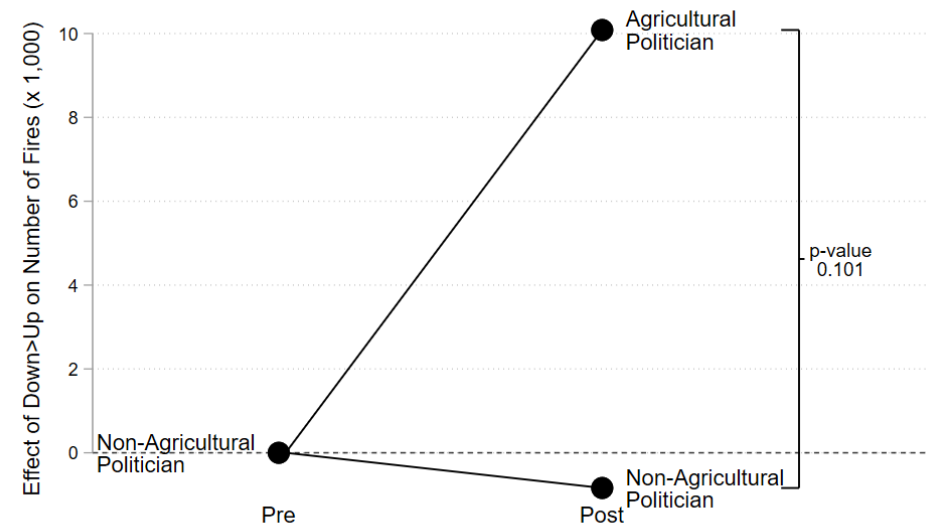

Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.

Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

Politician event study

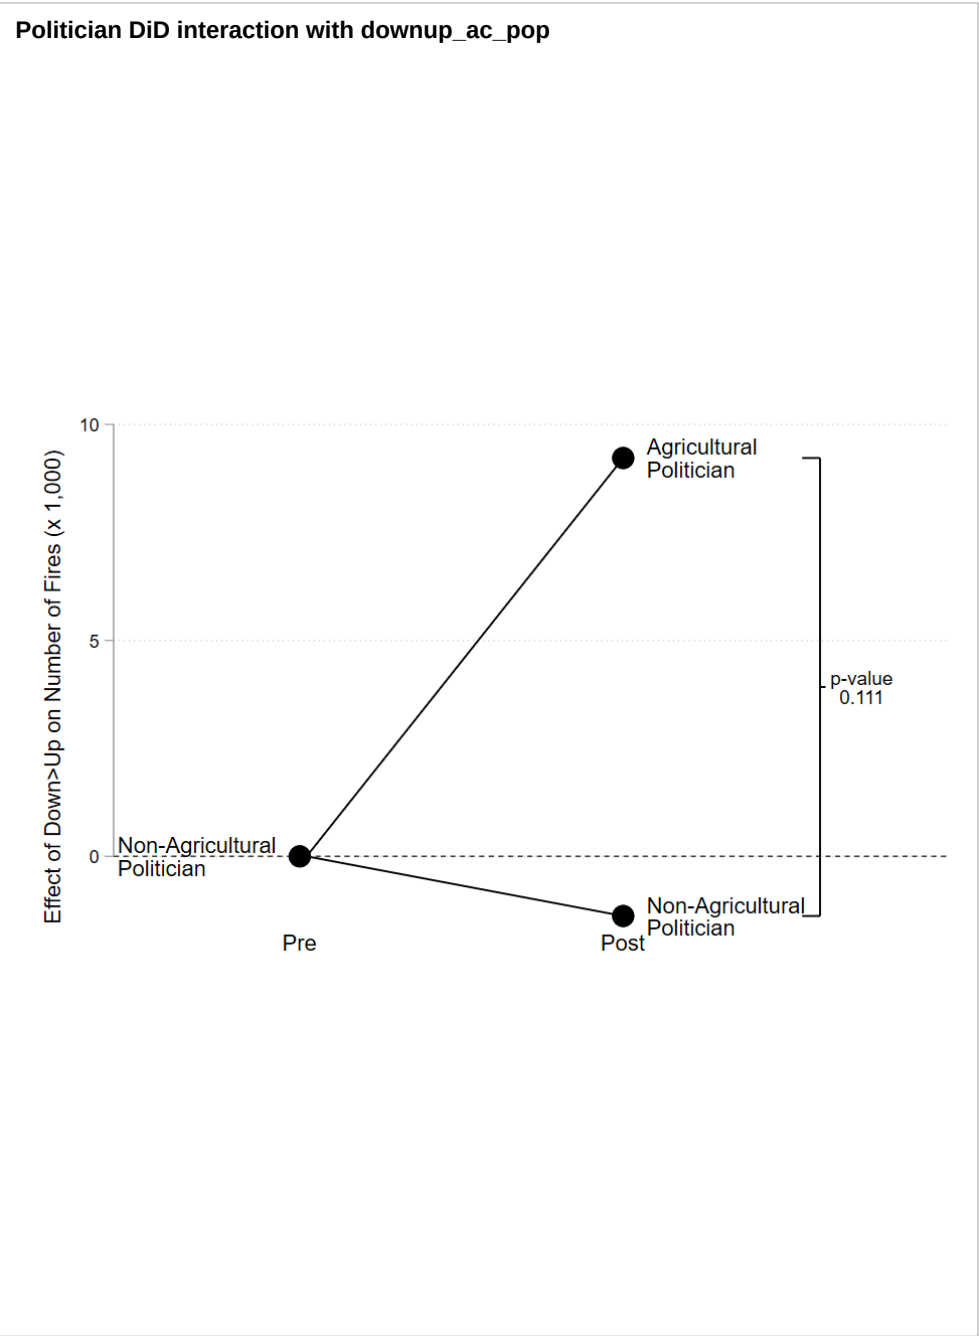

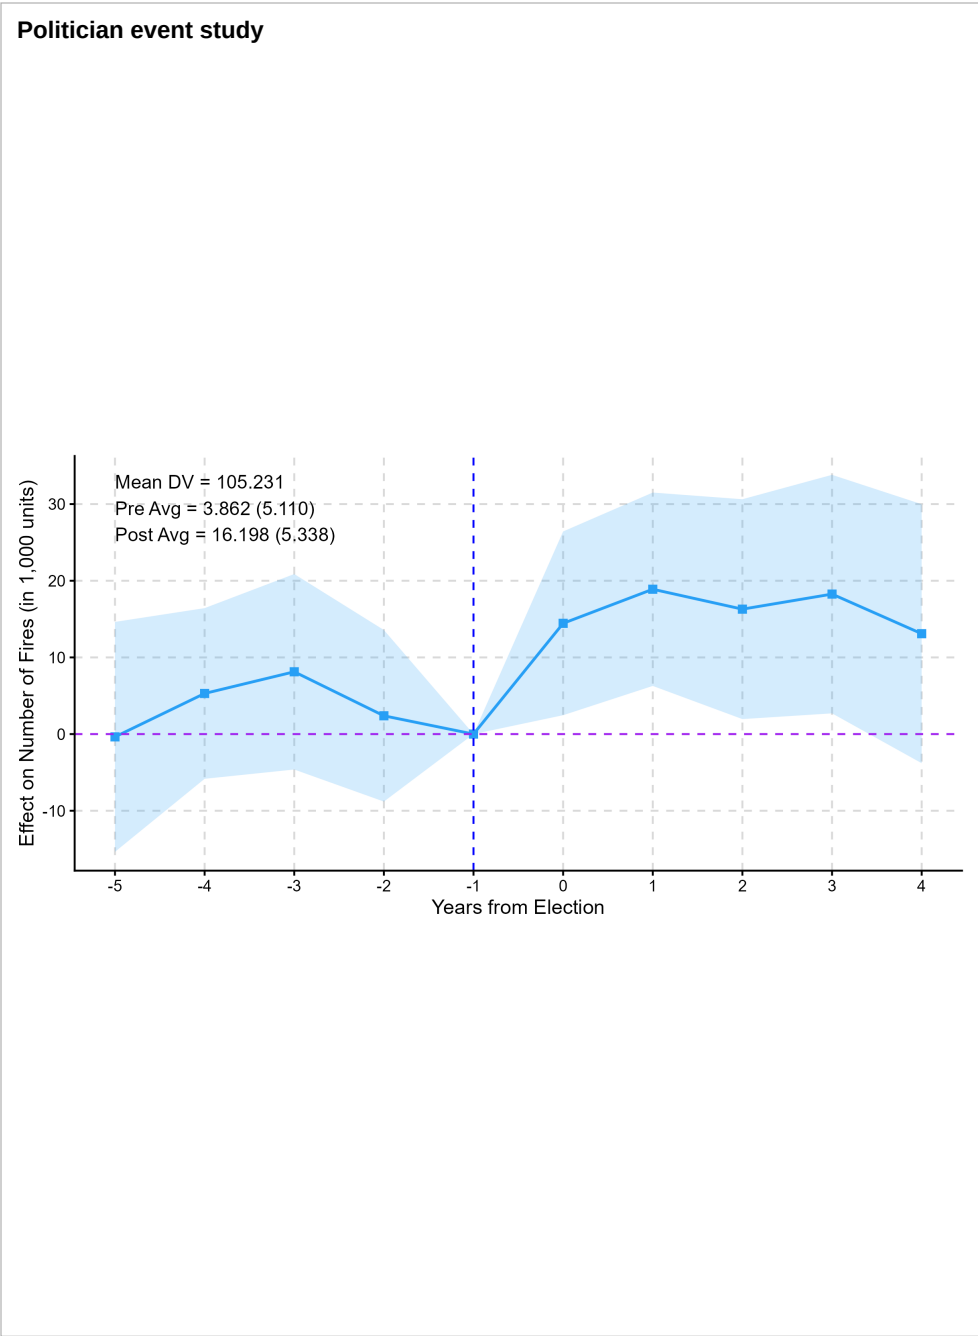

Politician DiD interaction with downup_ac_pop

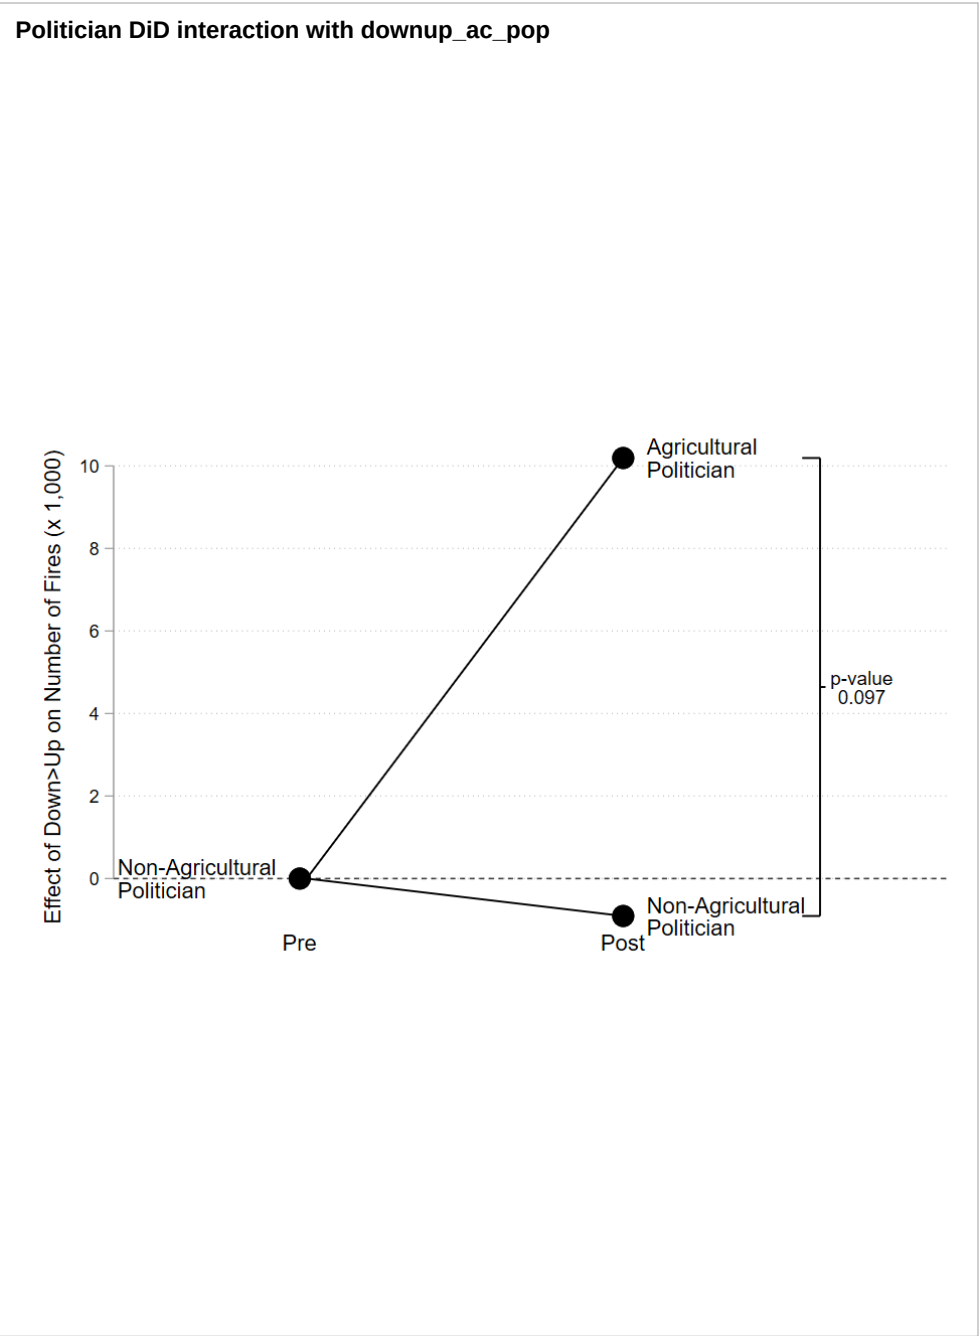

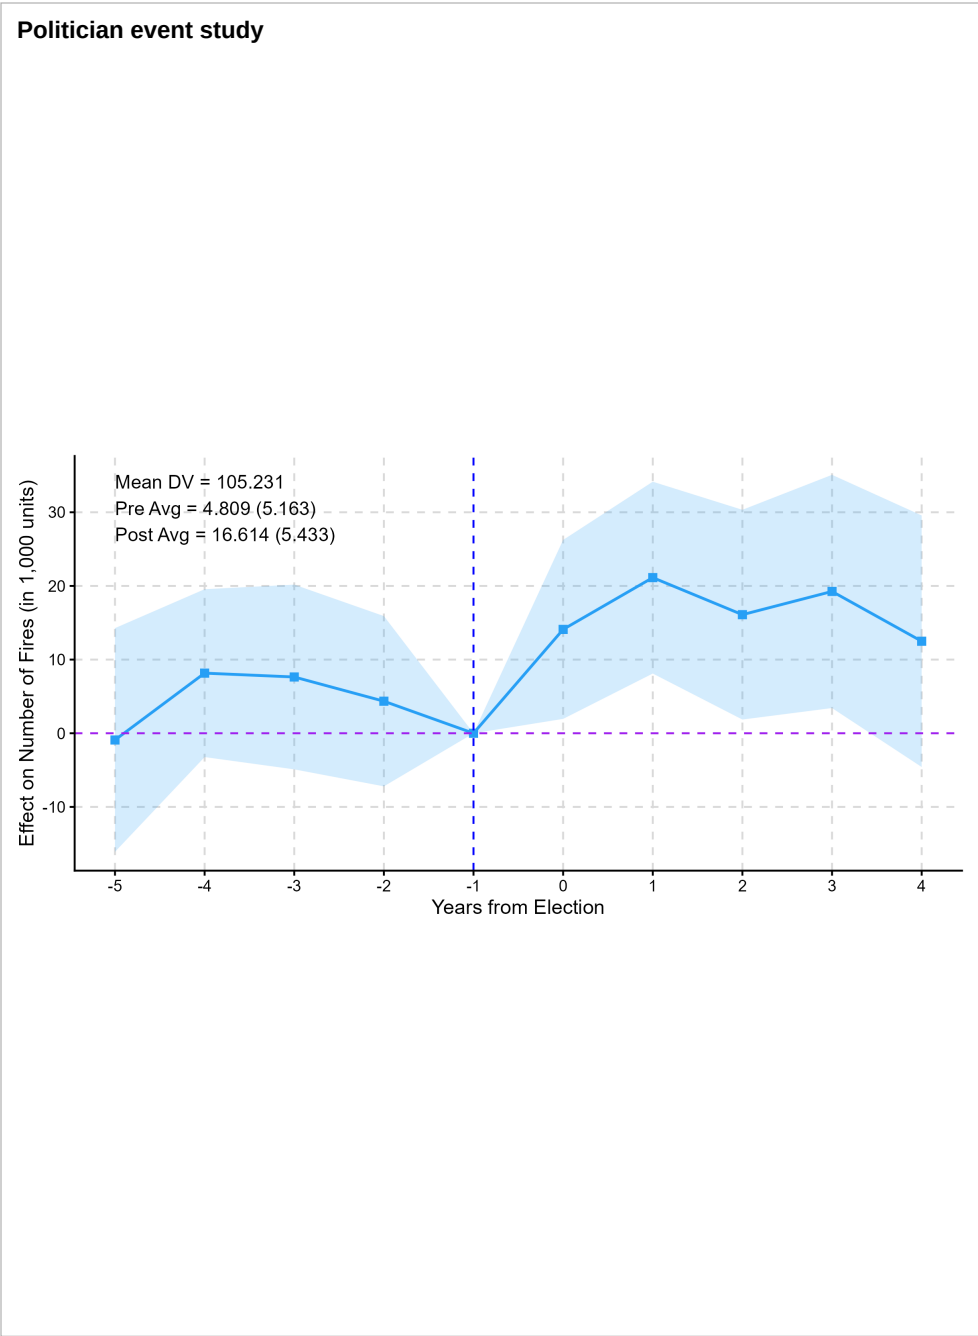

FE02: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

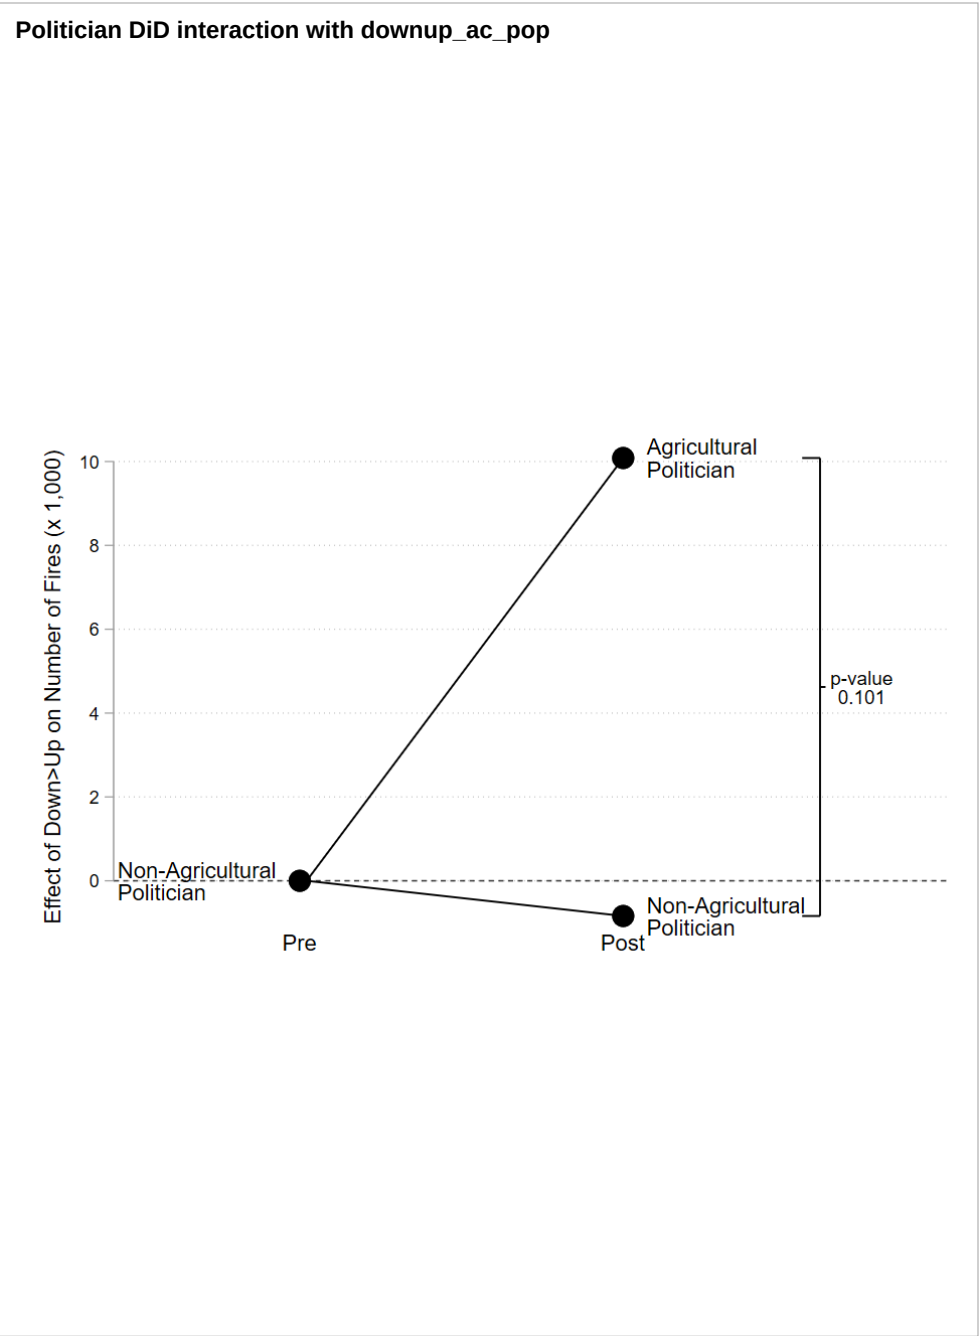

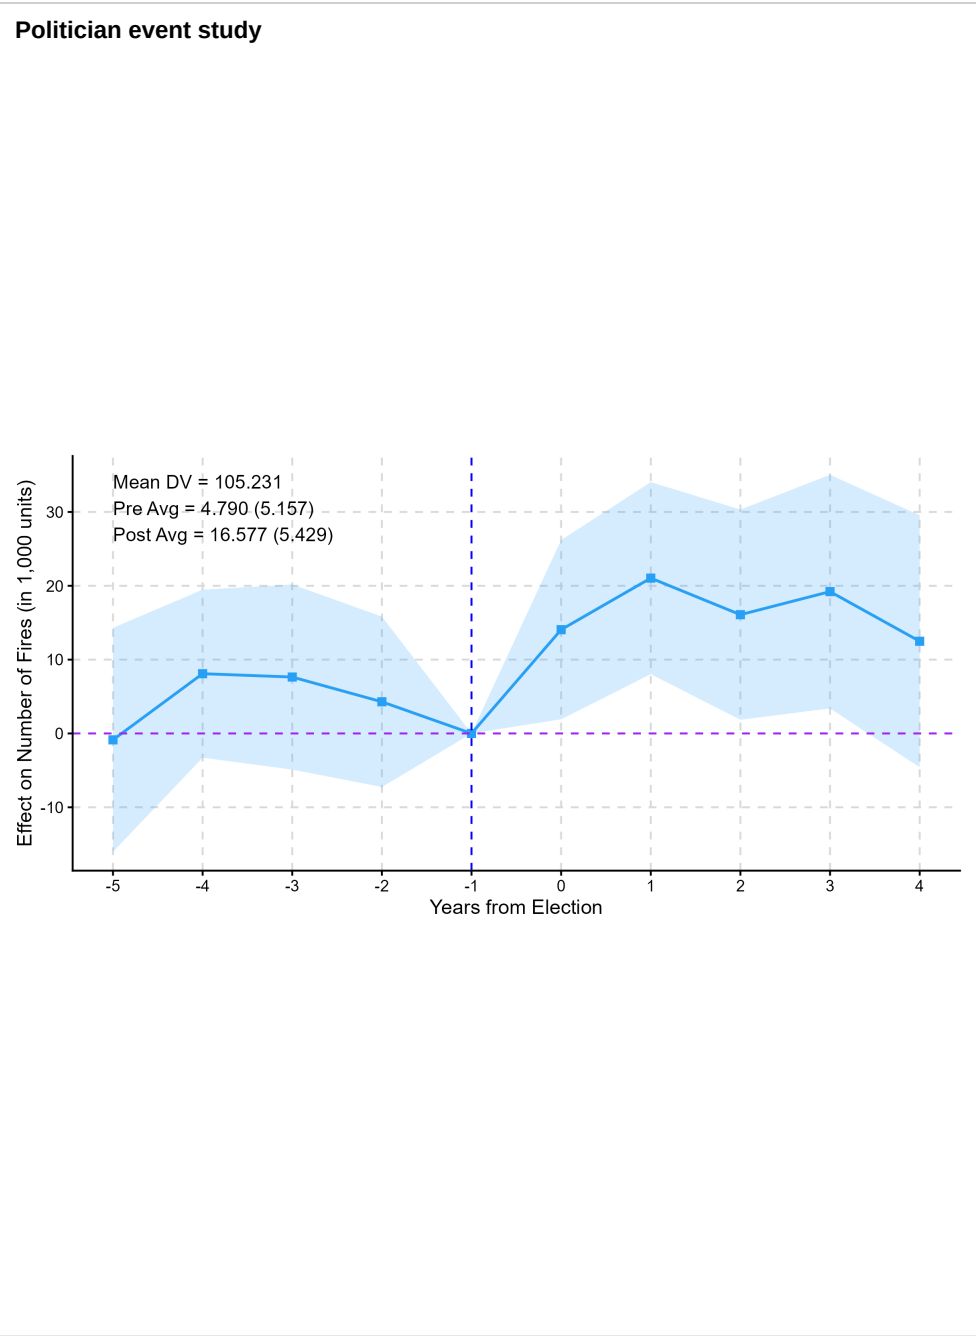

FE03: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

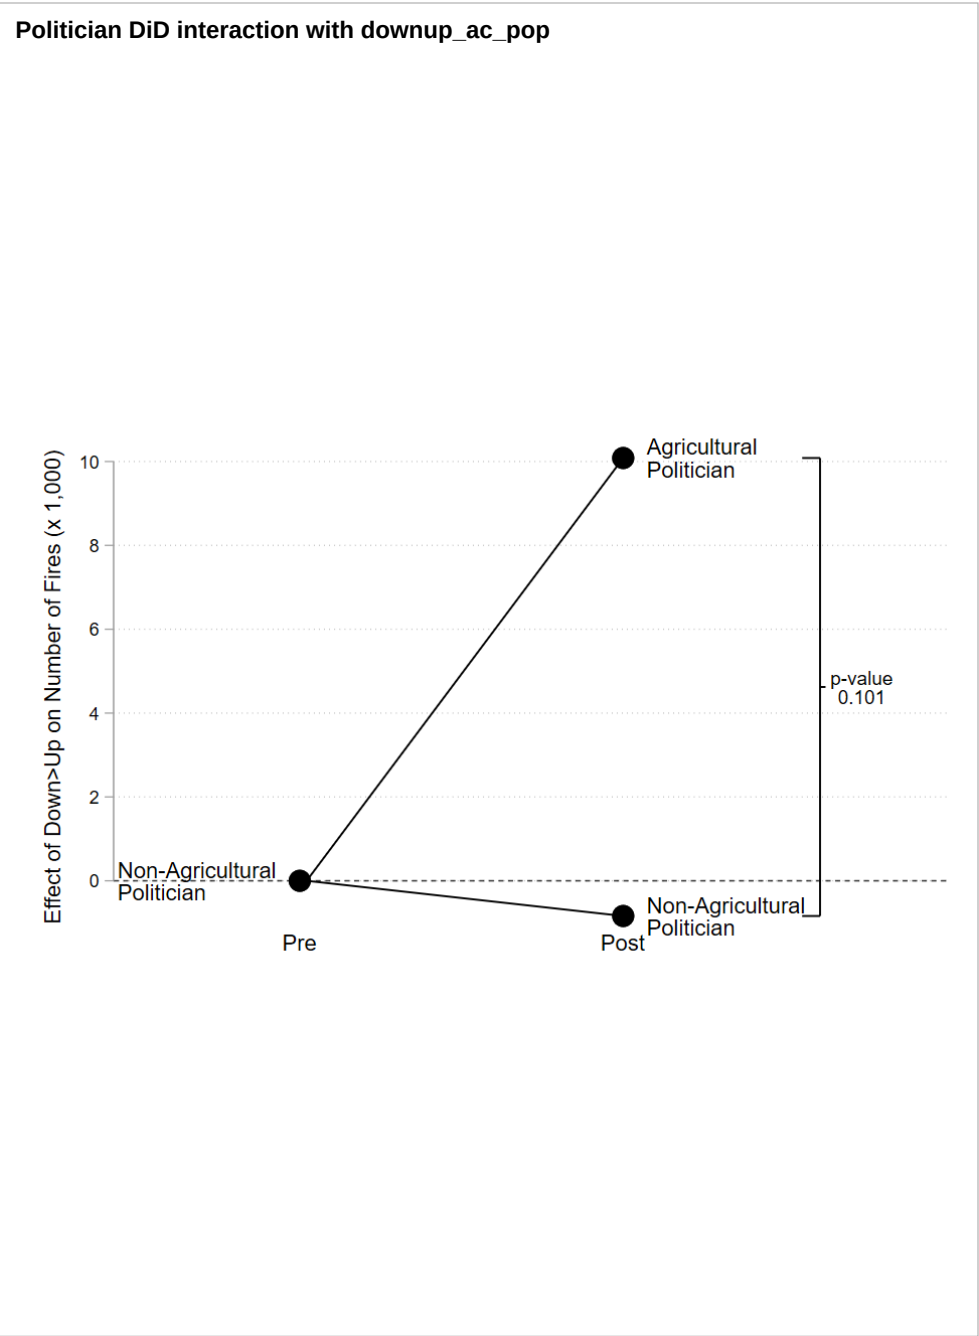

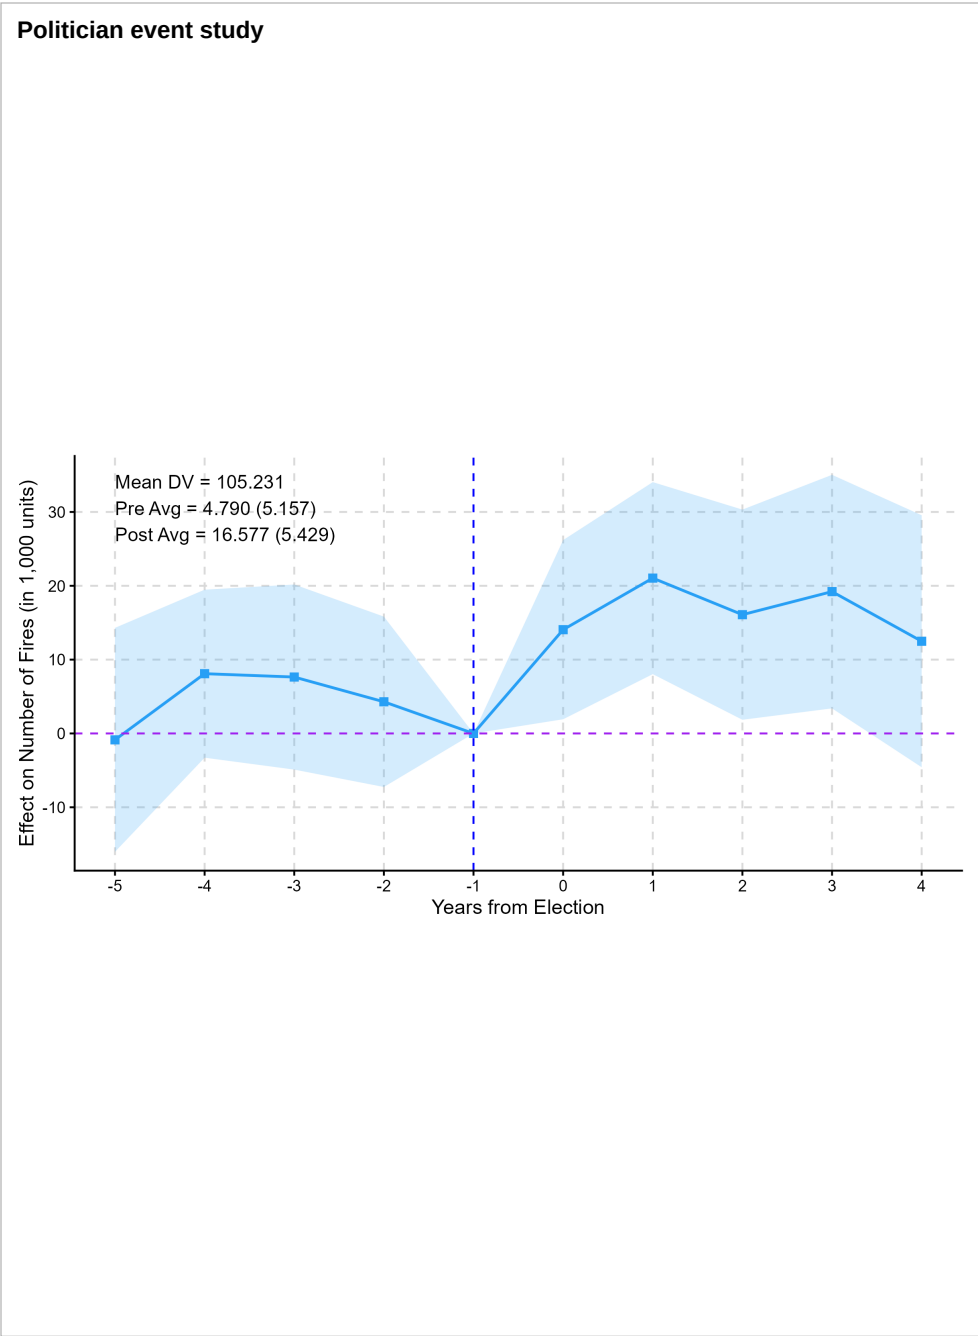

FE04: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

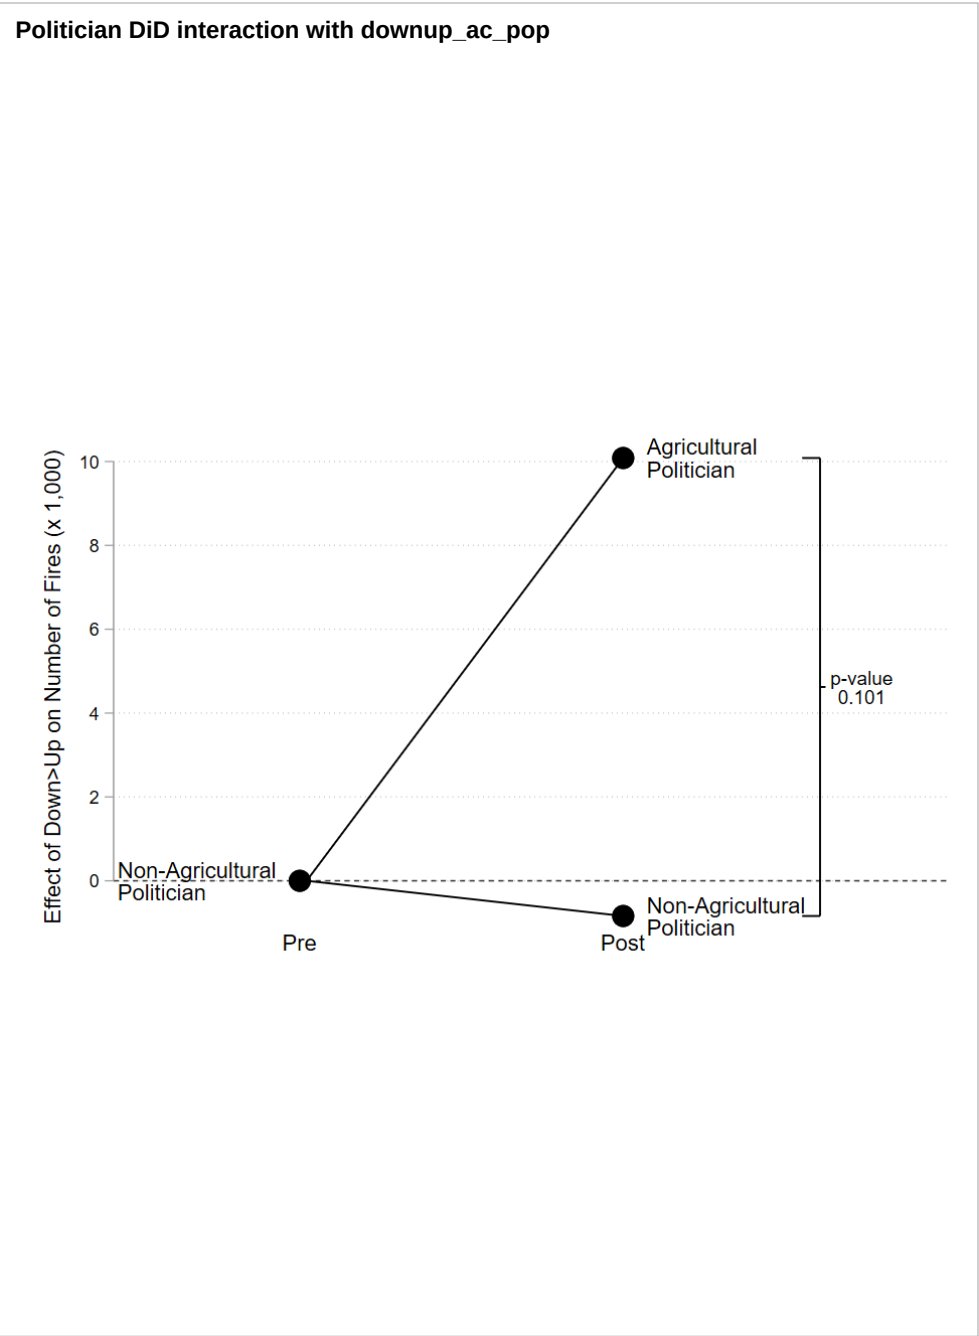

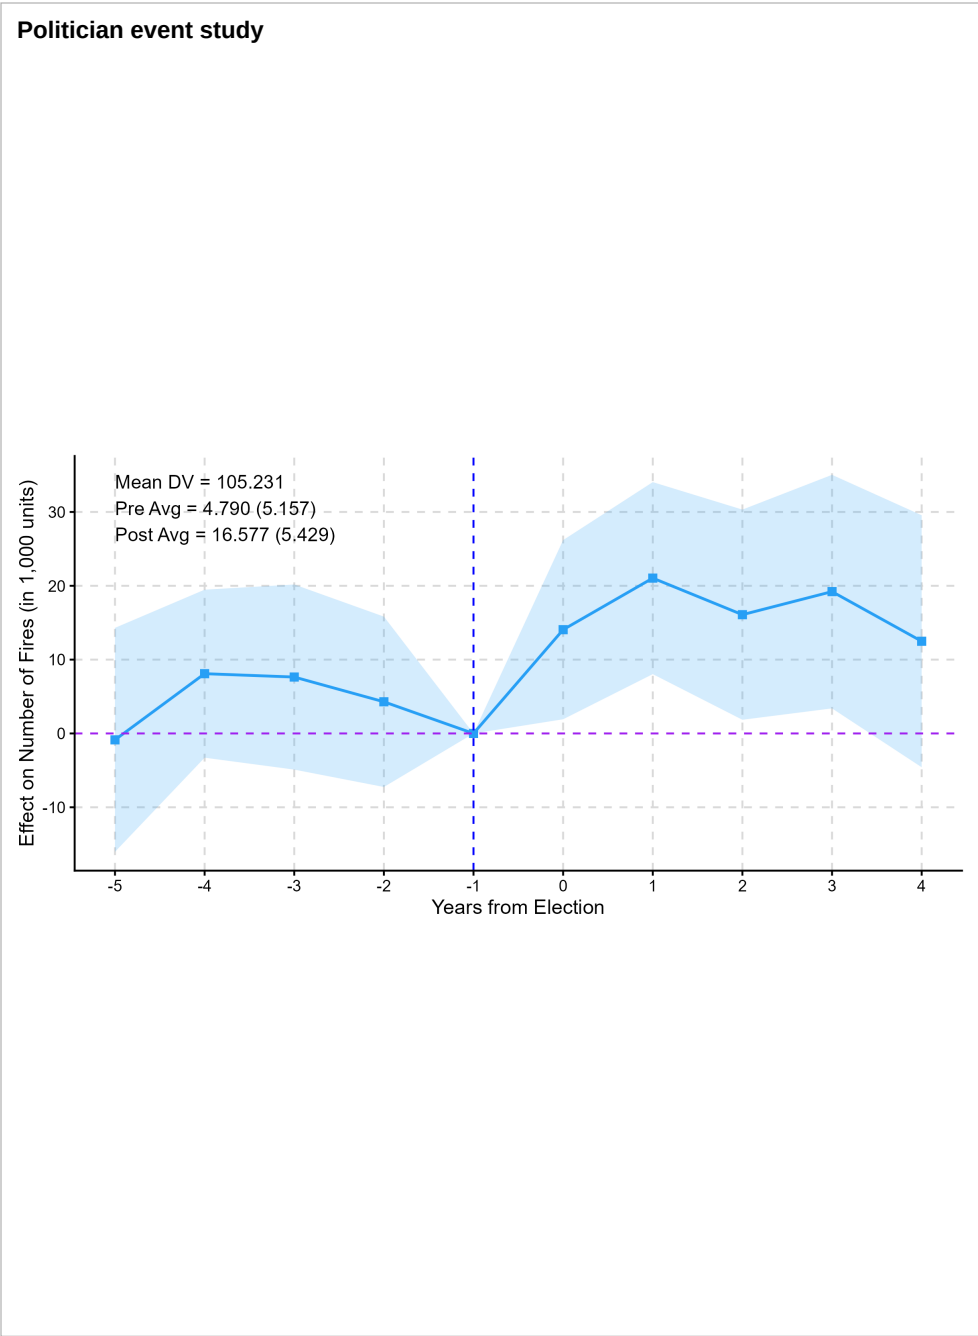

FE05: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

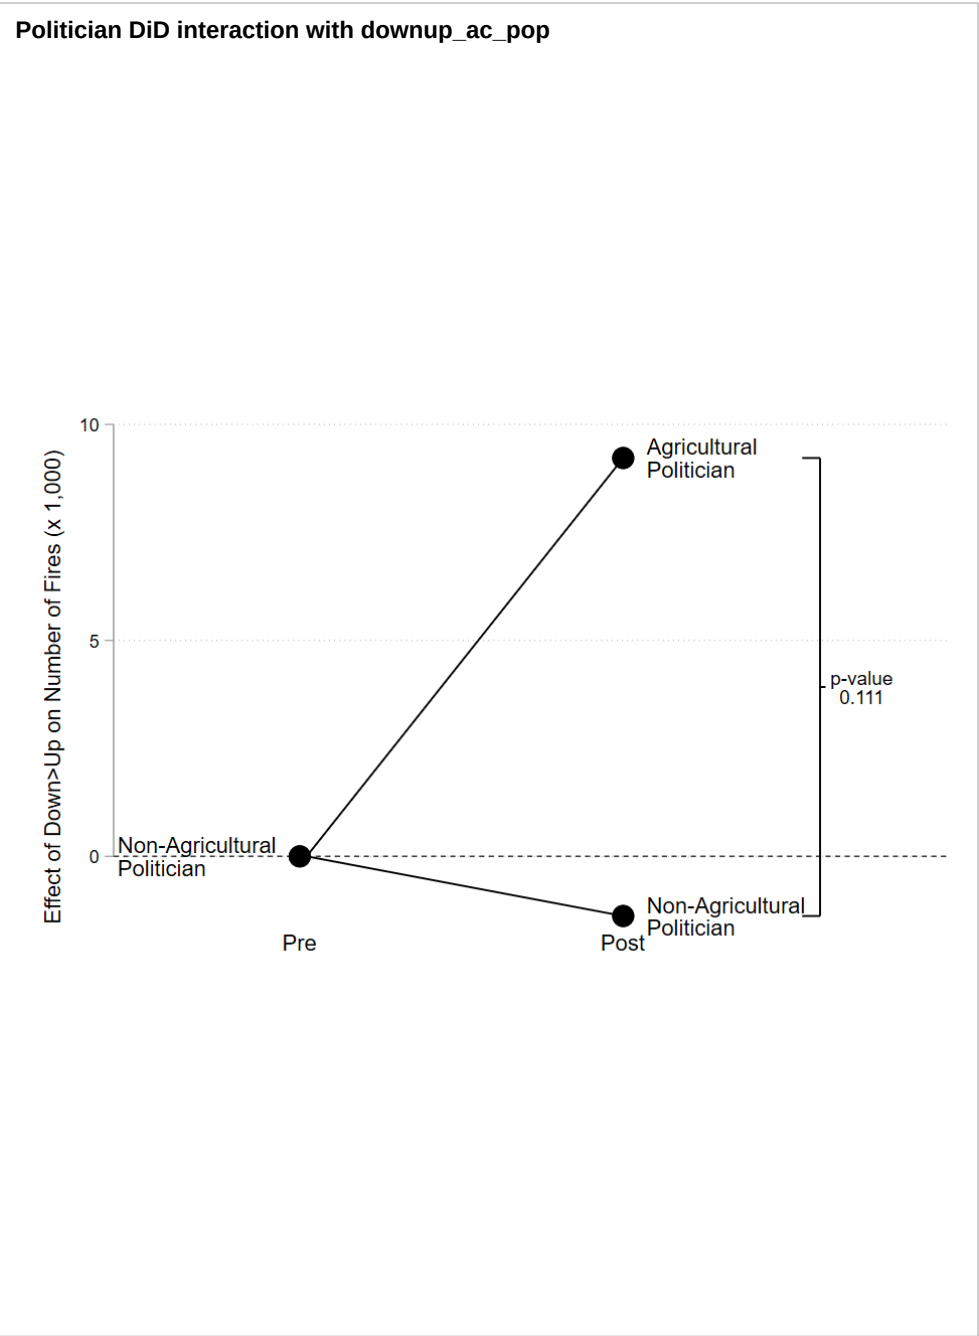

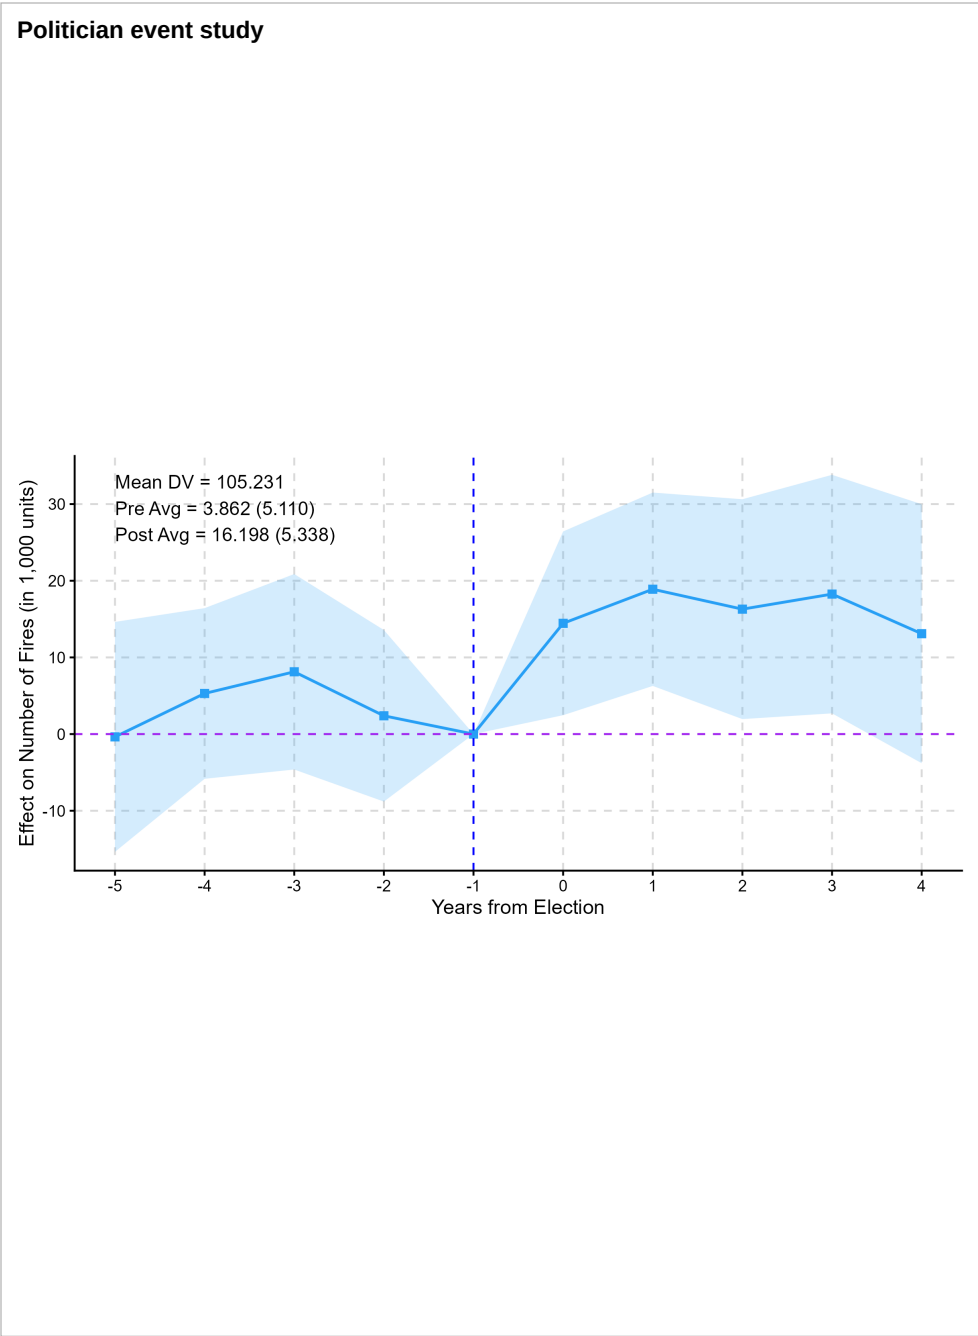

FE06: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

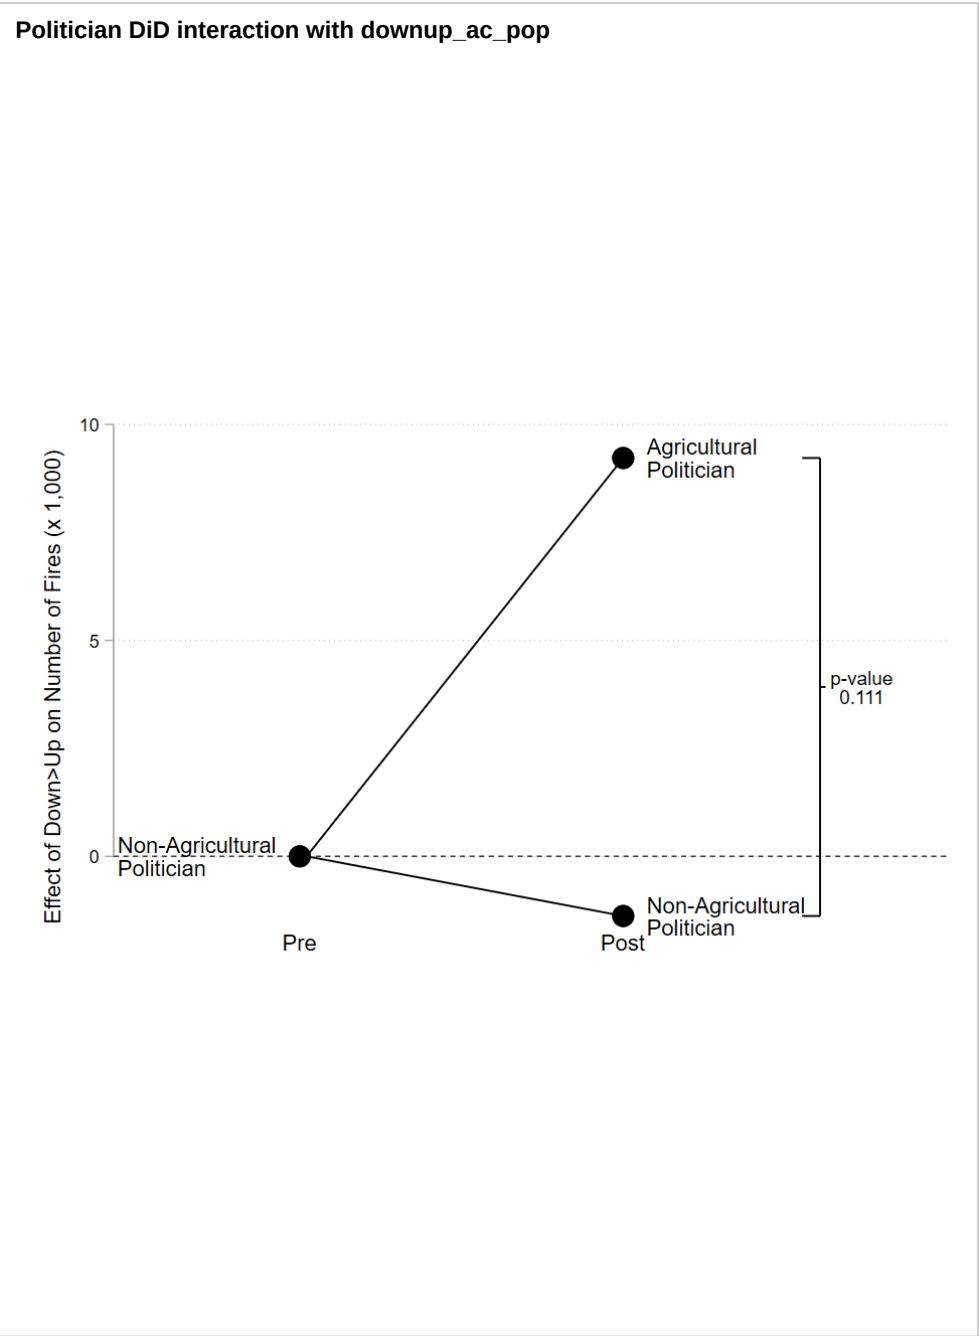

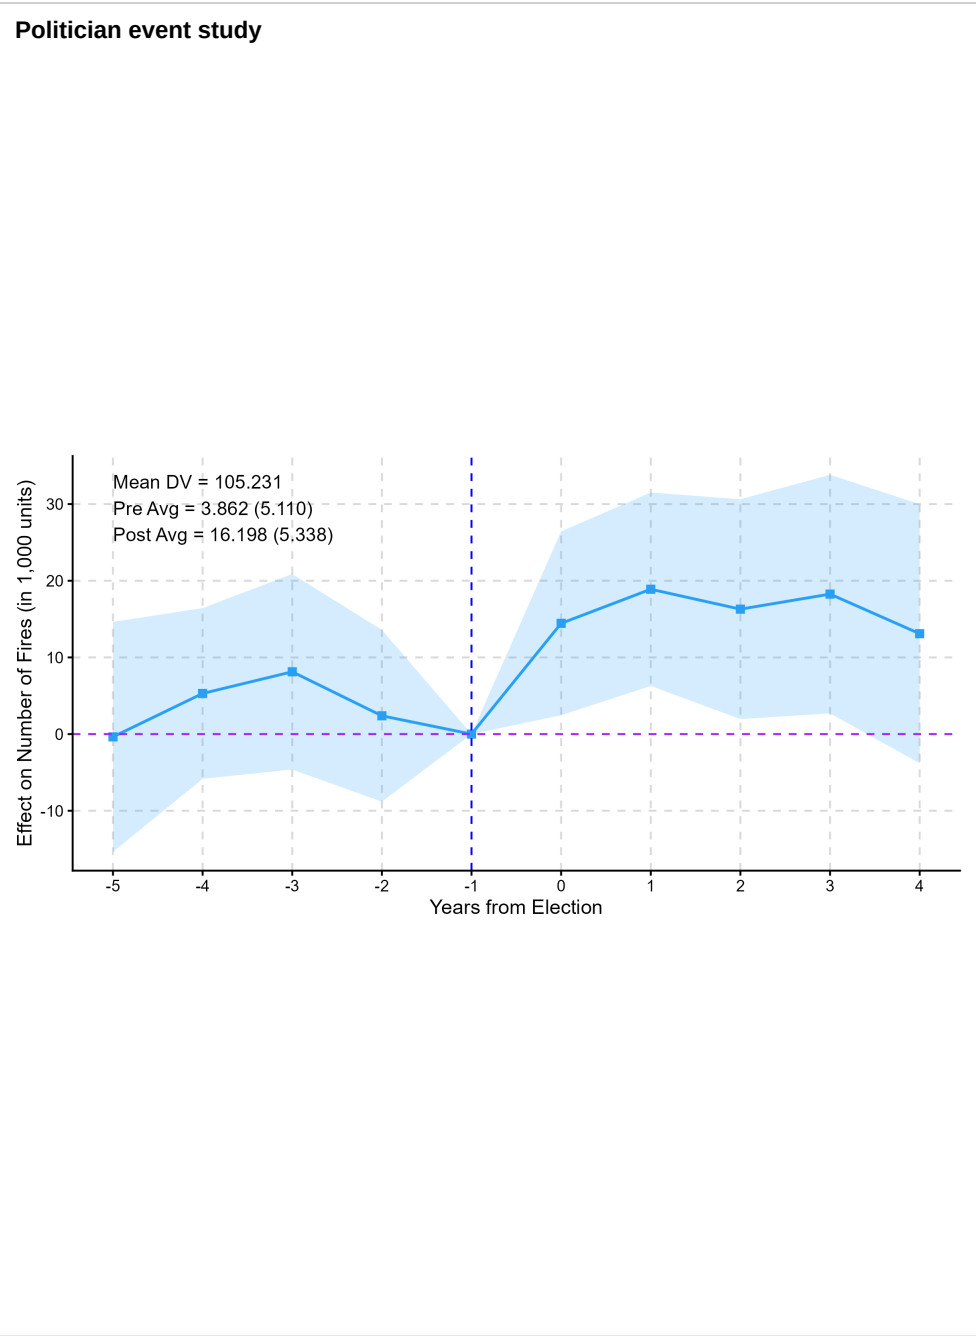

FE07: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

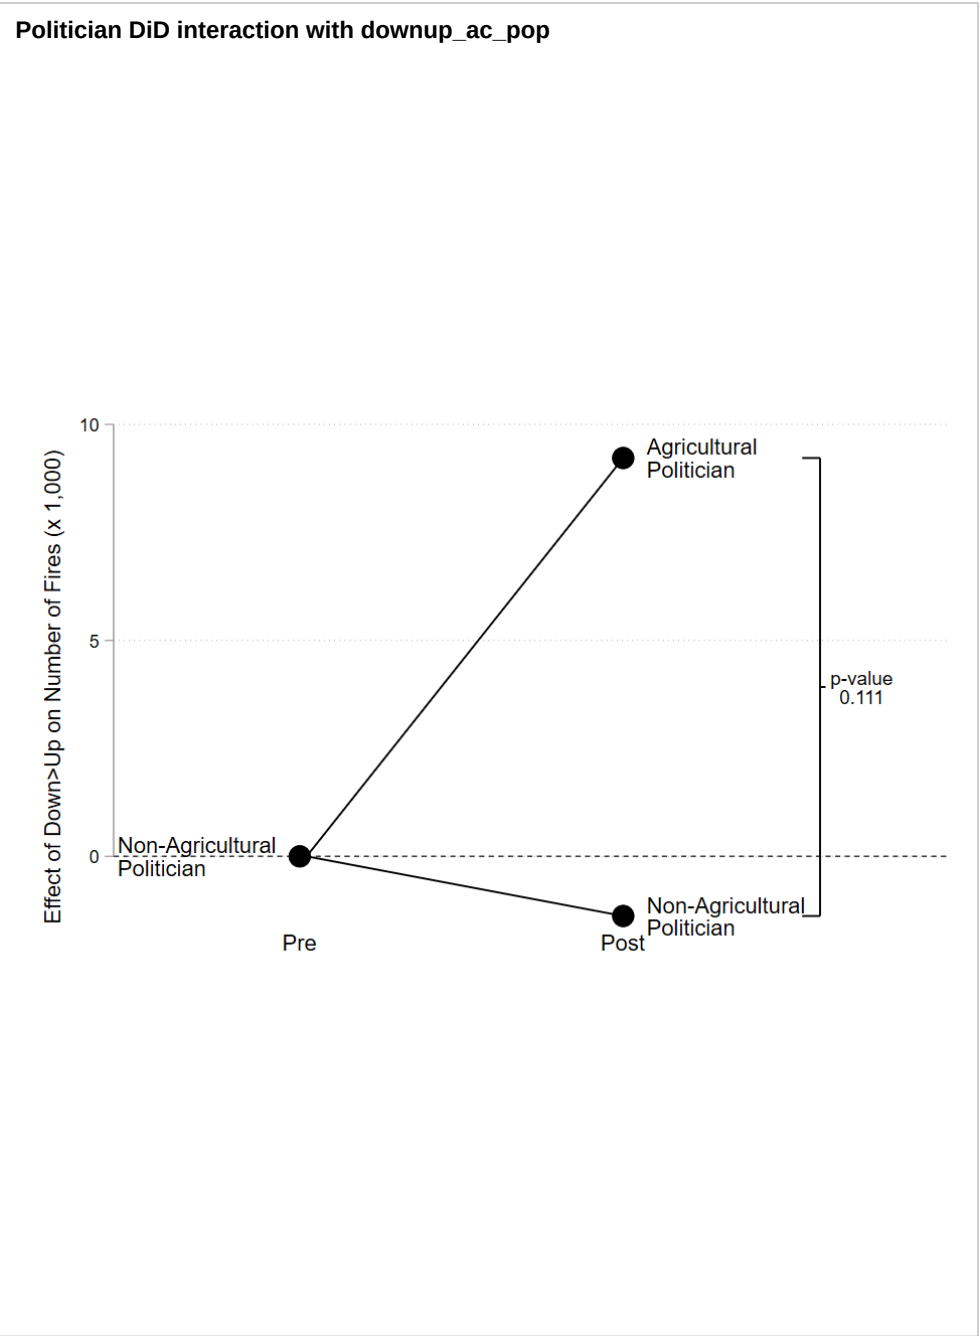

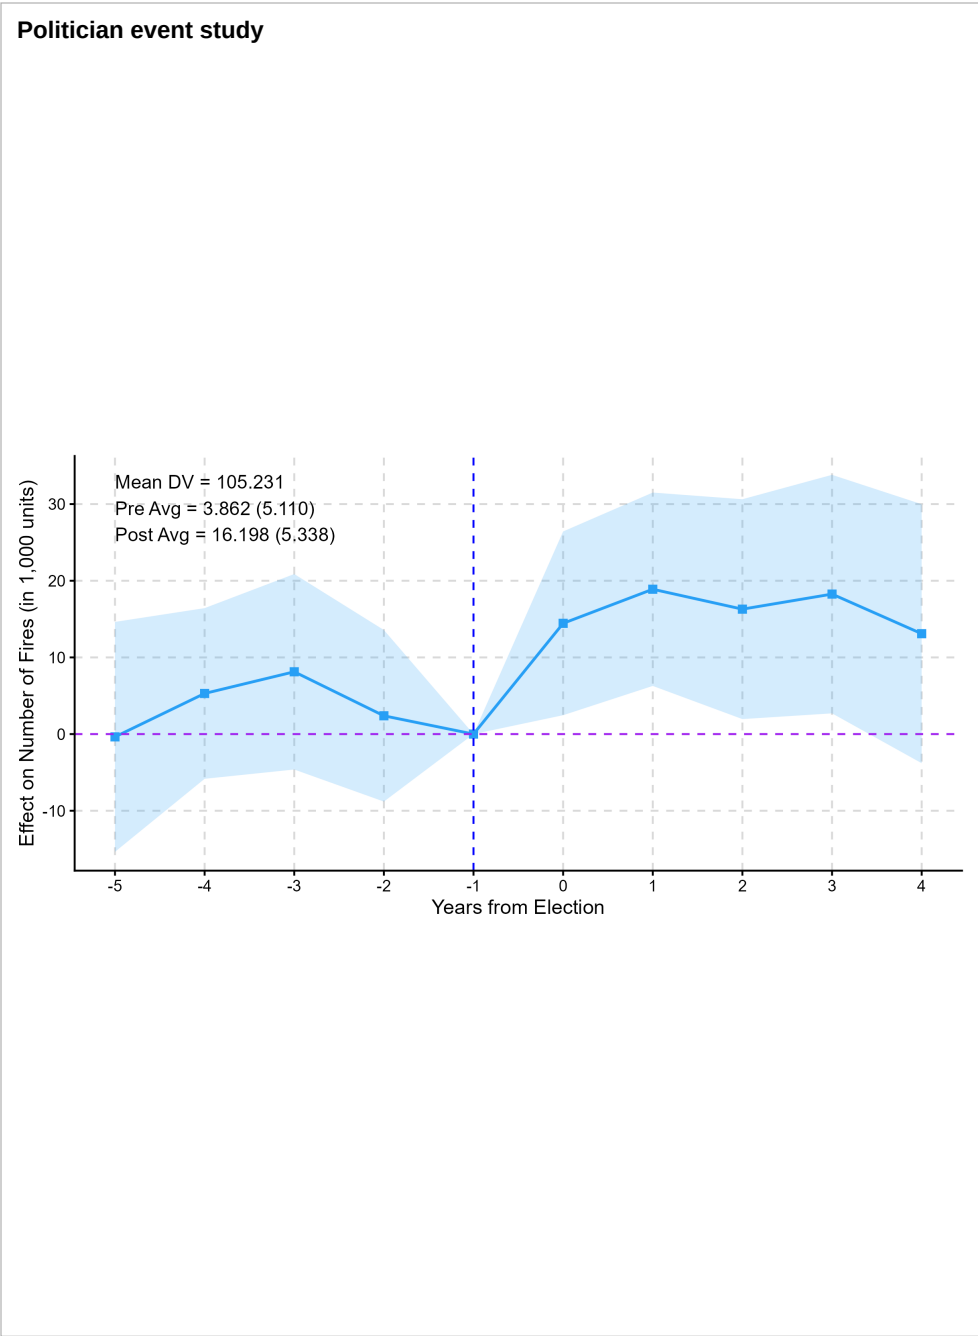

FE08: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

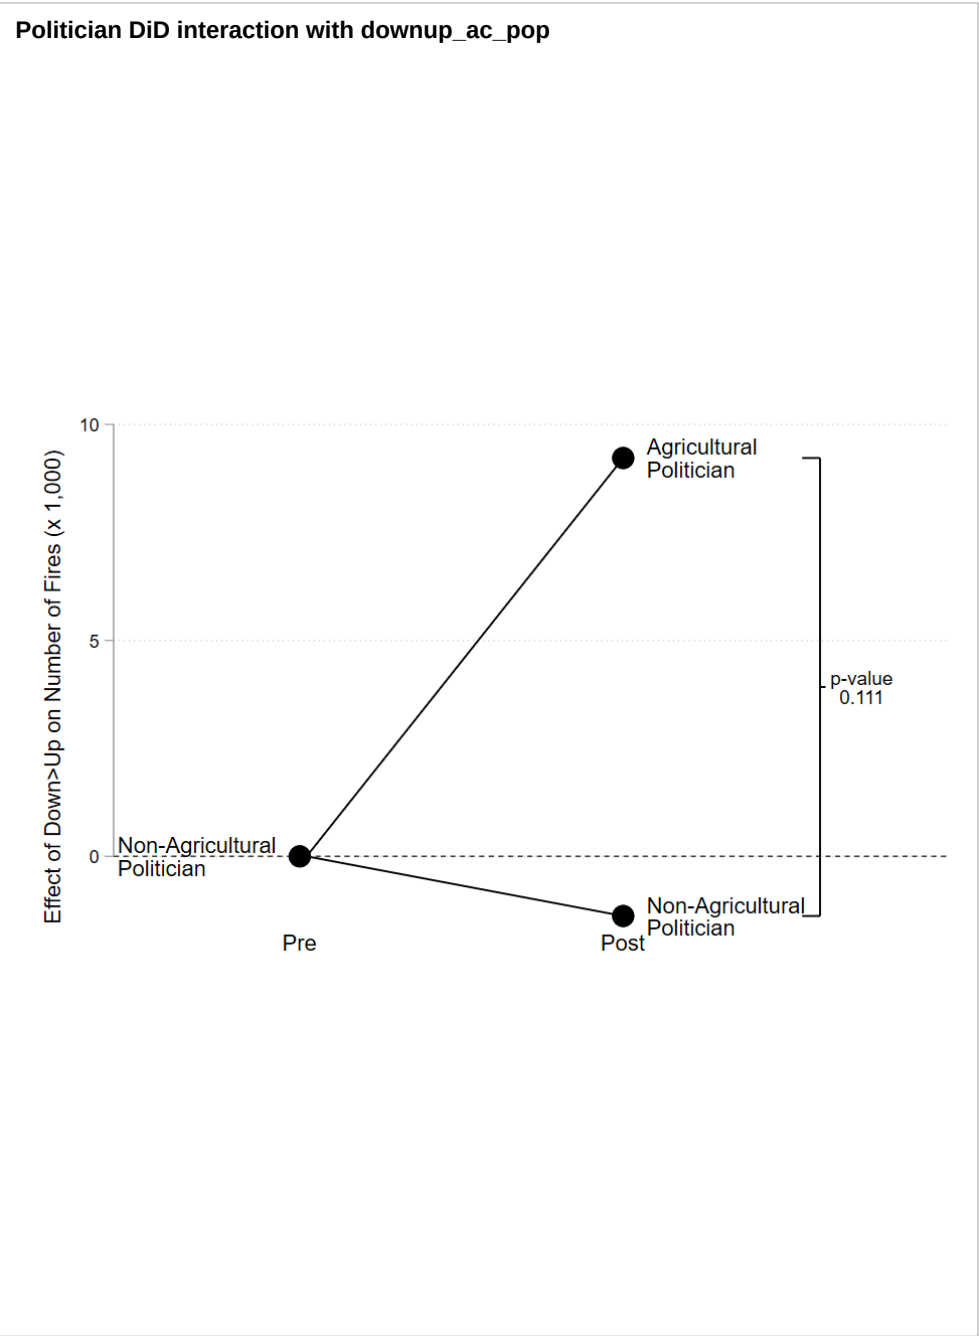

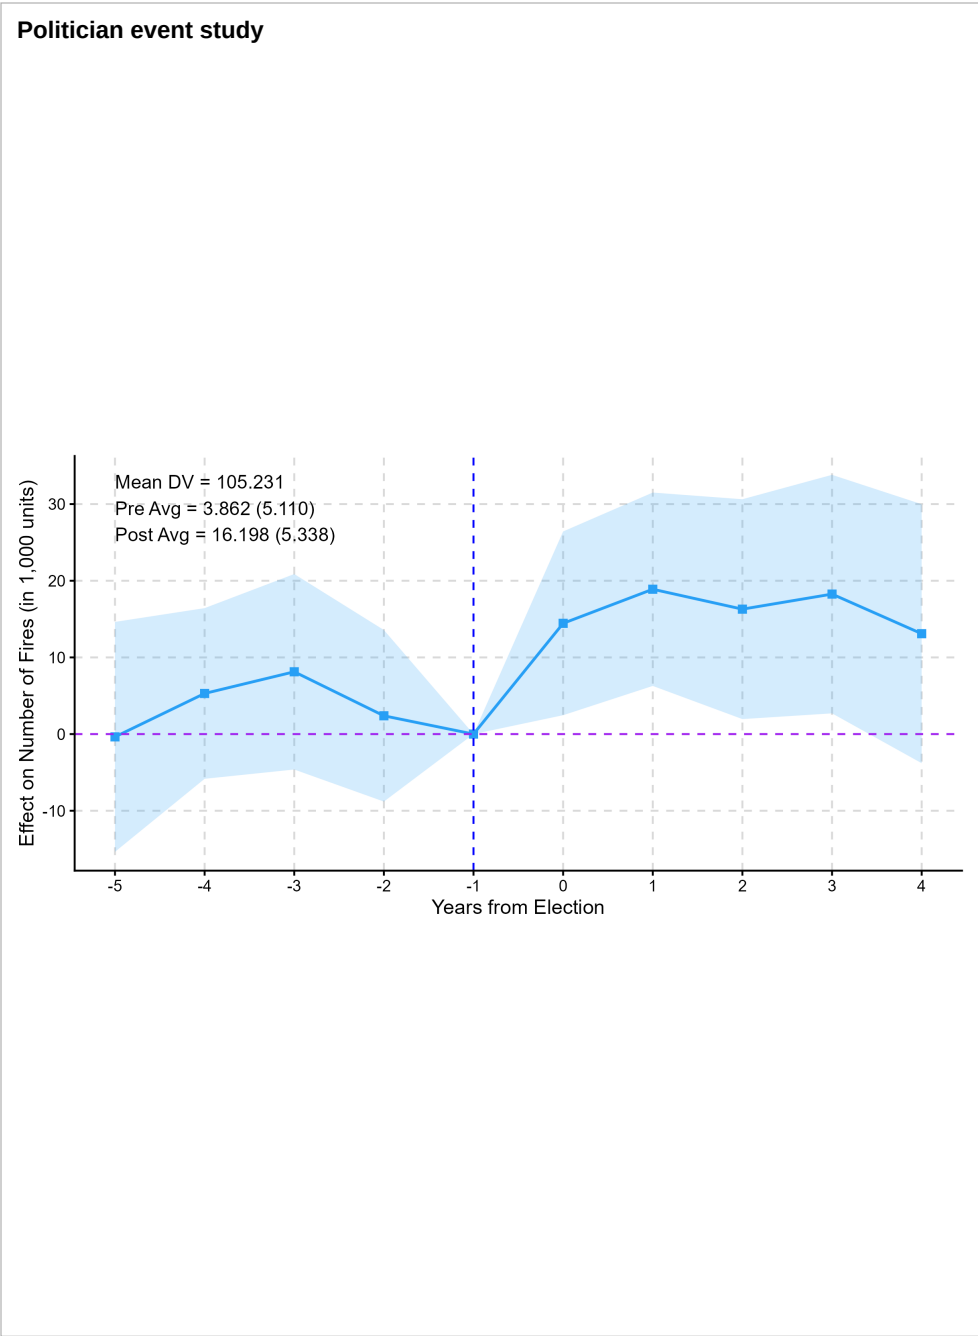

FE09: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

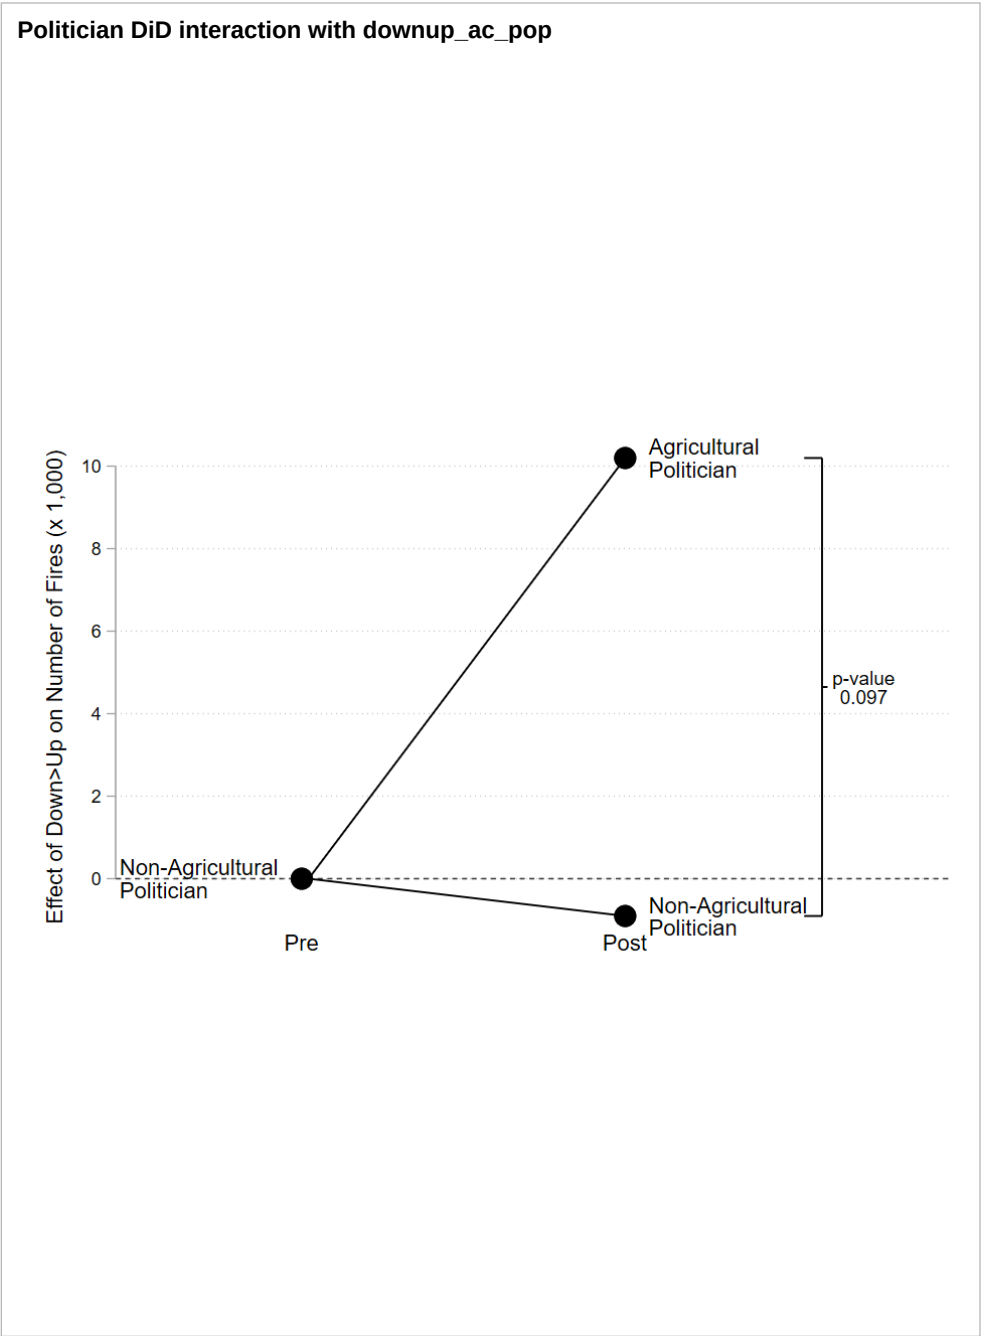

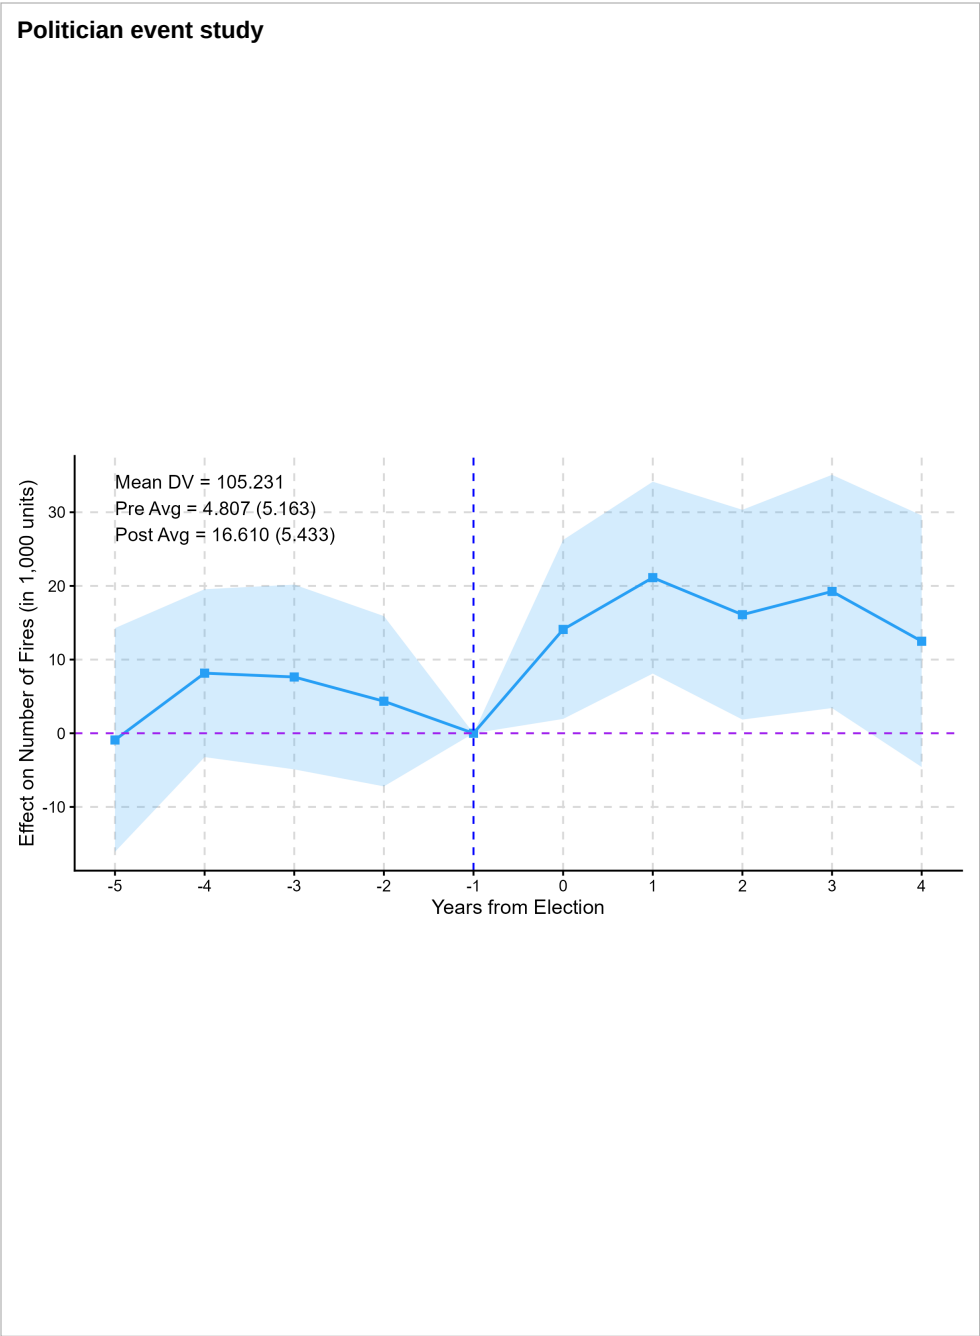

FE10: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

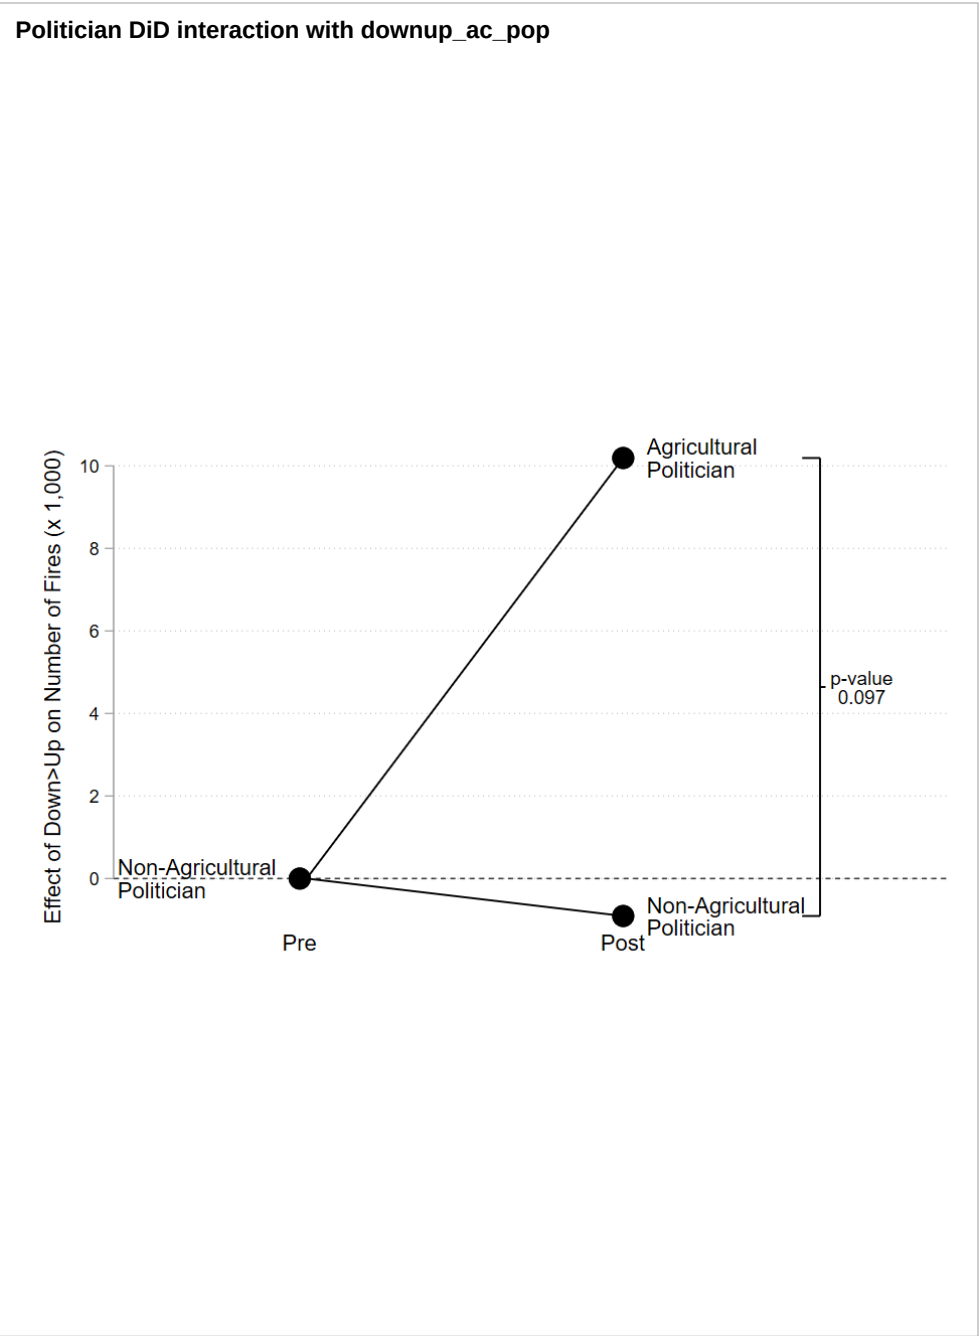

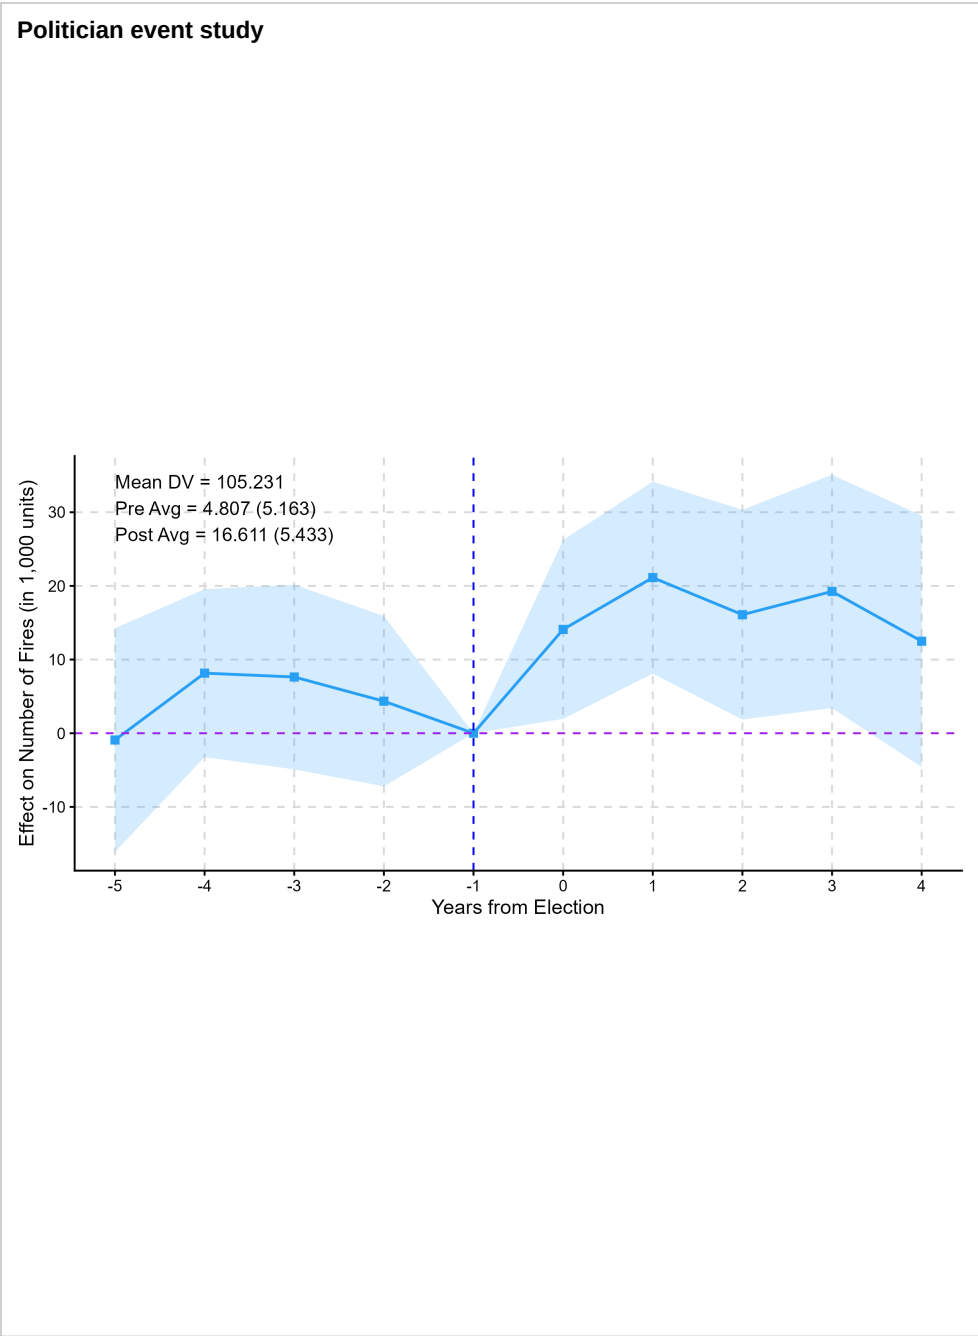

FE11: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

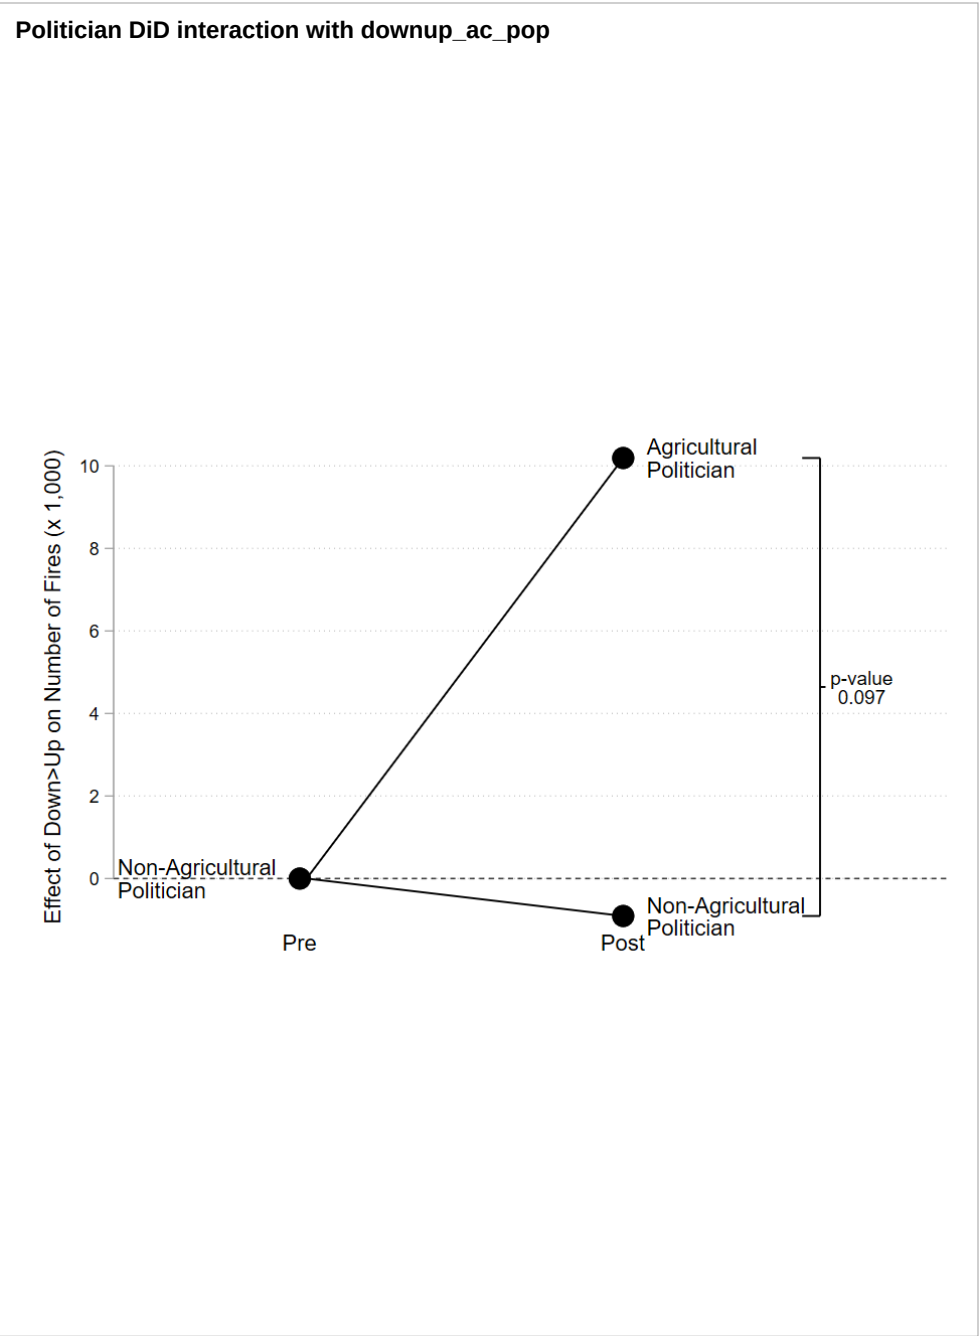

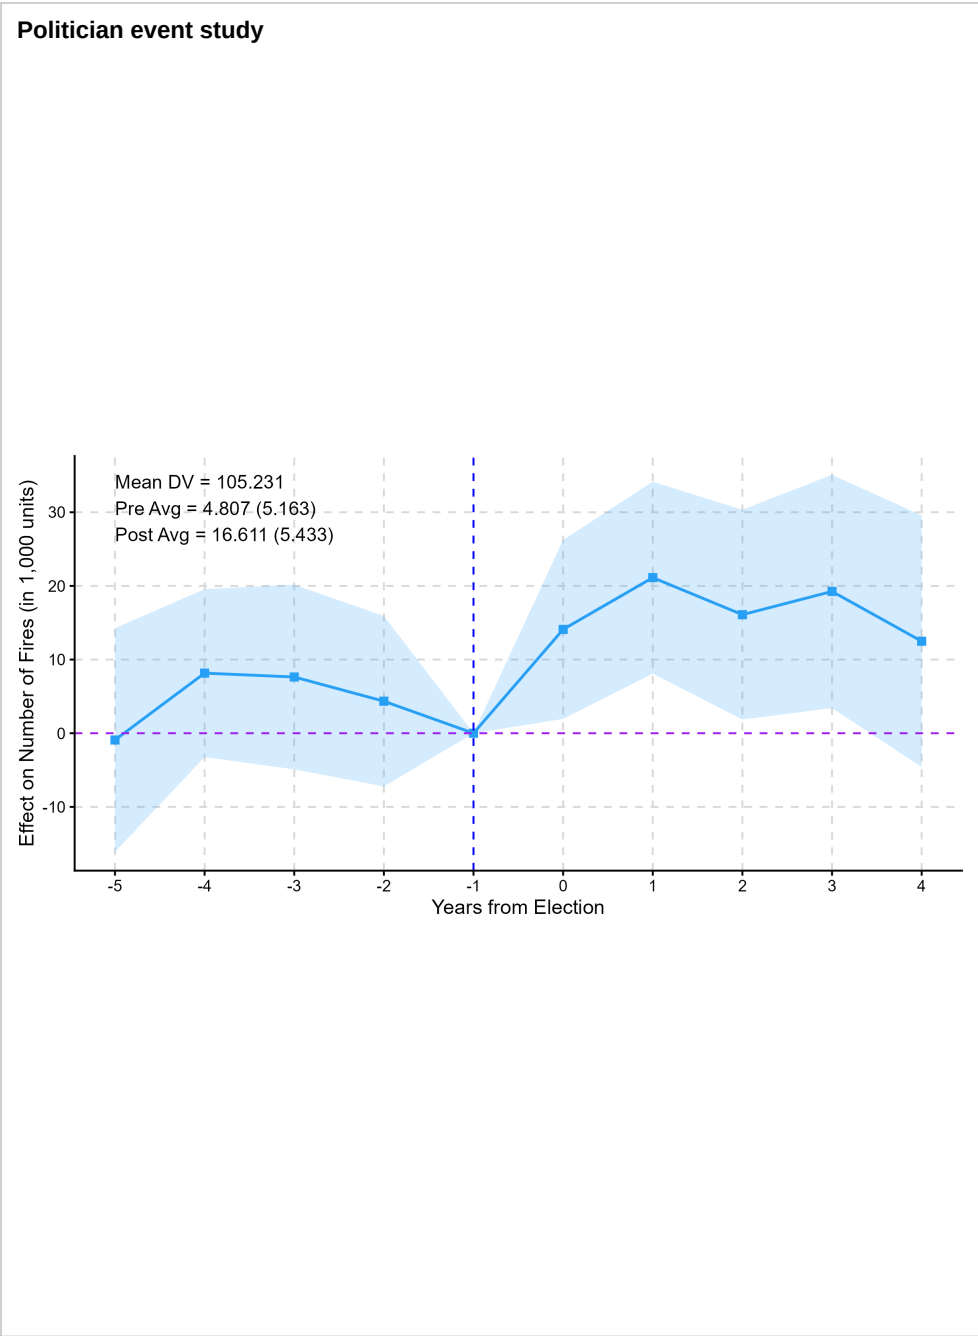

FE12: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

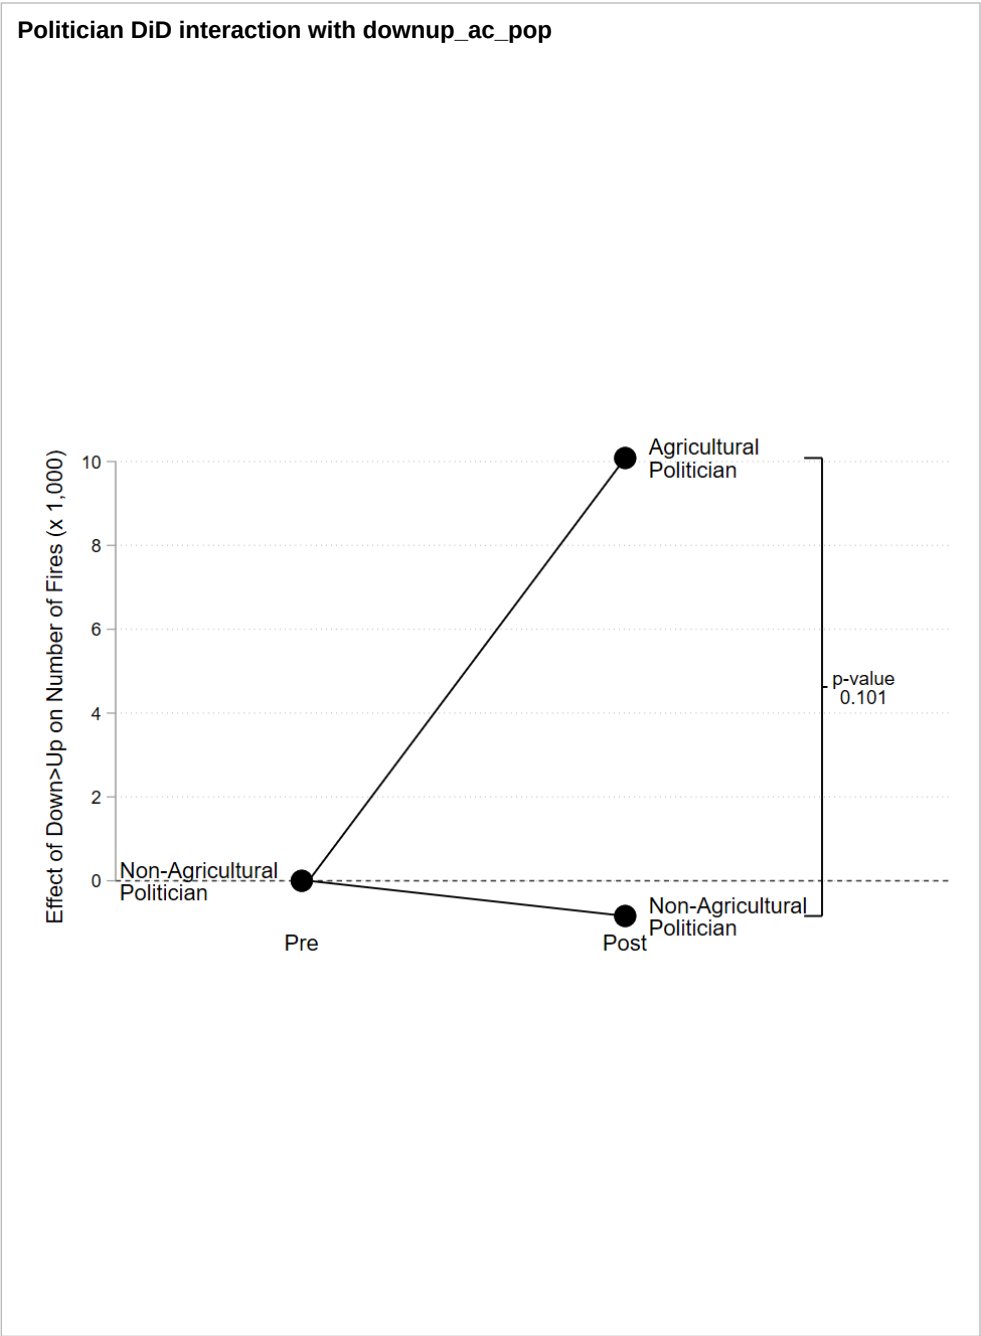

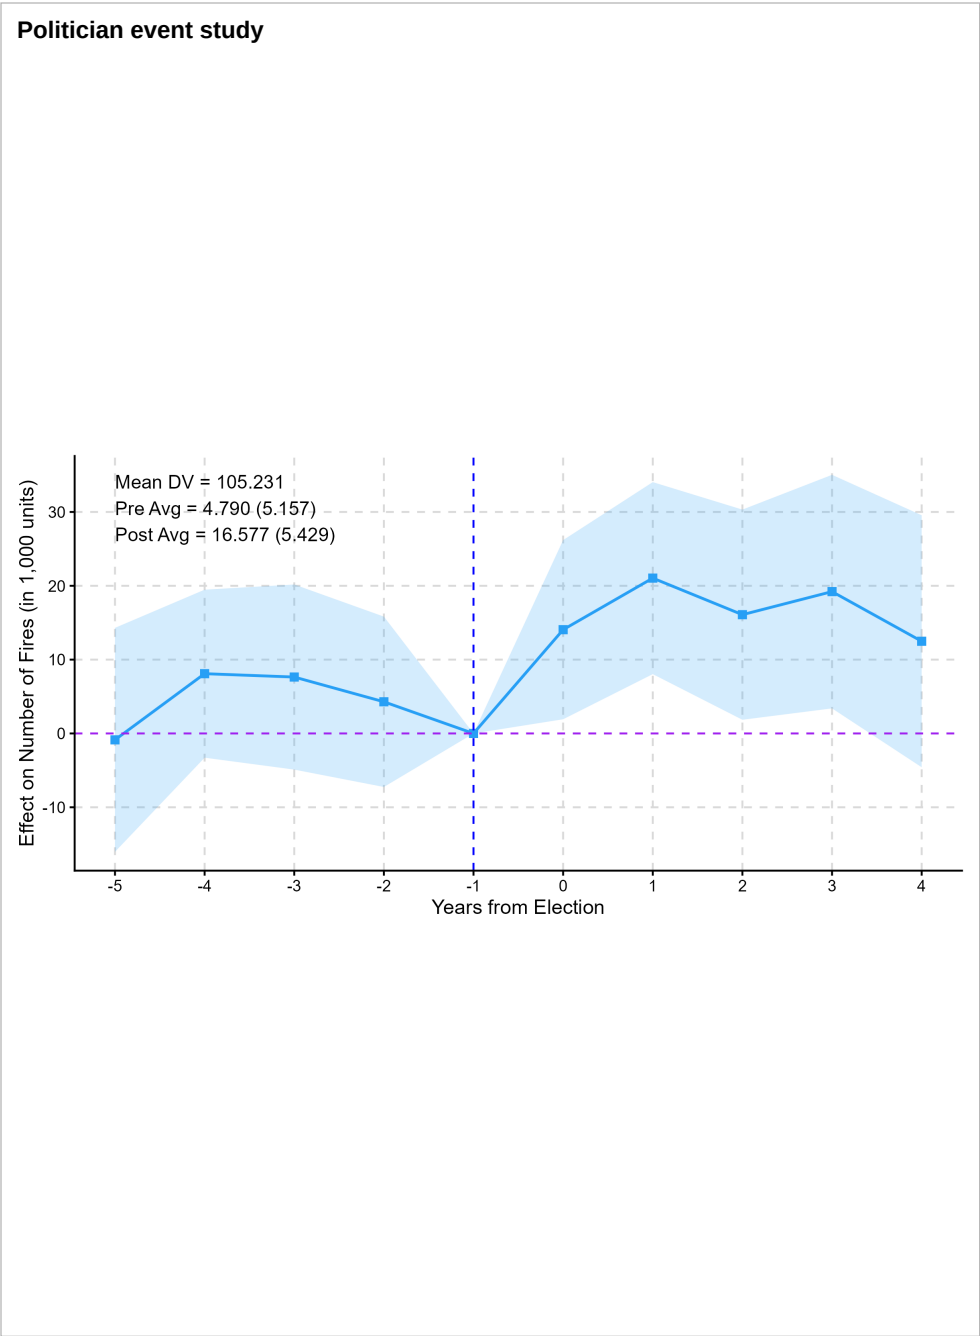

FE13: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

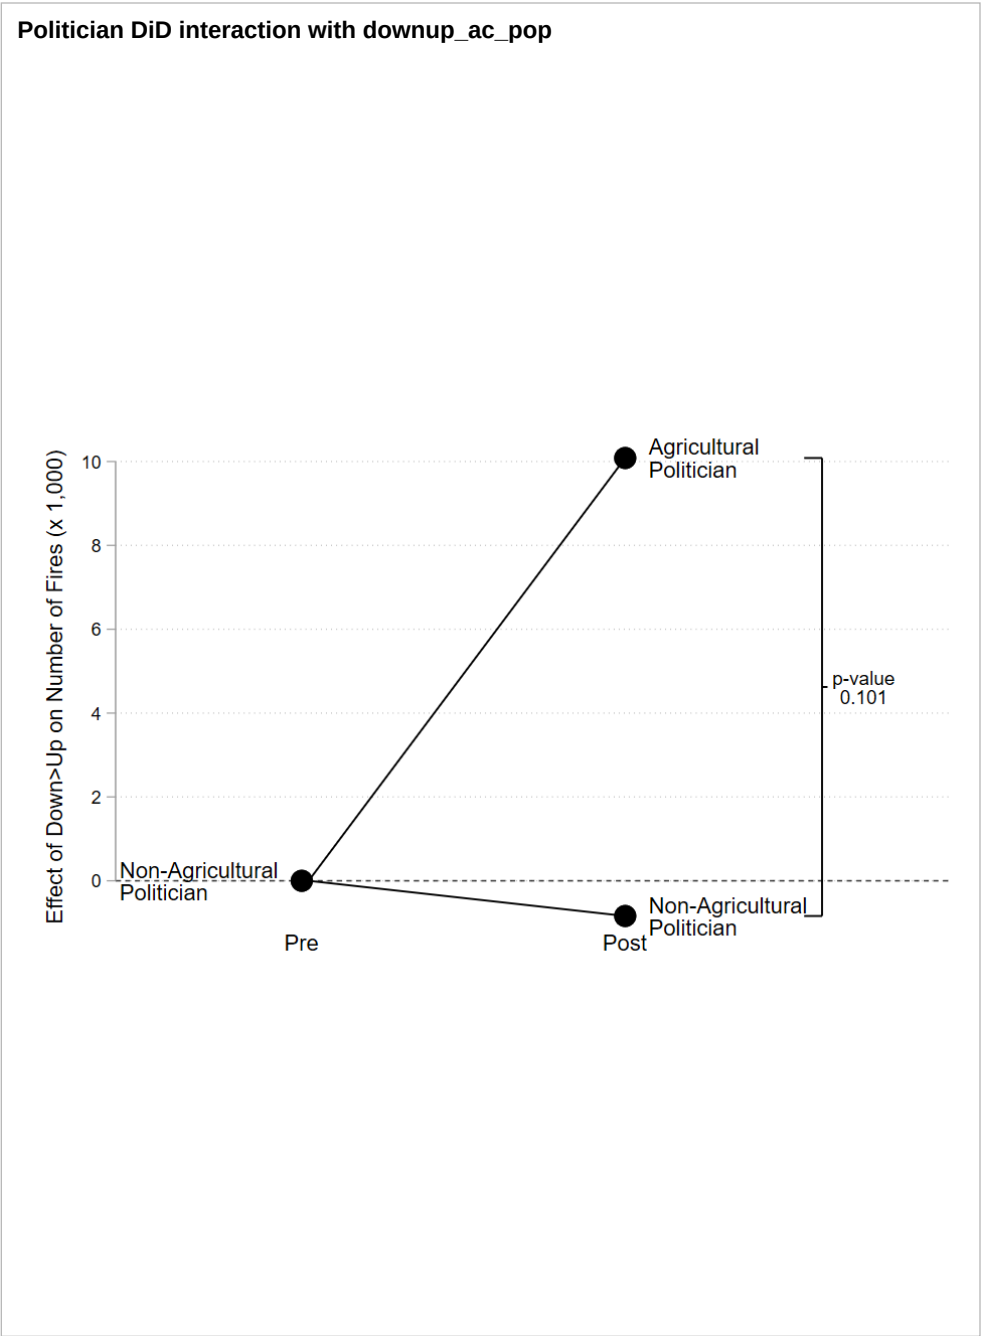

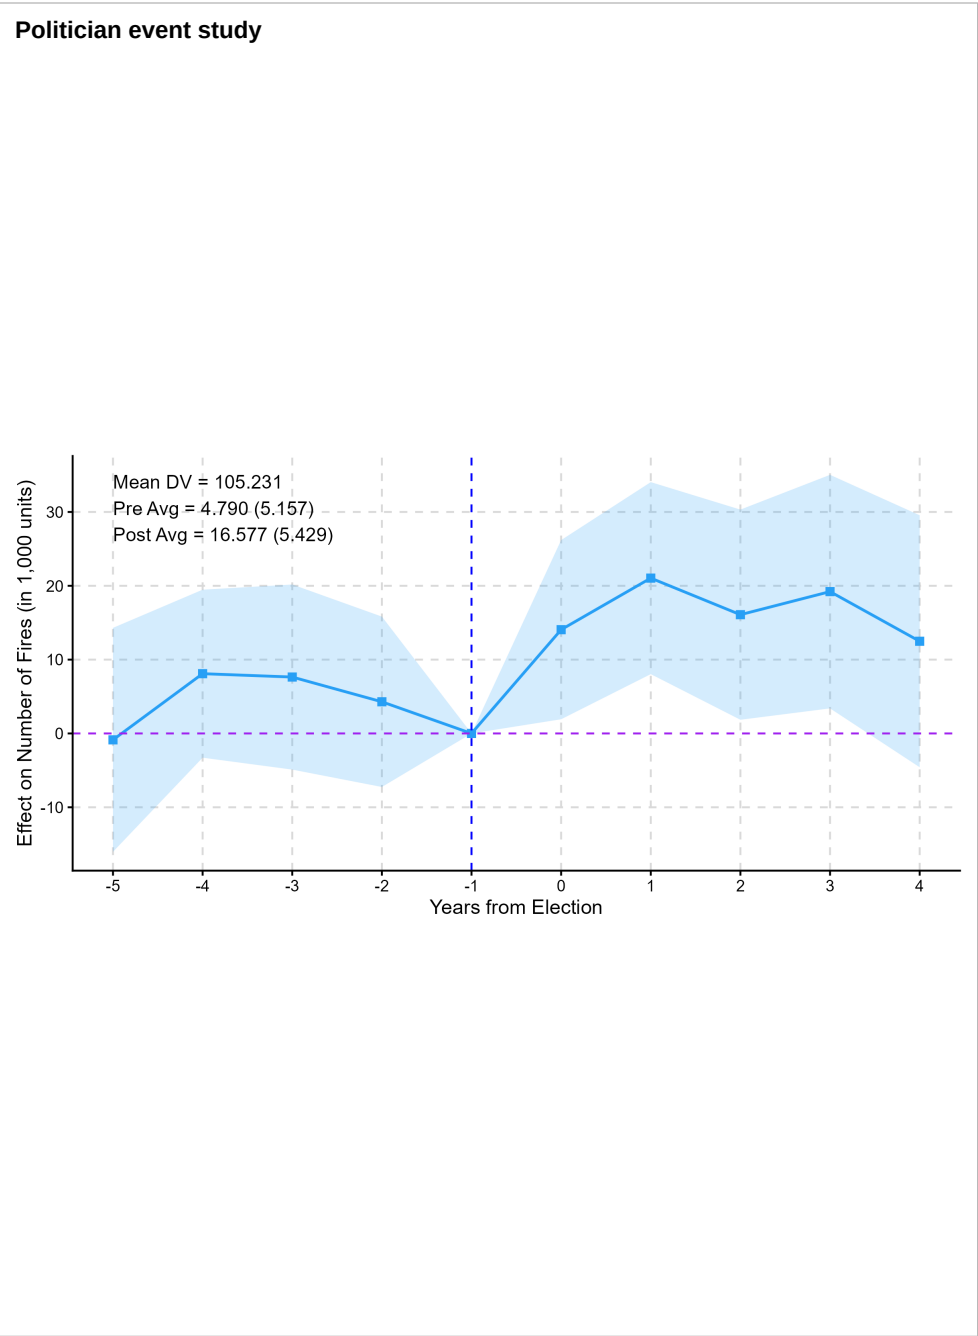

FE14: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; government year; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

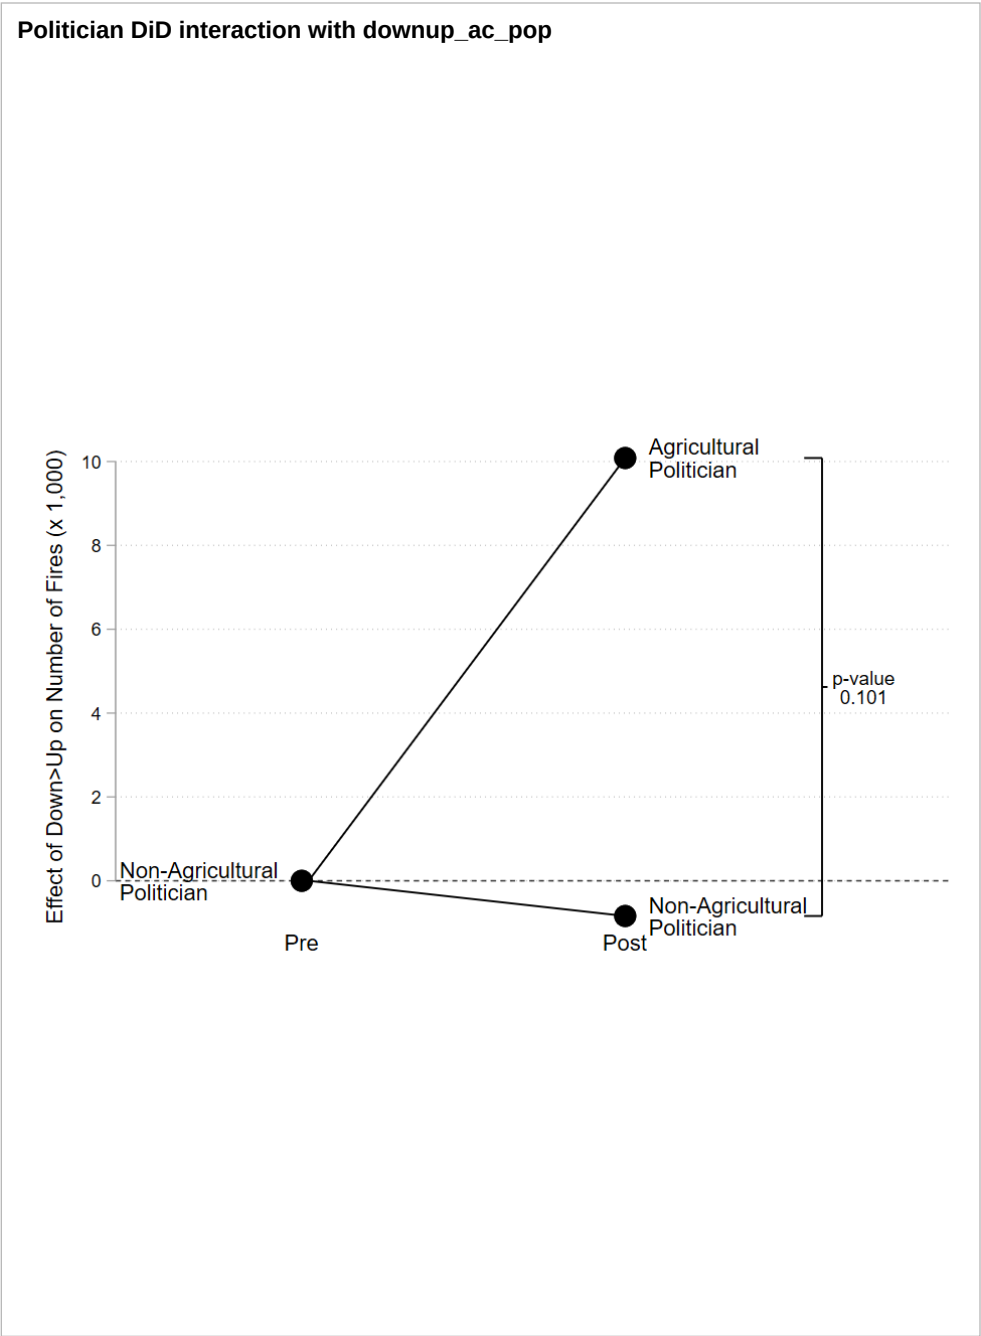

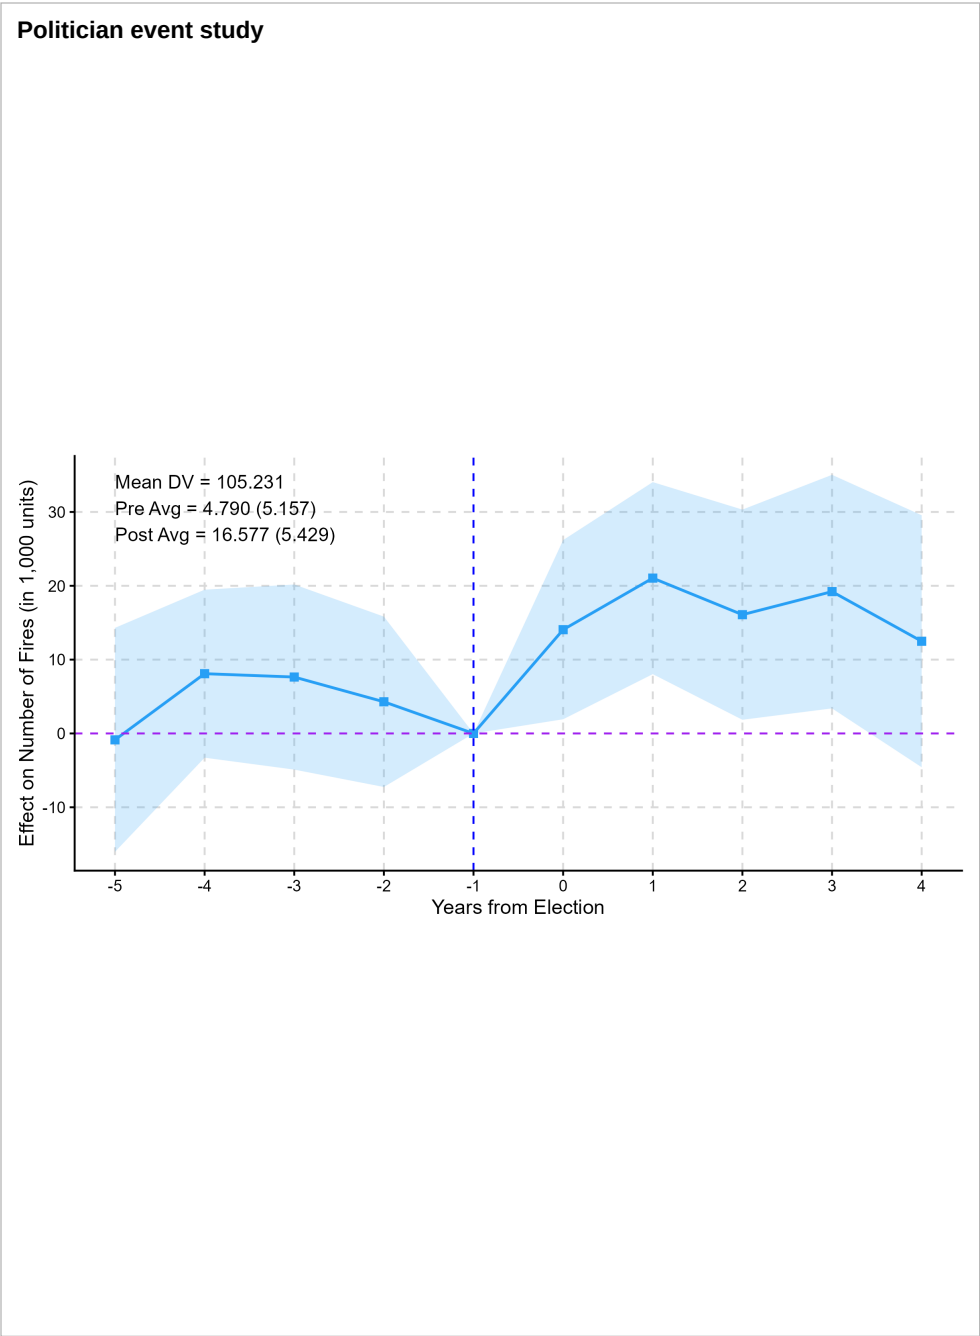

FE15: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; government year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

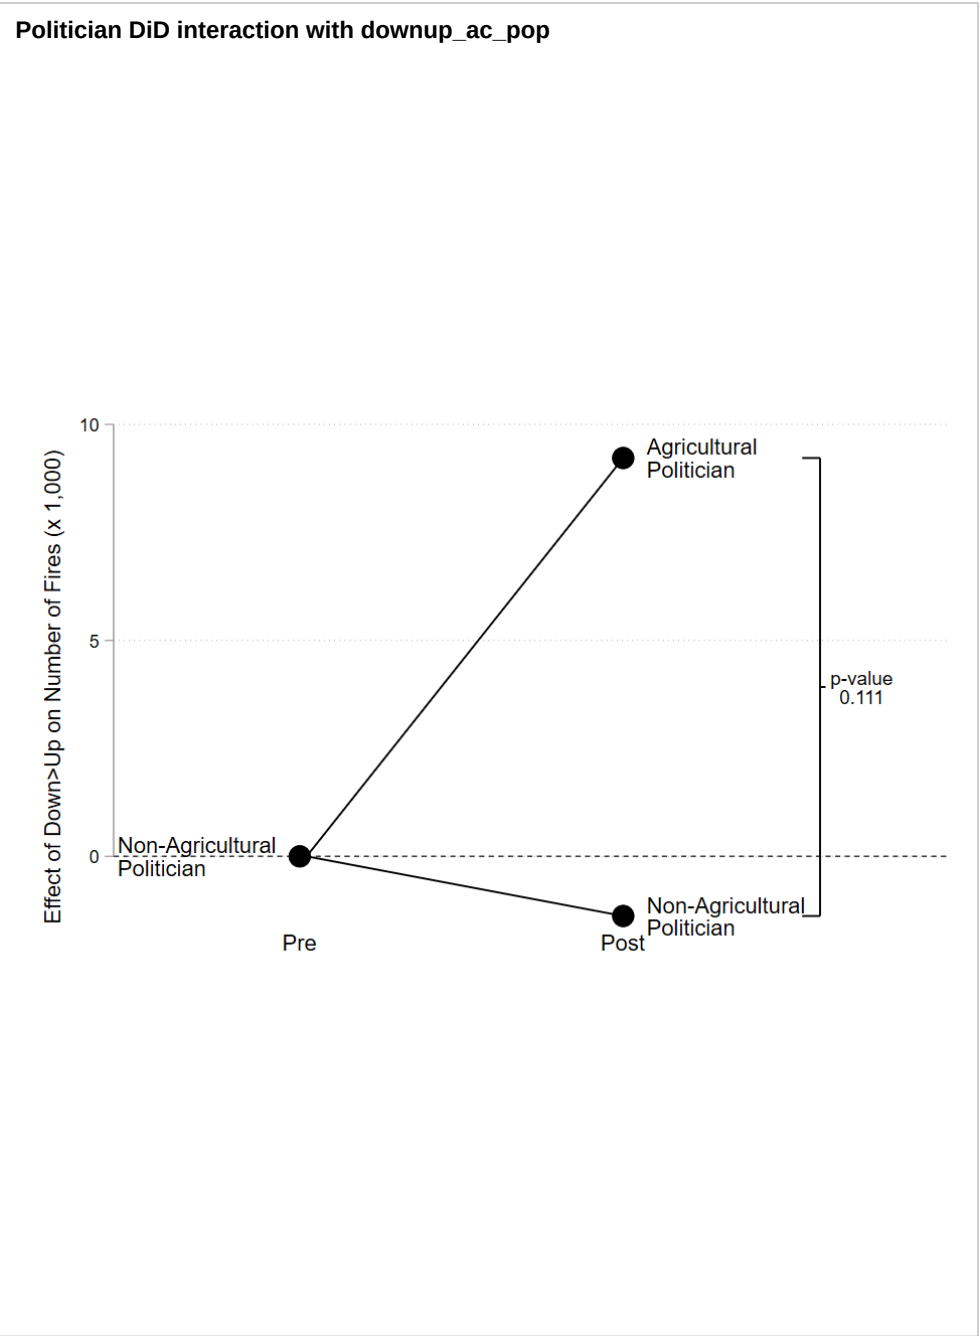

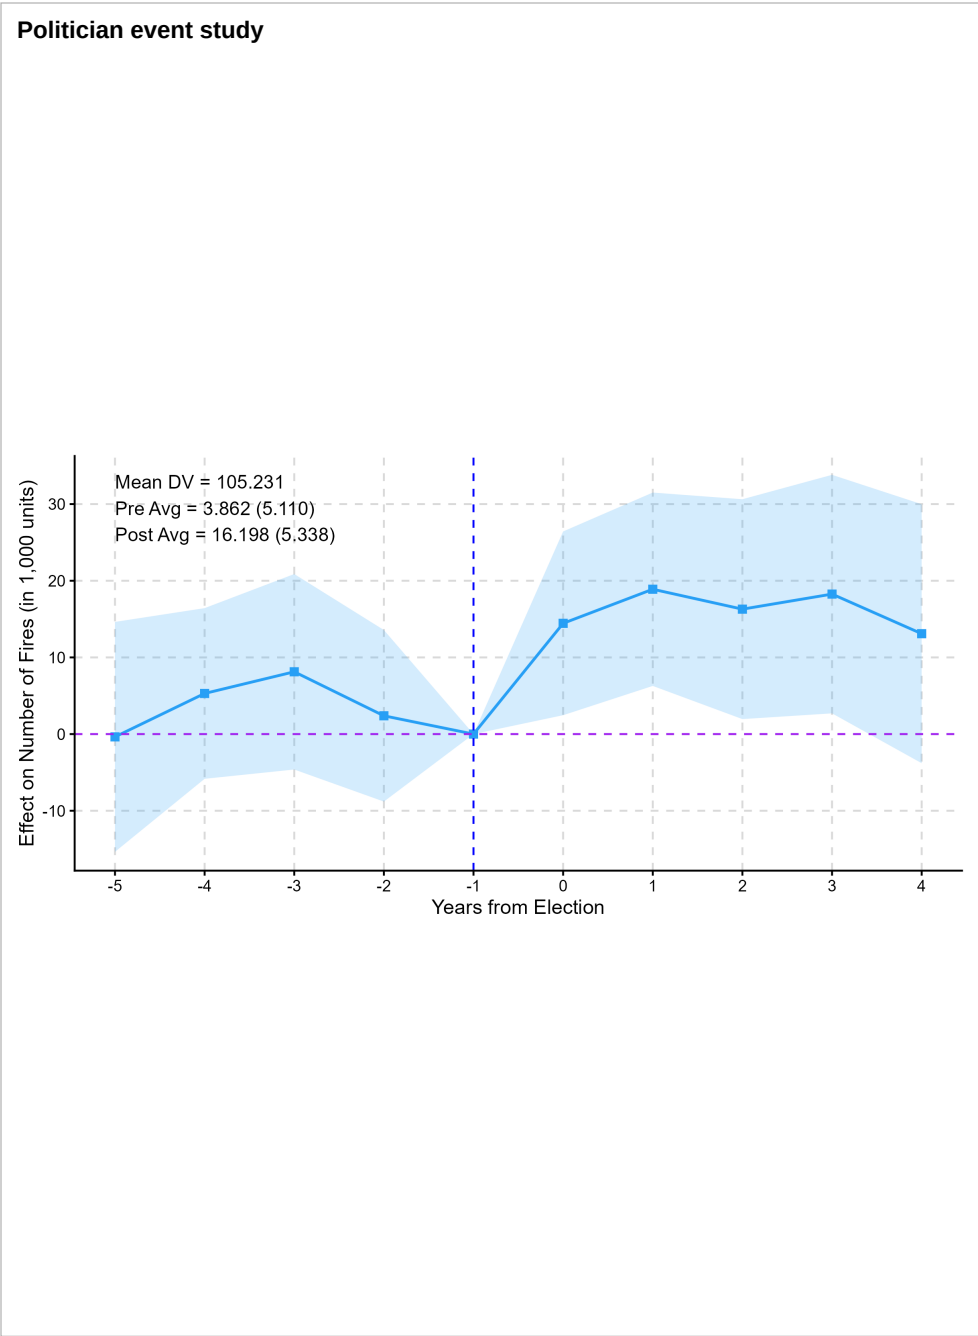

FE16: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

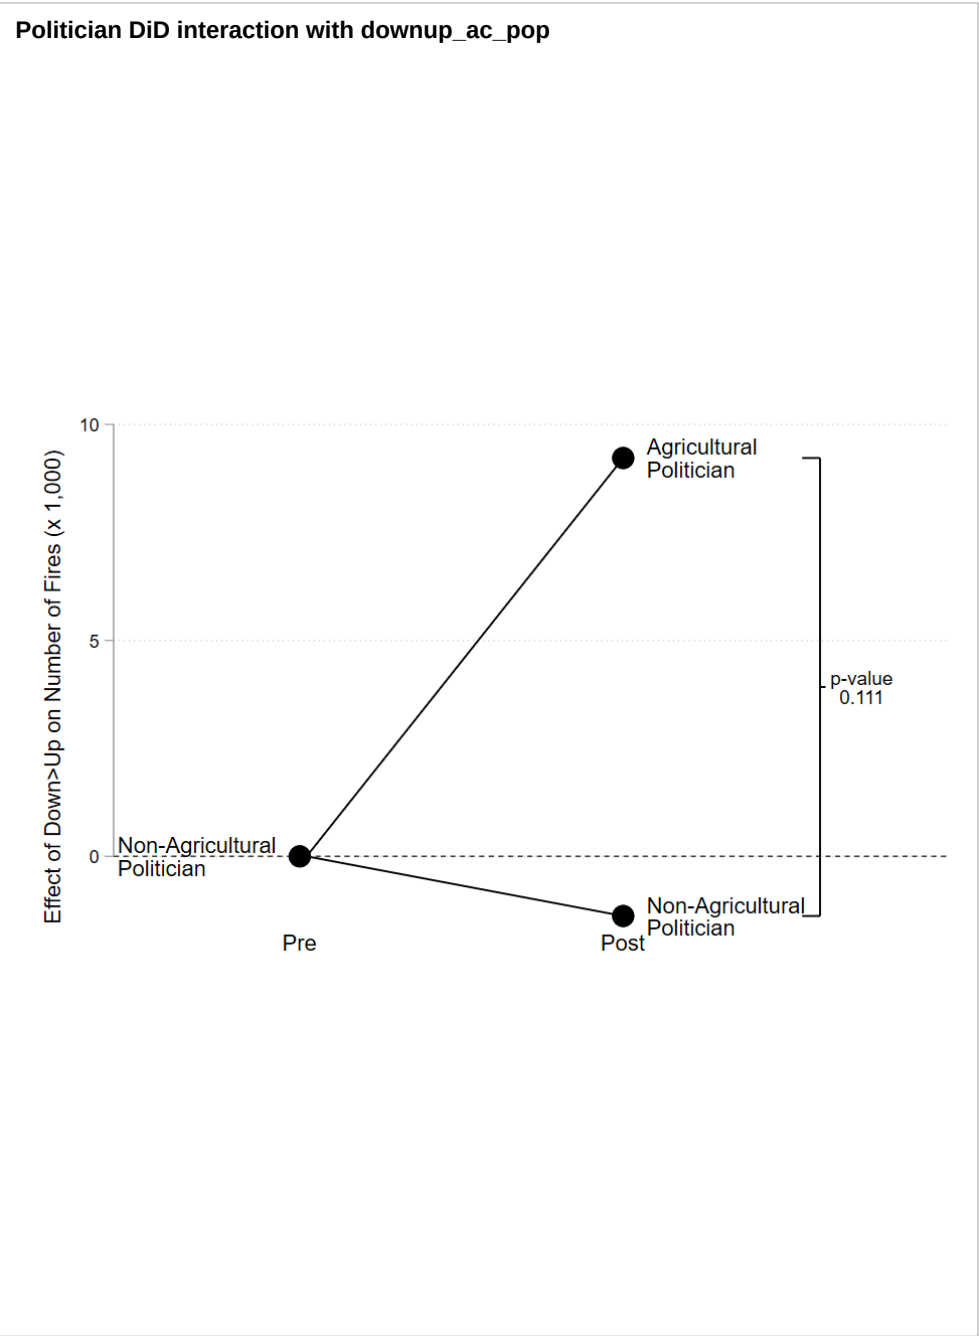

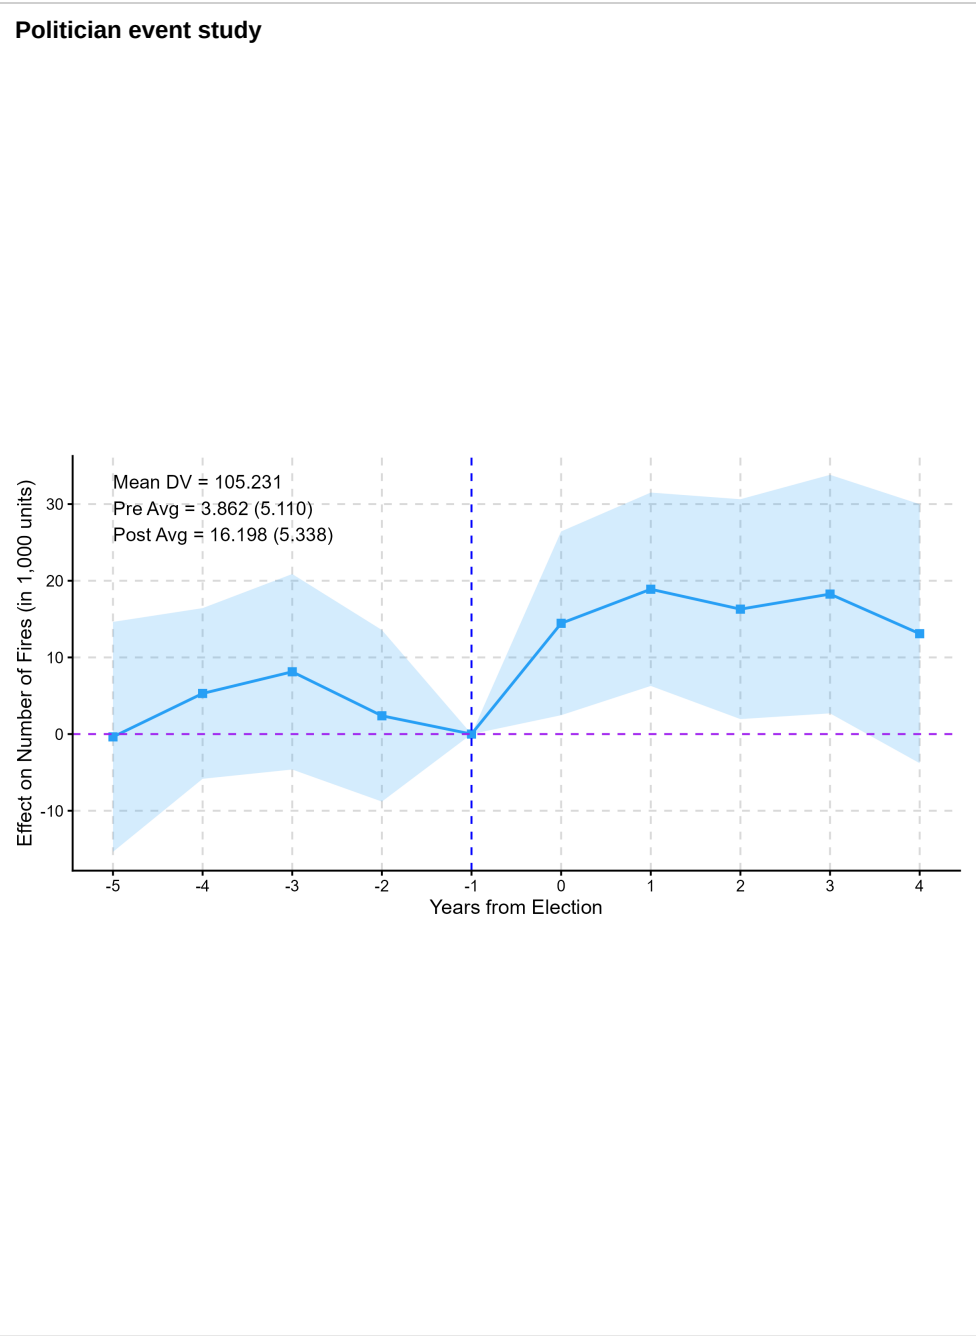

FE17: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

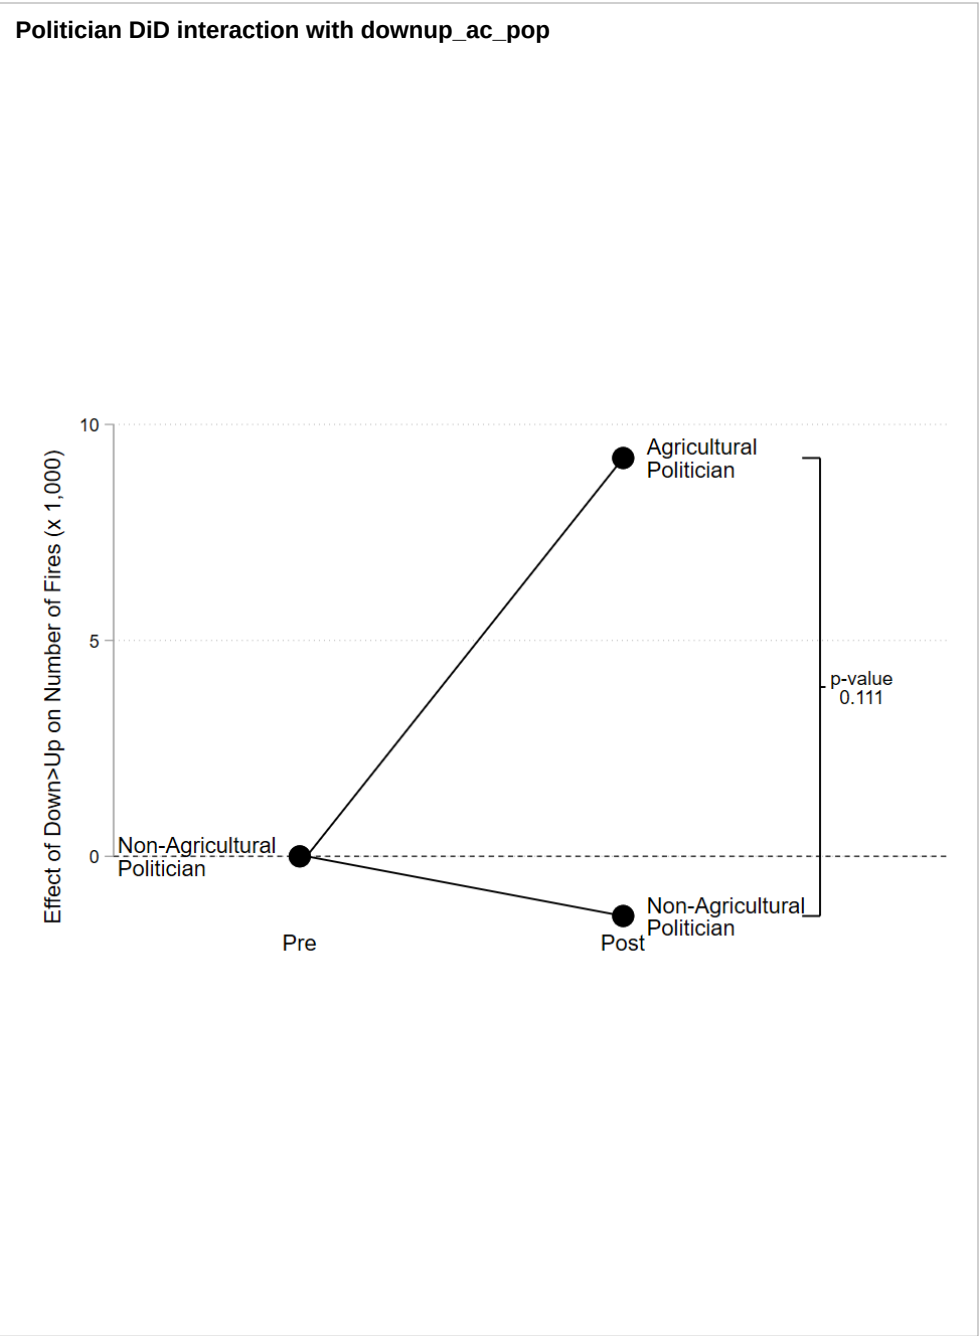

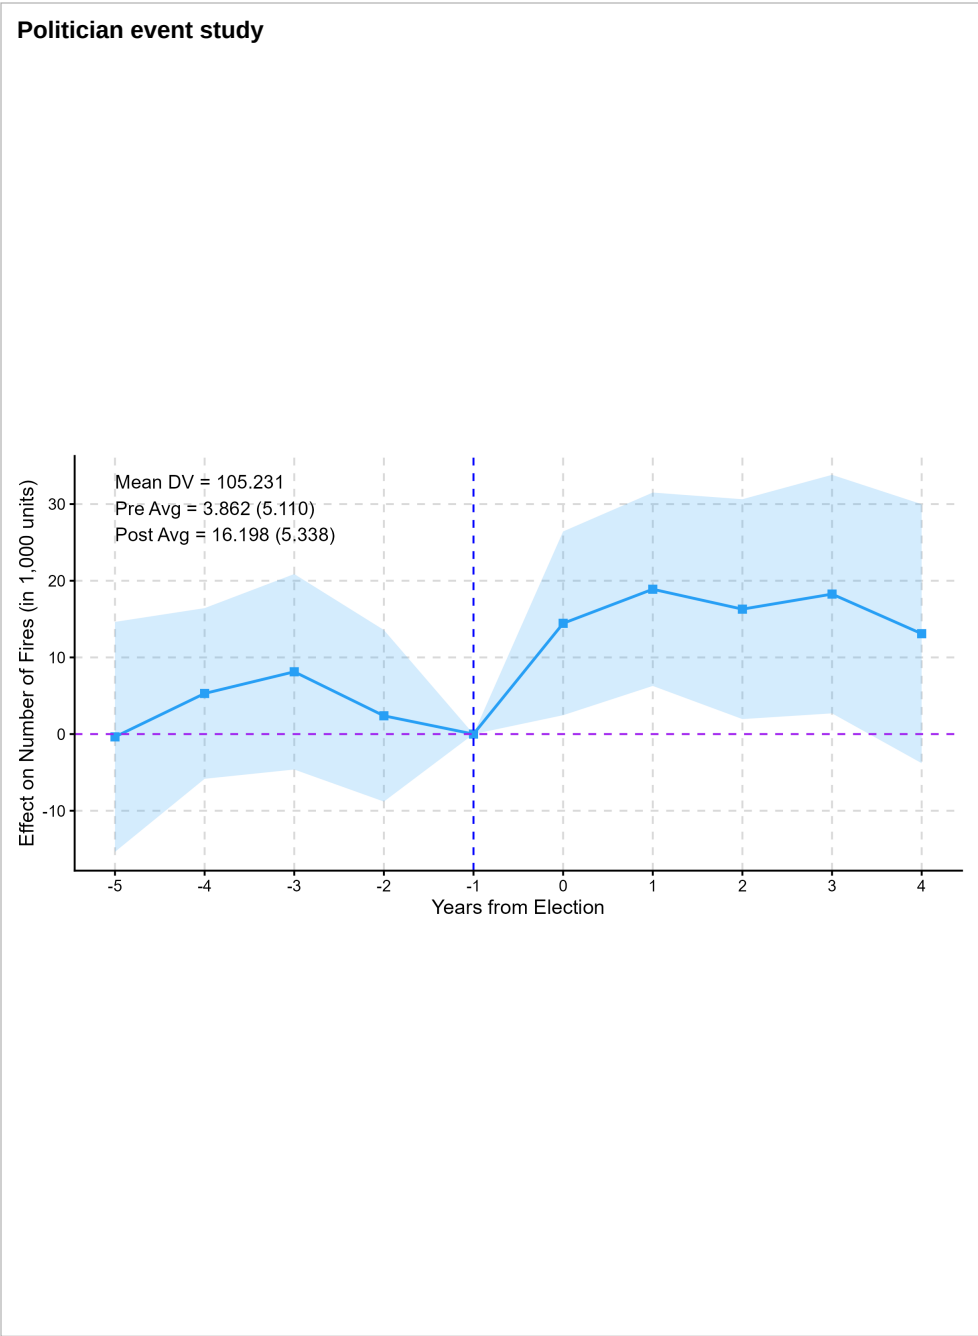

FE18: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

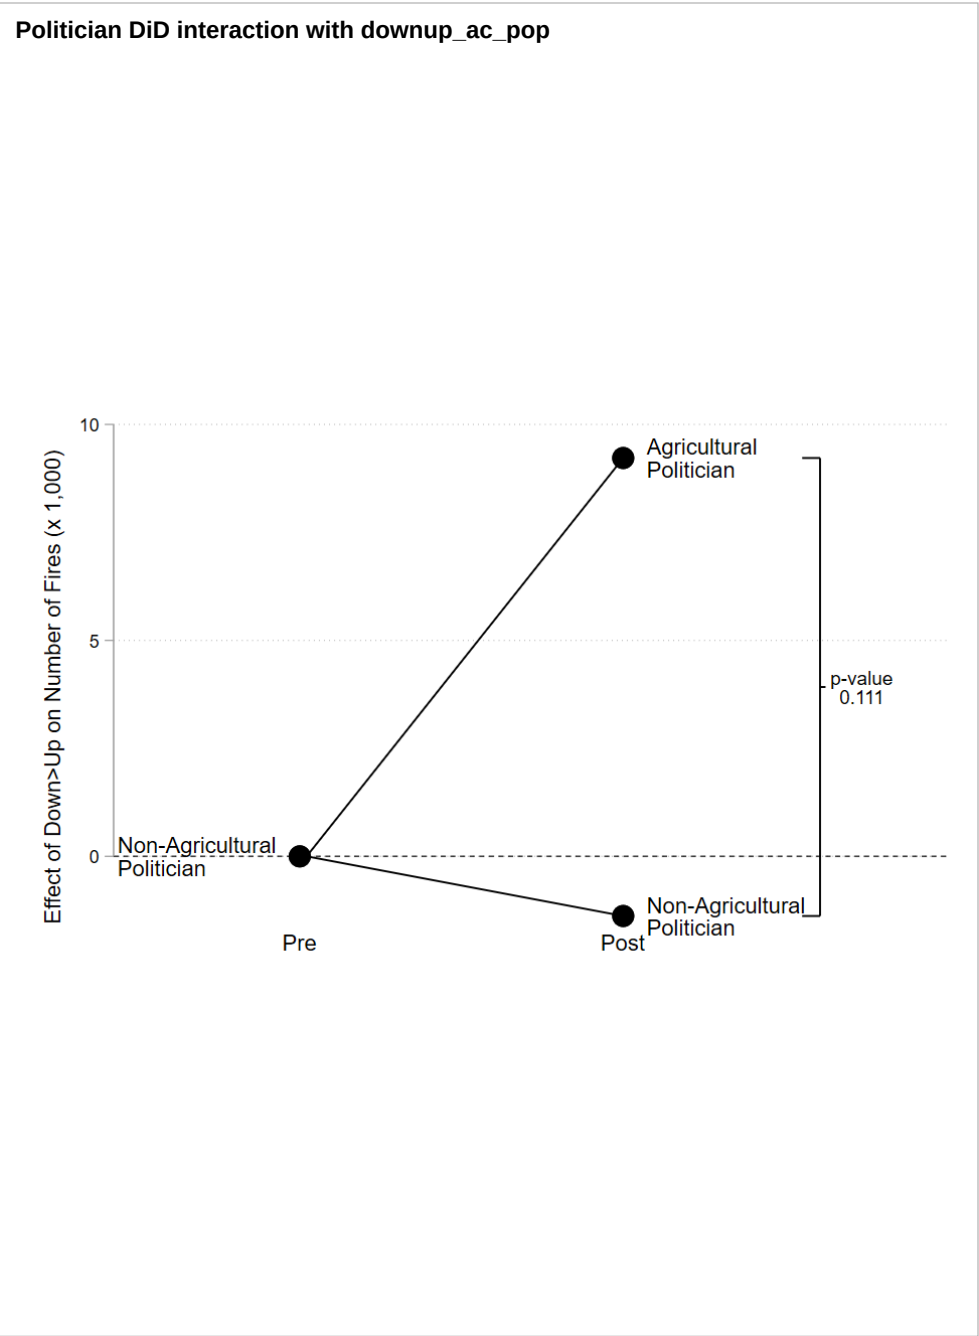

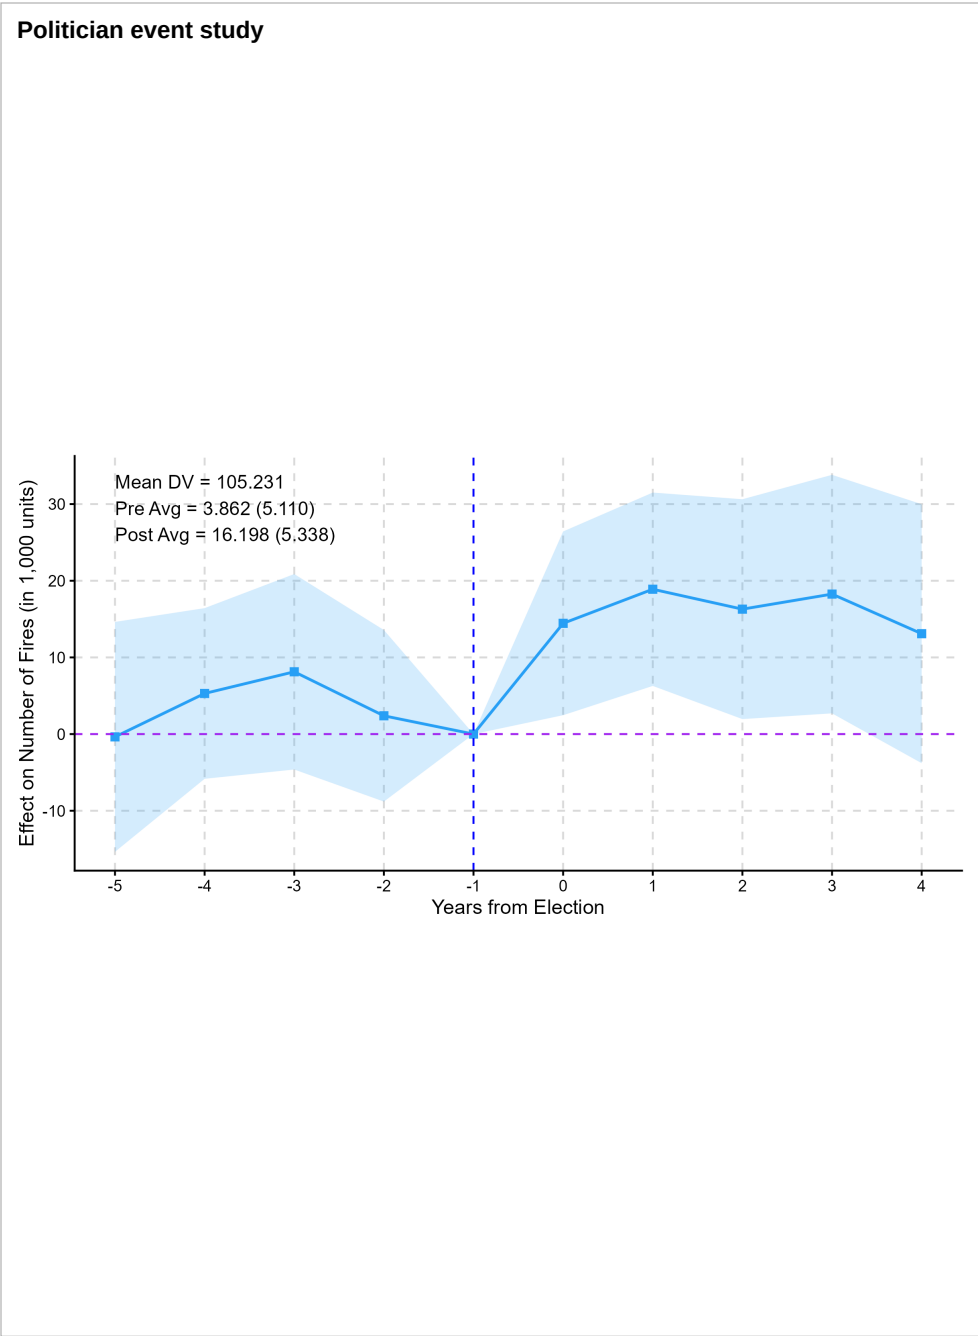

FE19: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

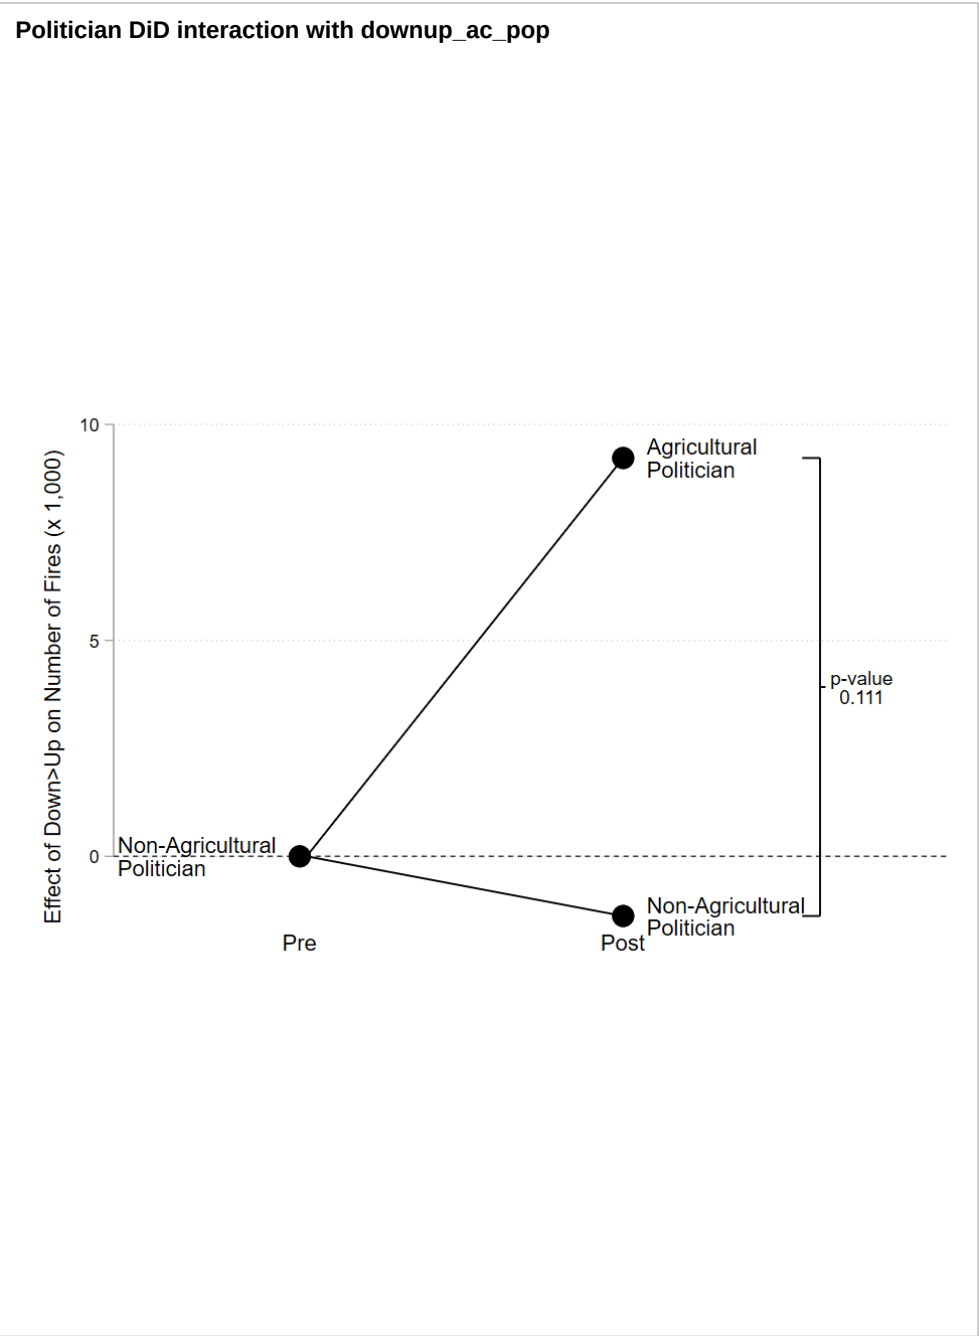

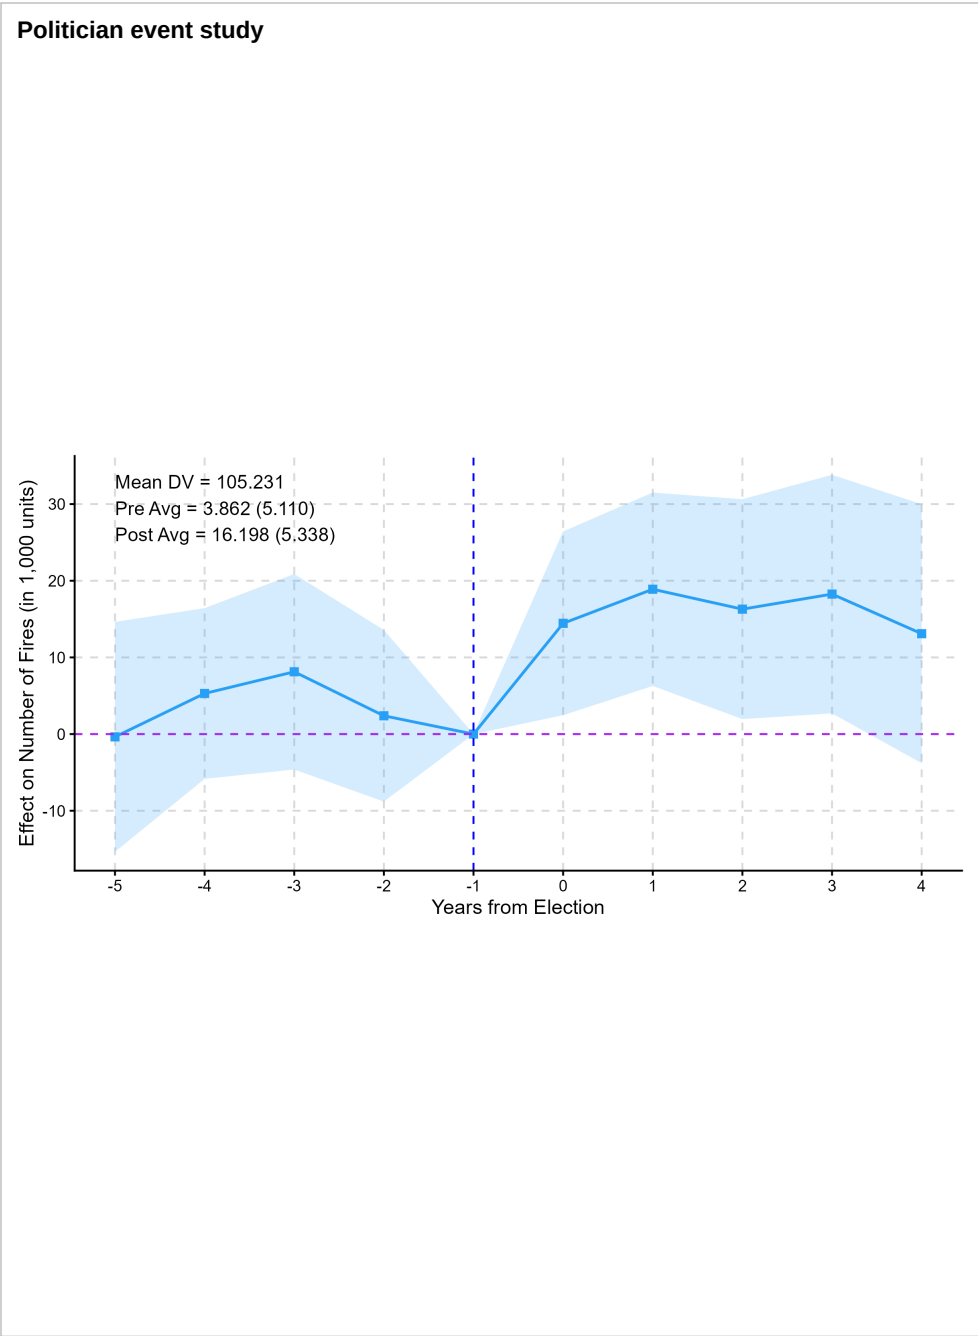

FE20: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; government year; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

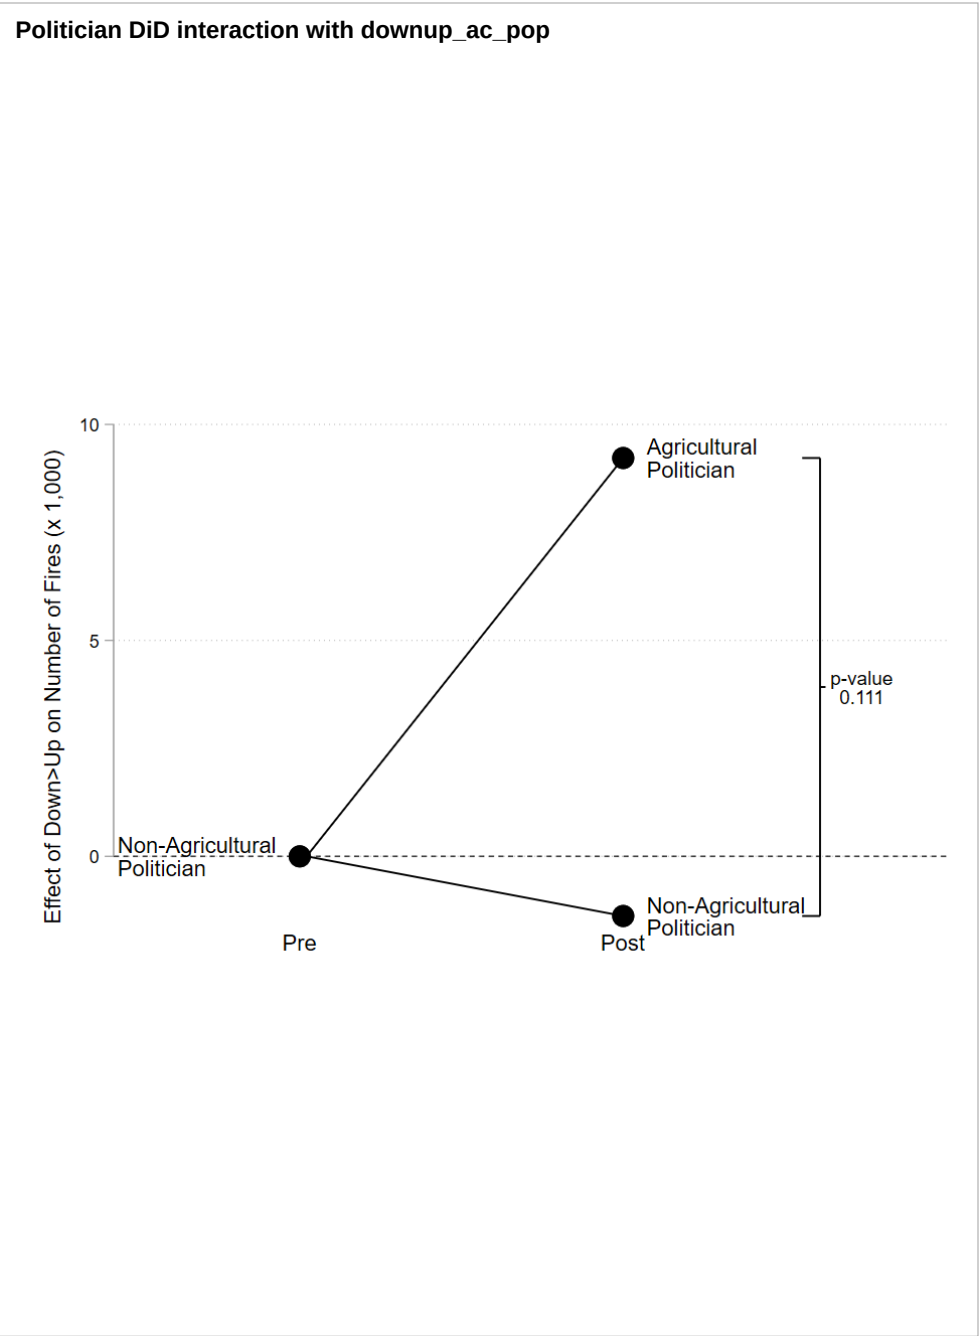

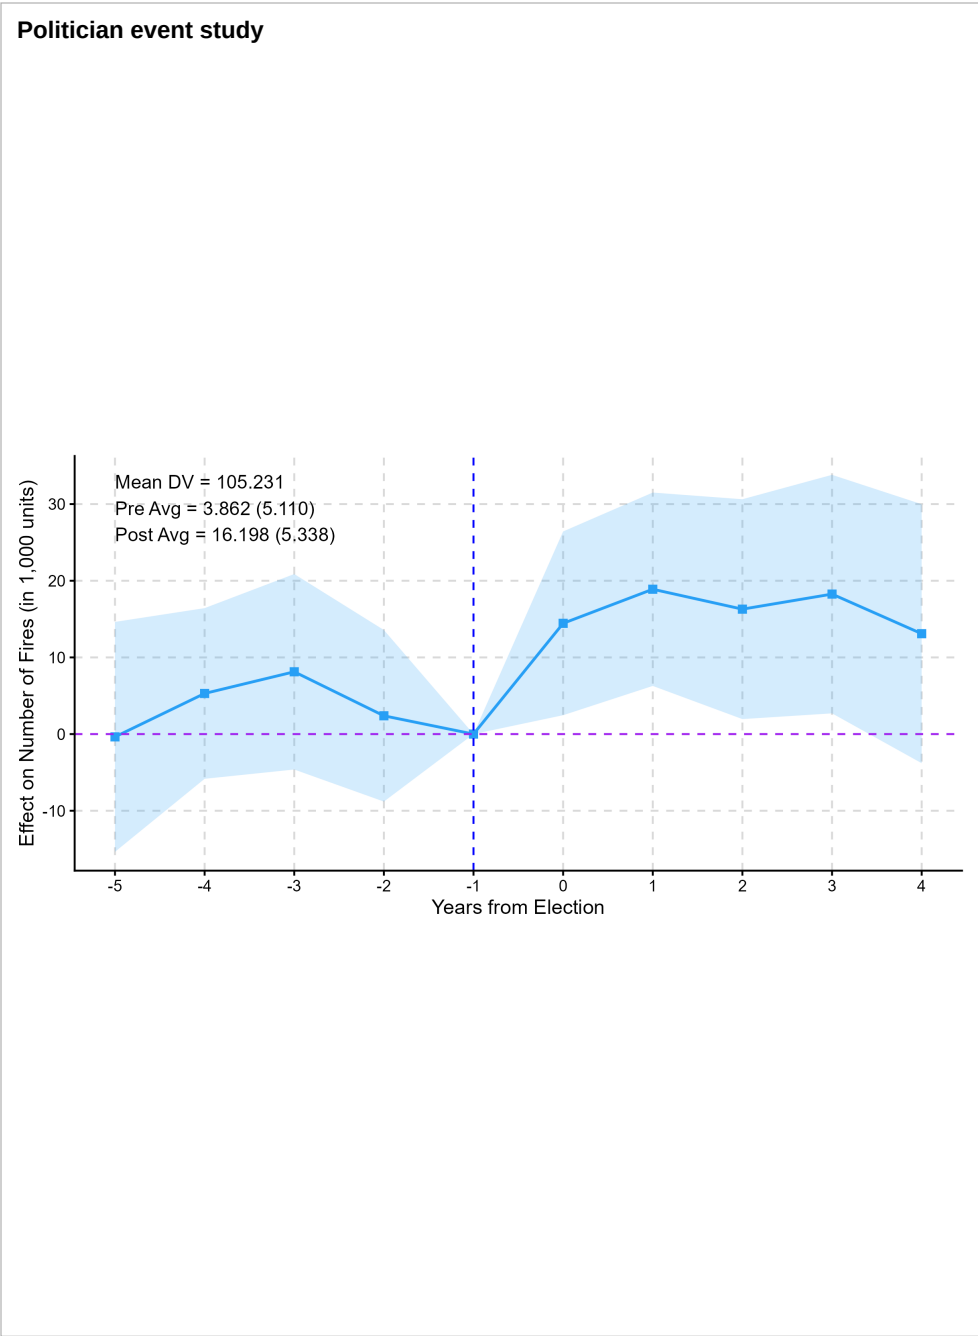

FE21: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; government year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

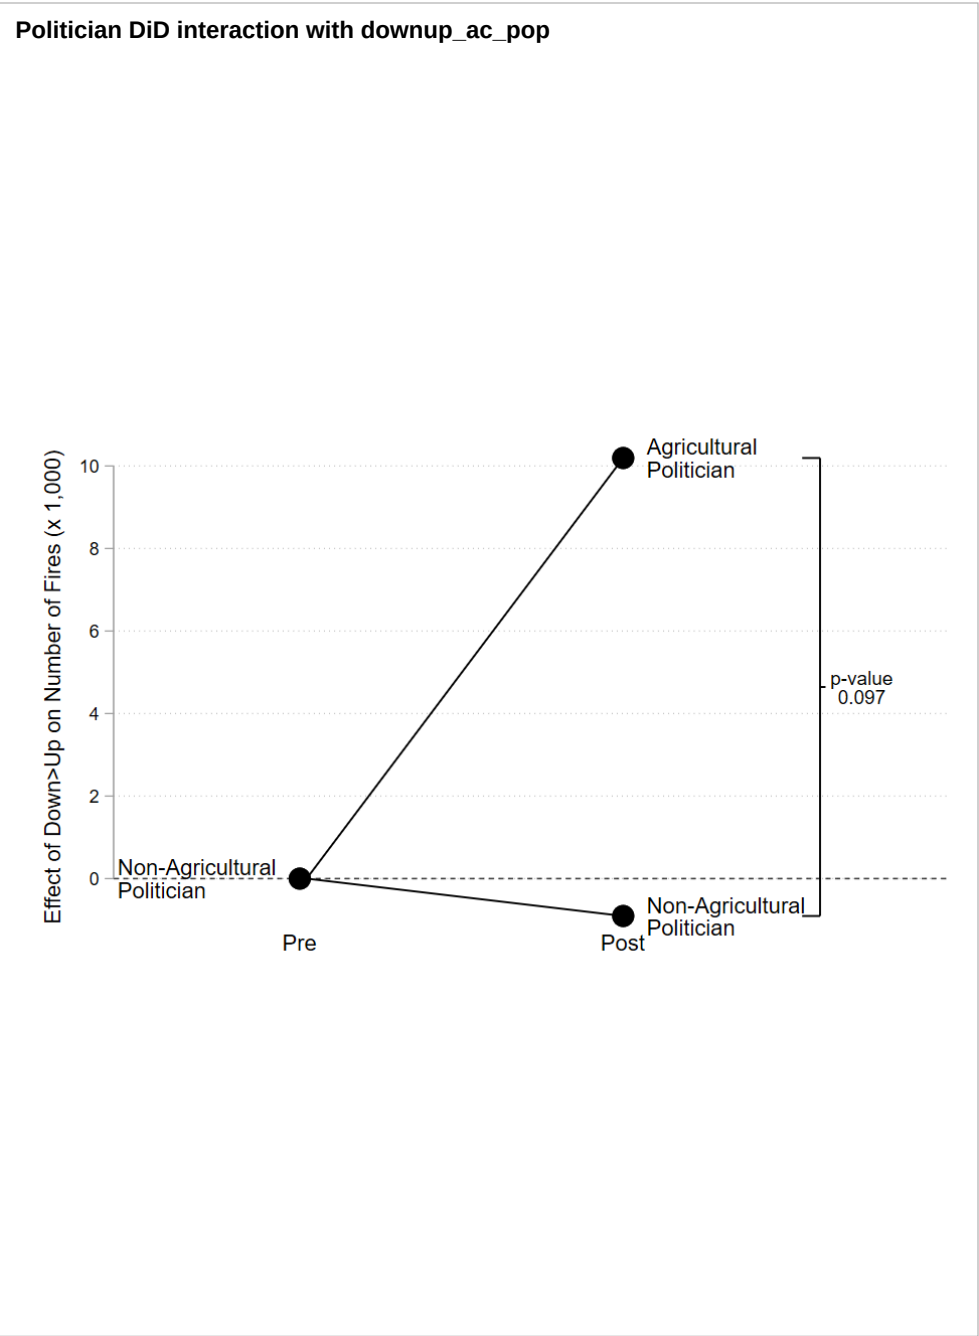

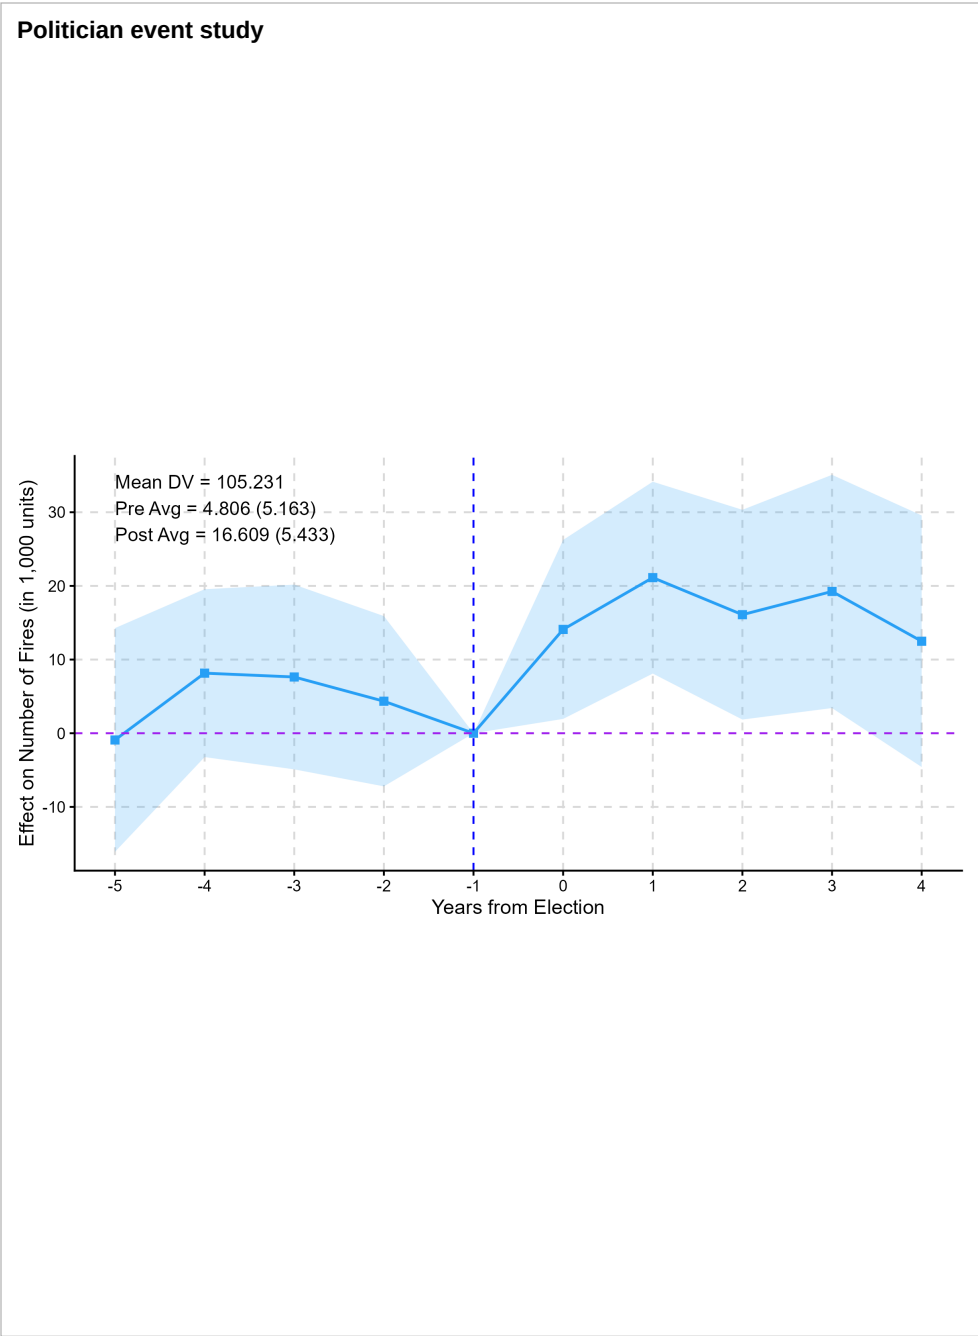

FE22: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

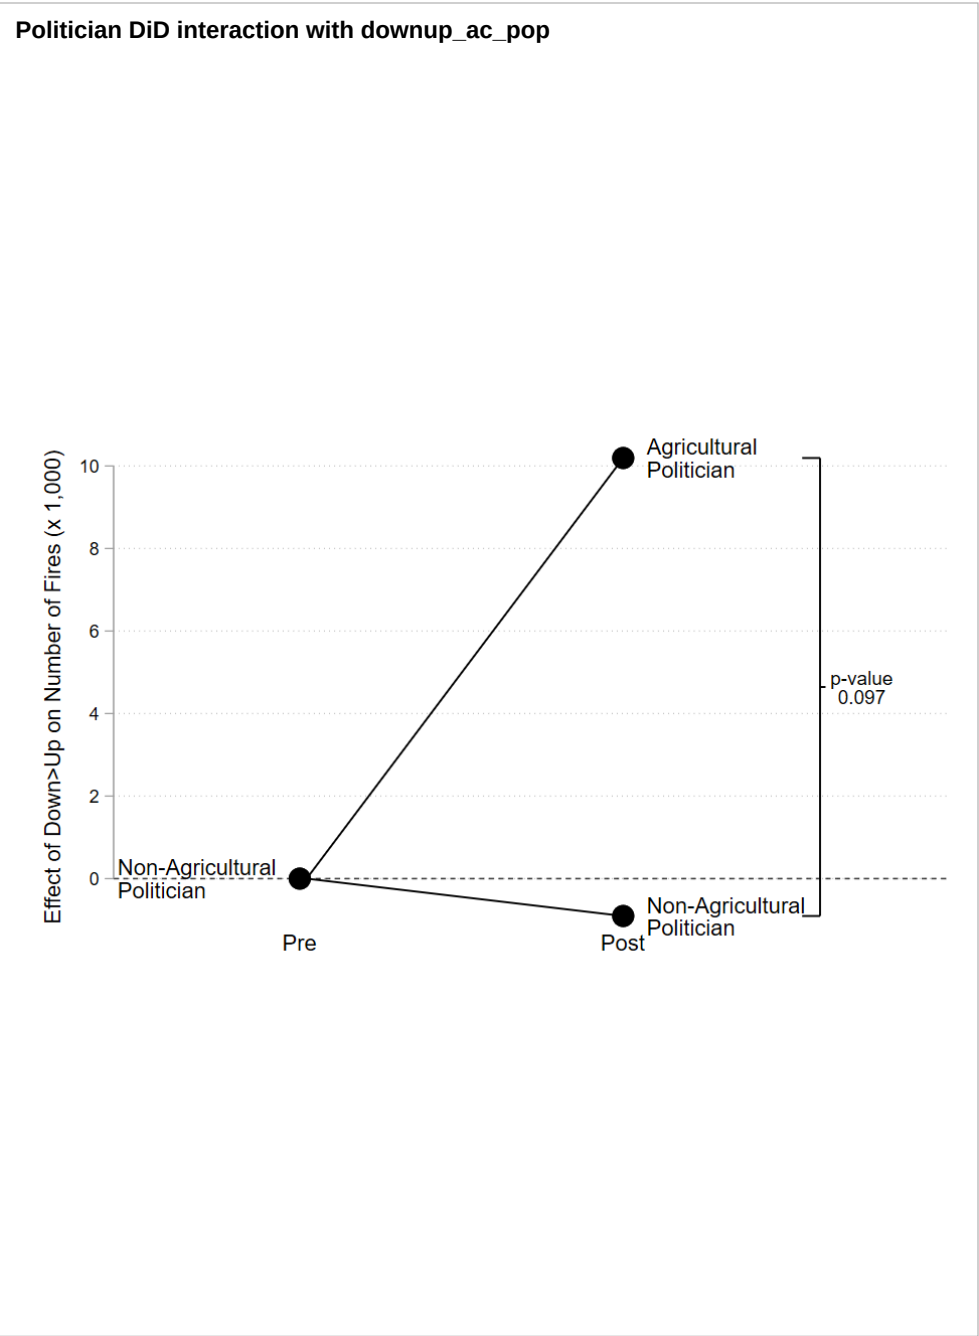

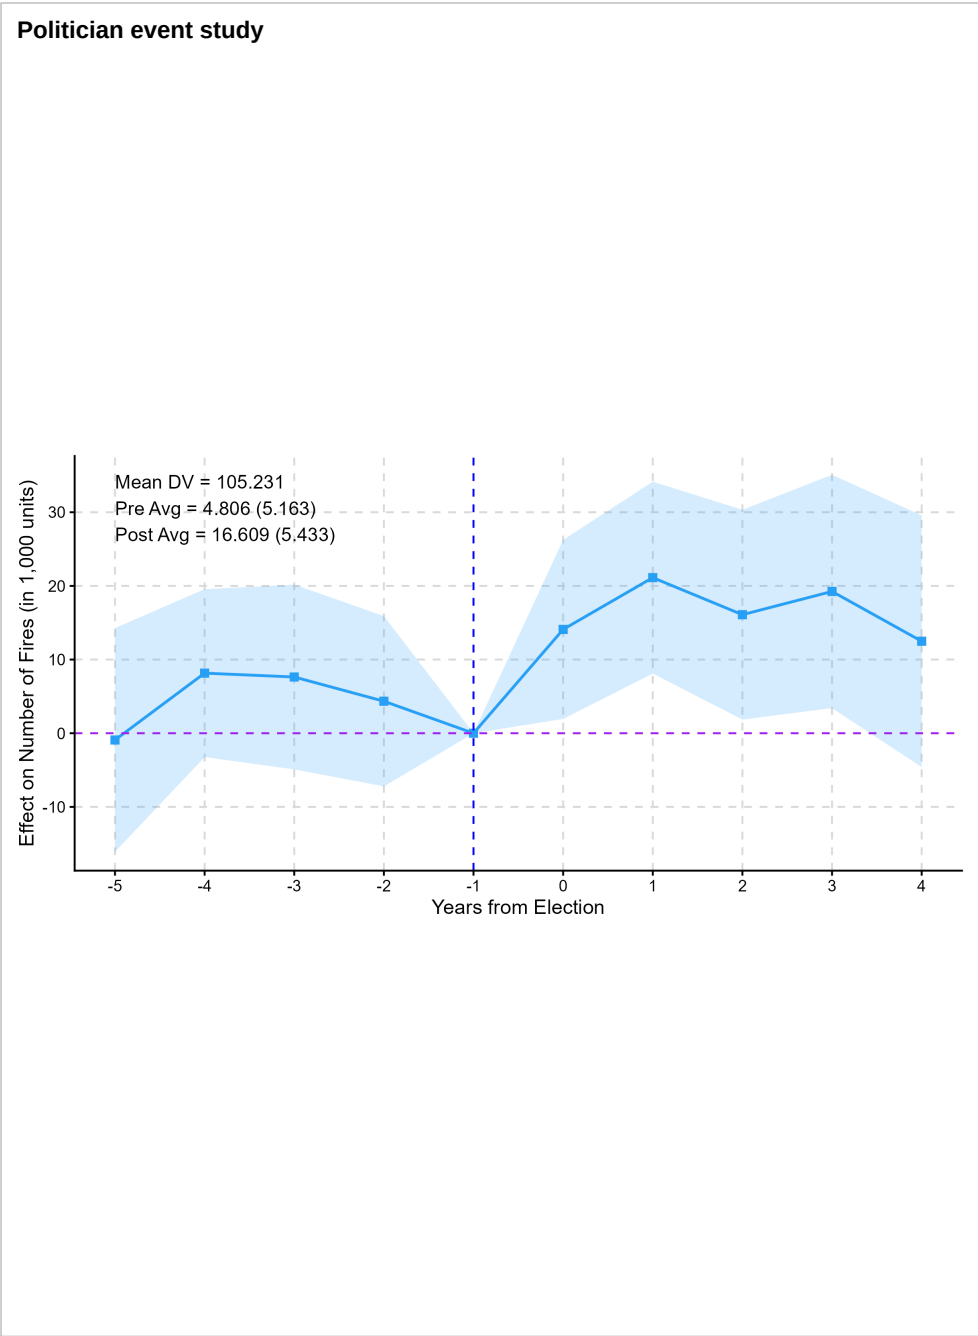

FE23: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

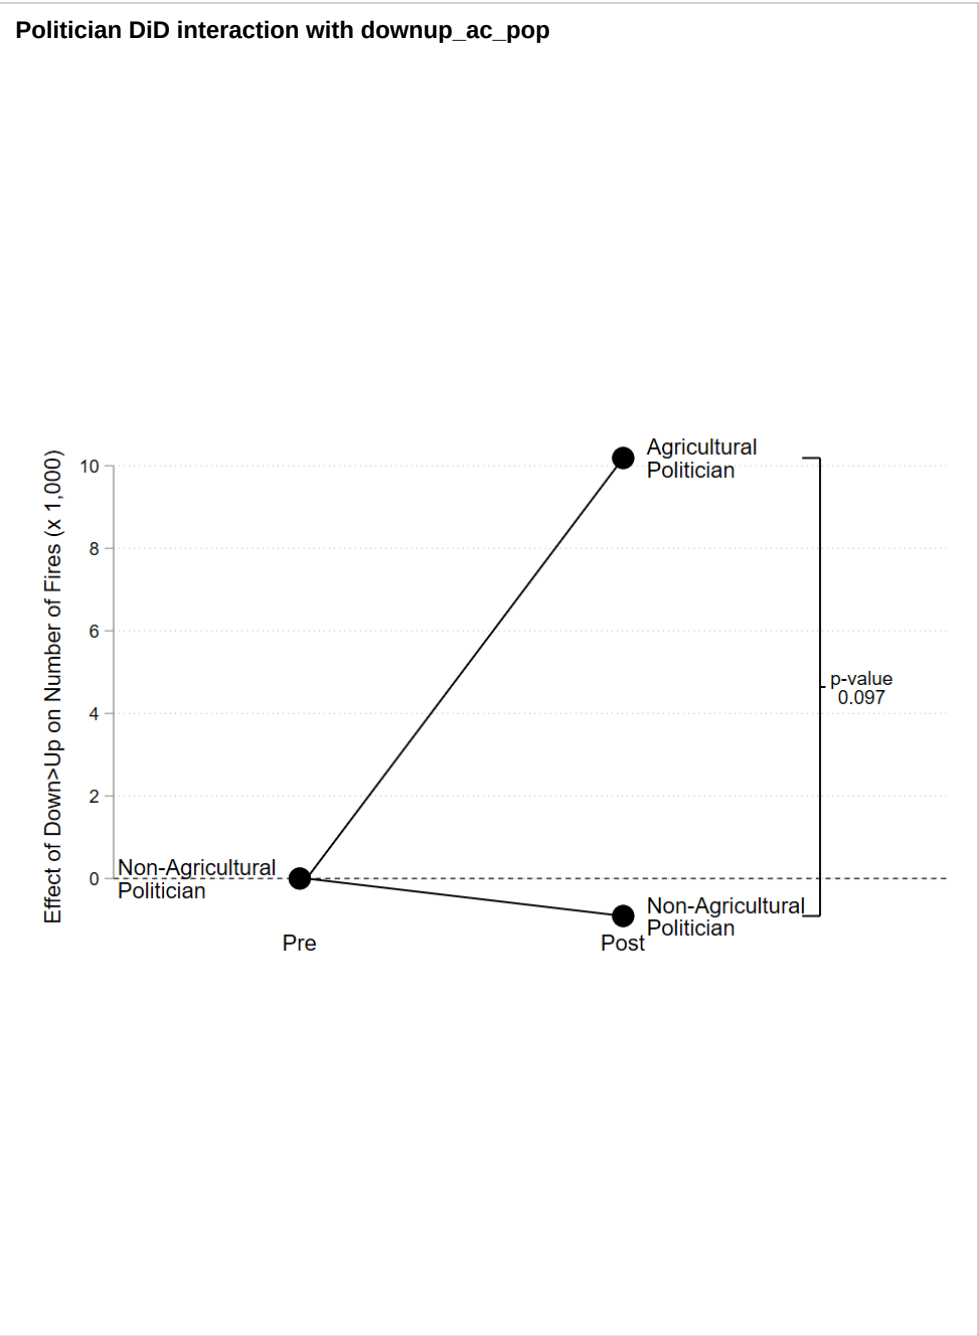

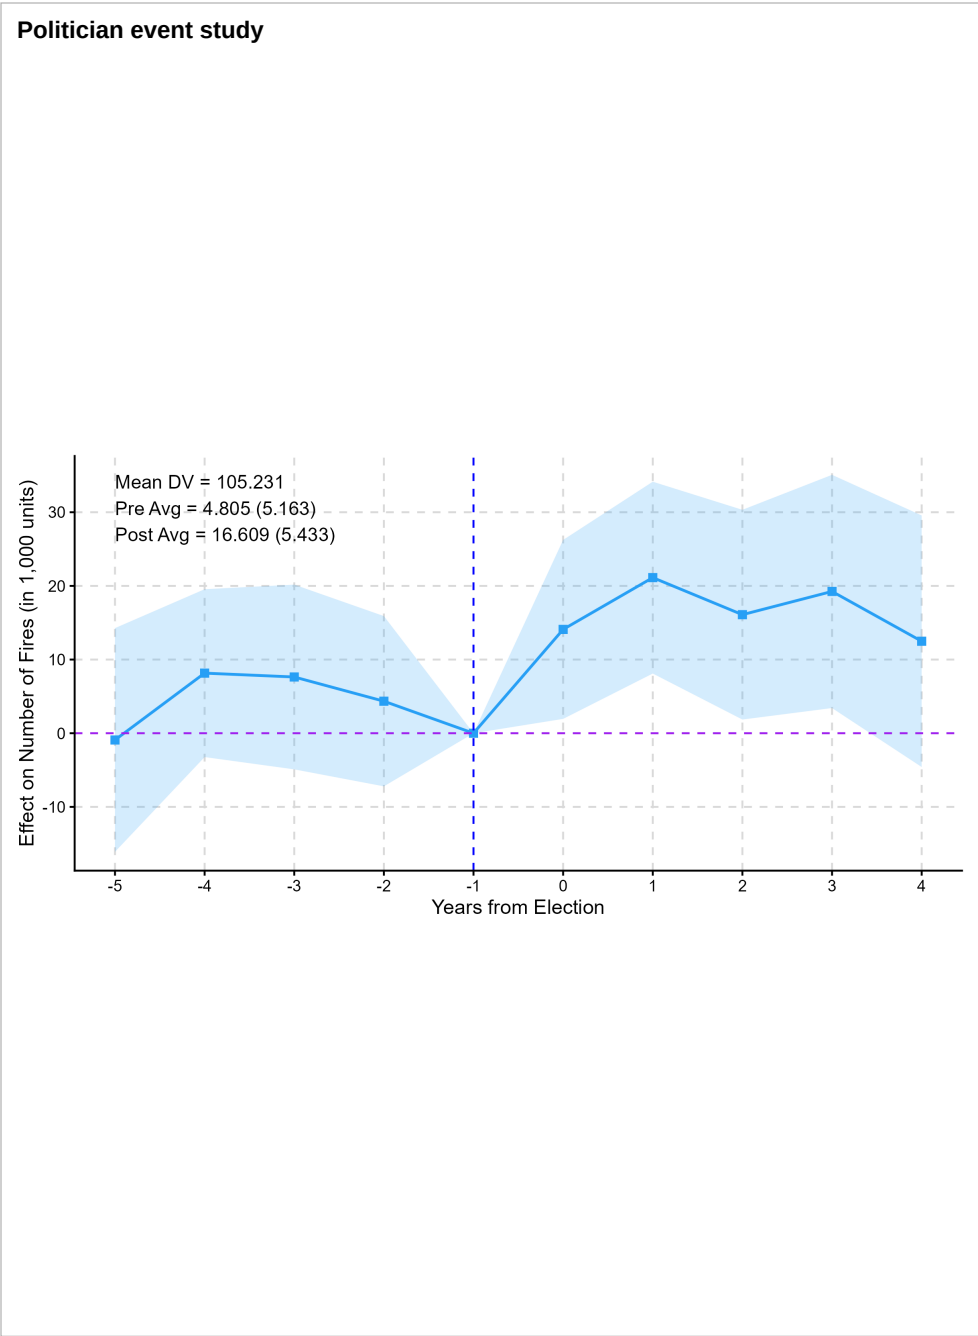

FE24: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

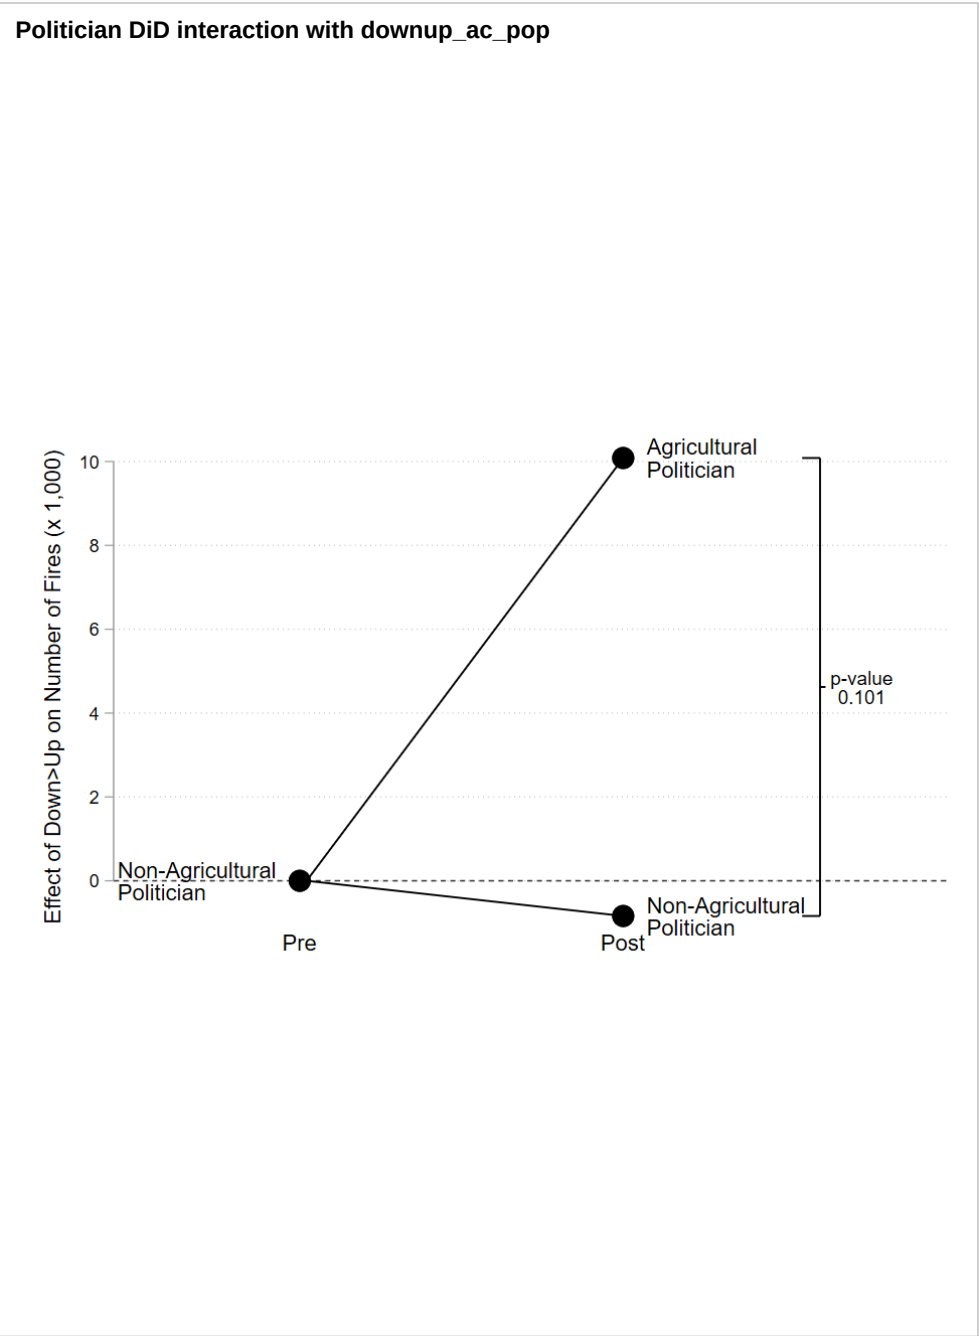

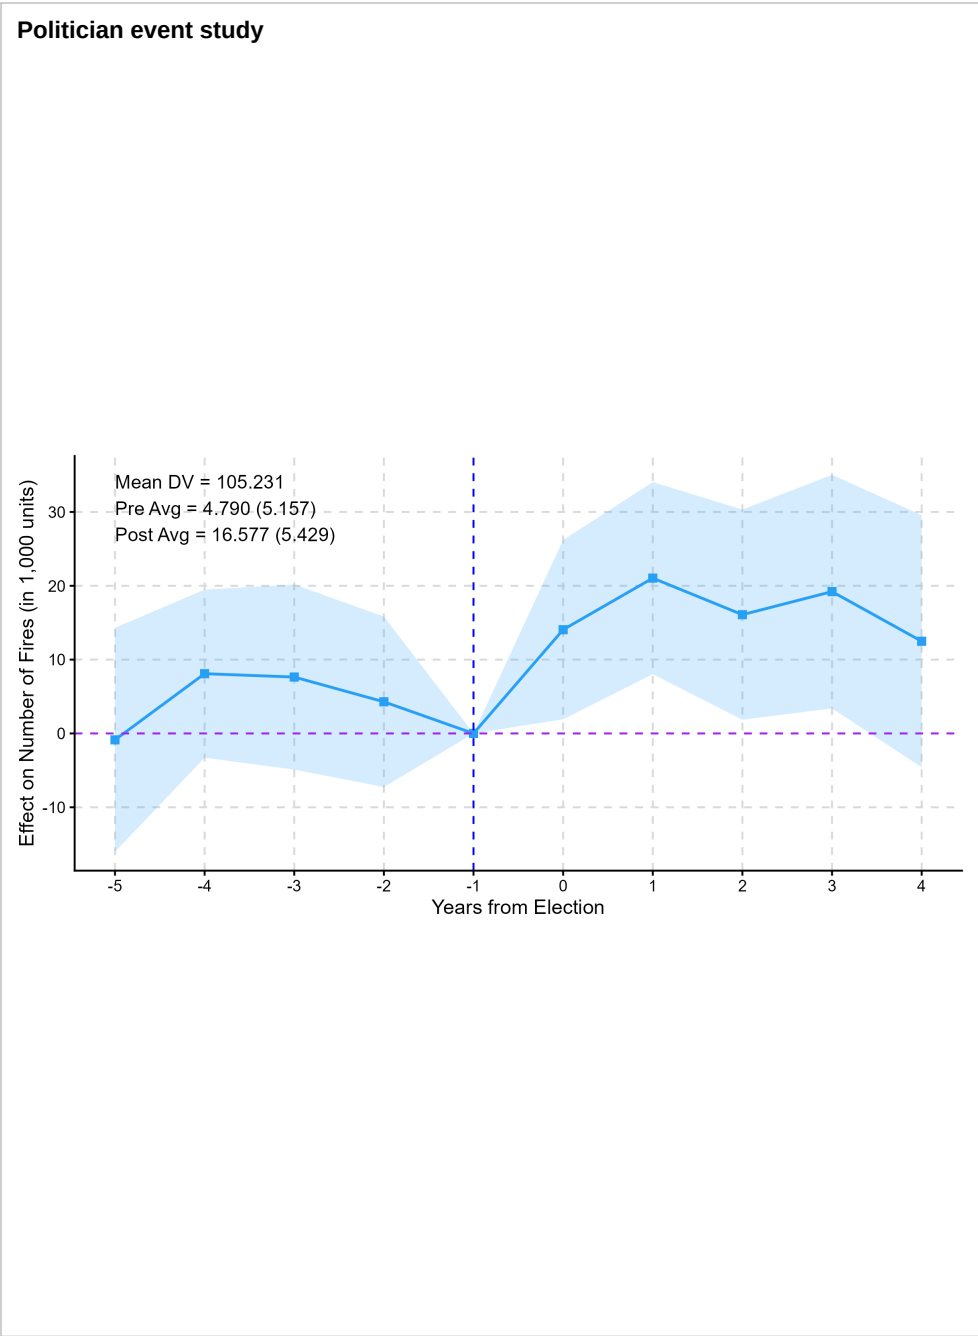

FE25: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

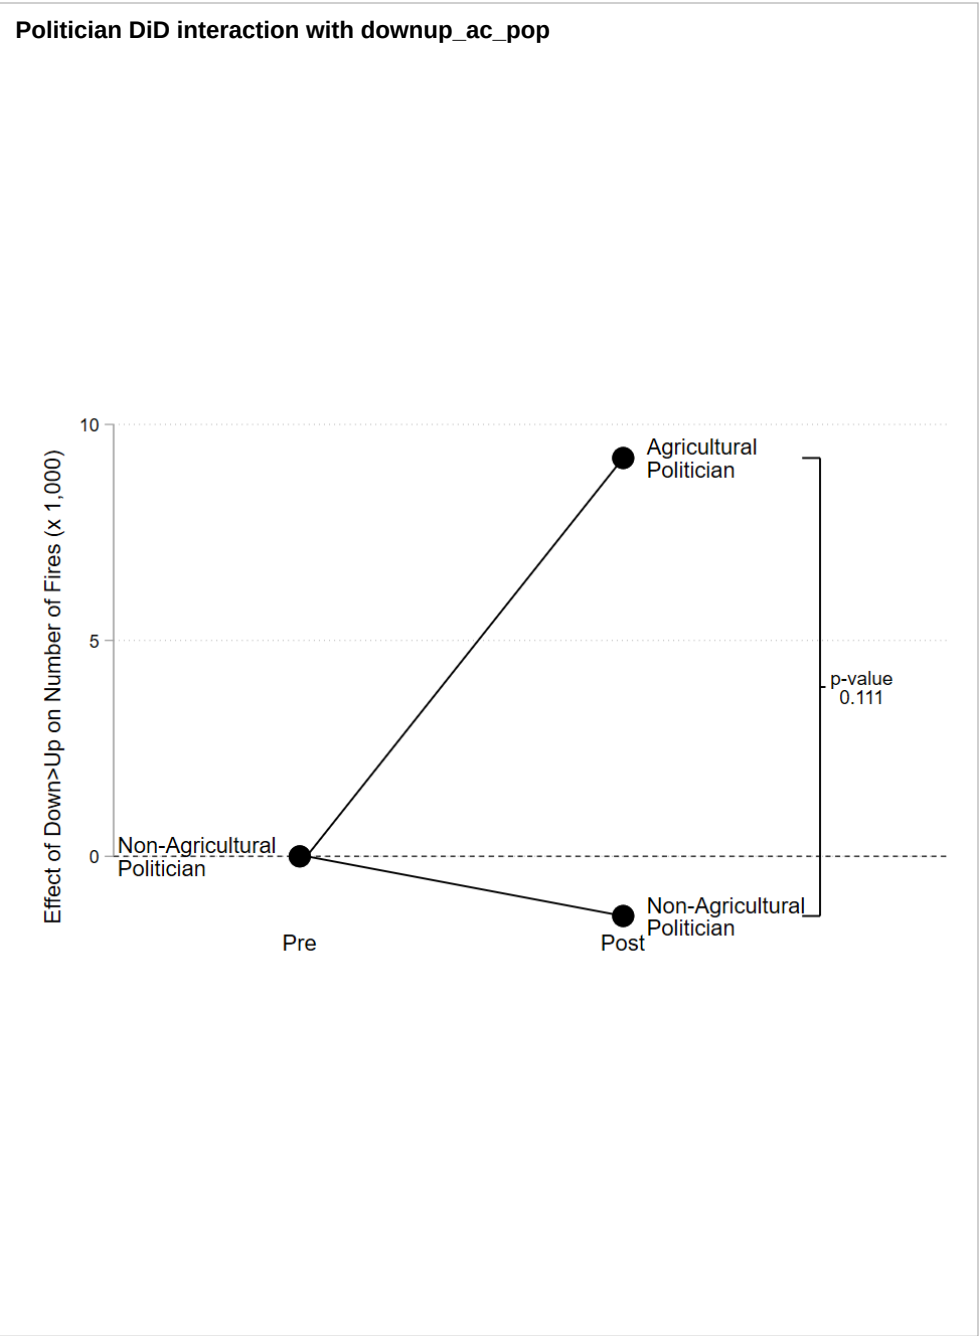

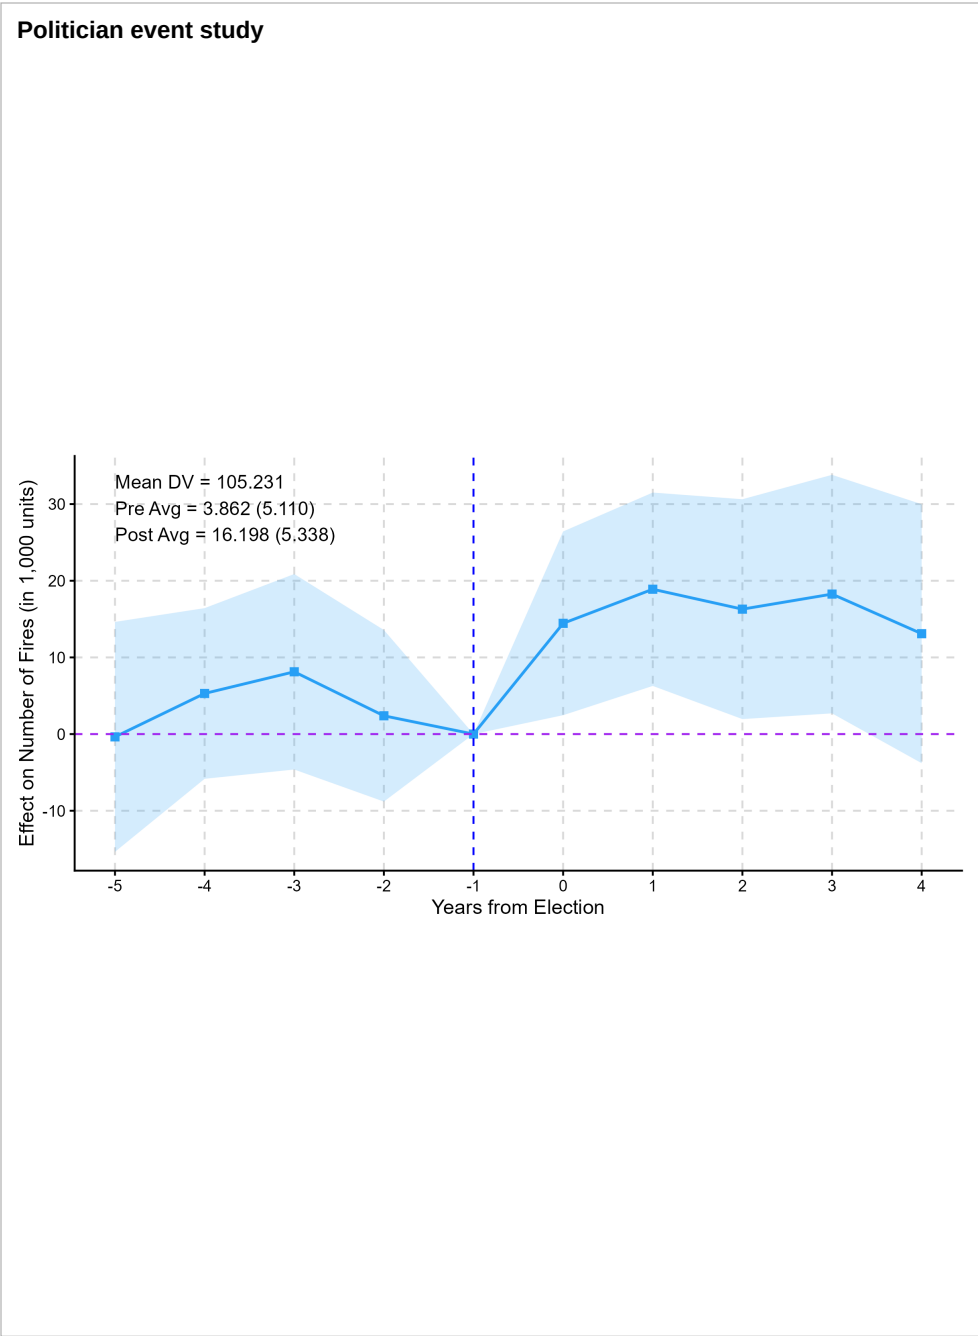

FE26: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; government year; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

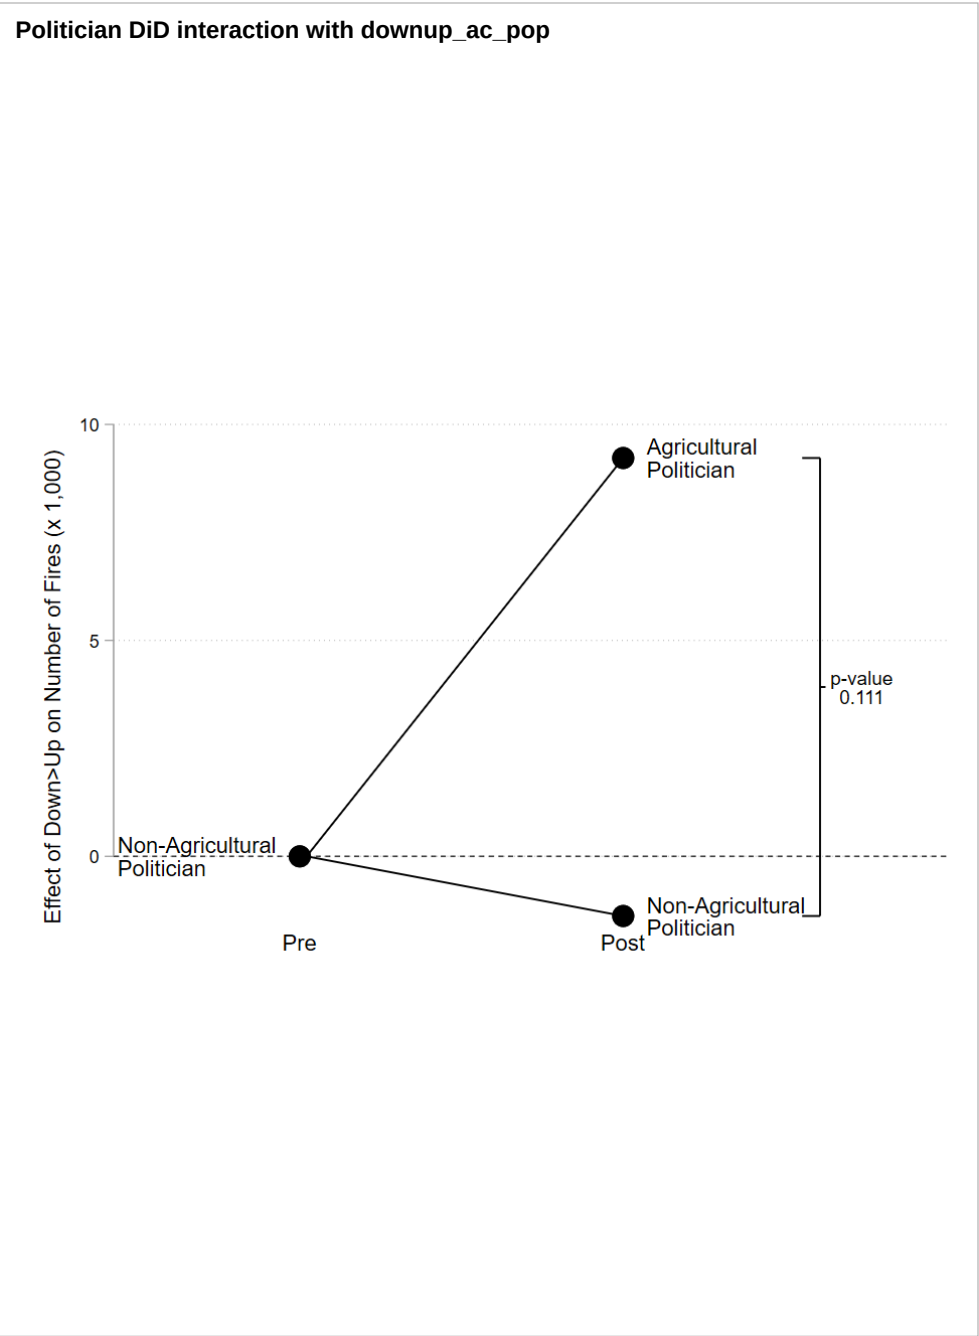

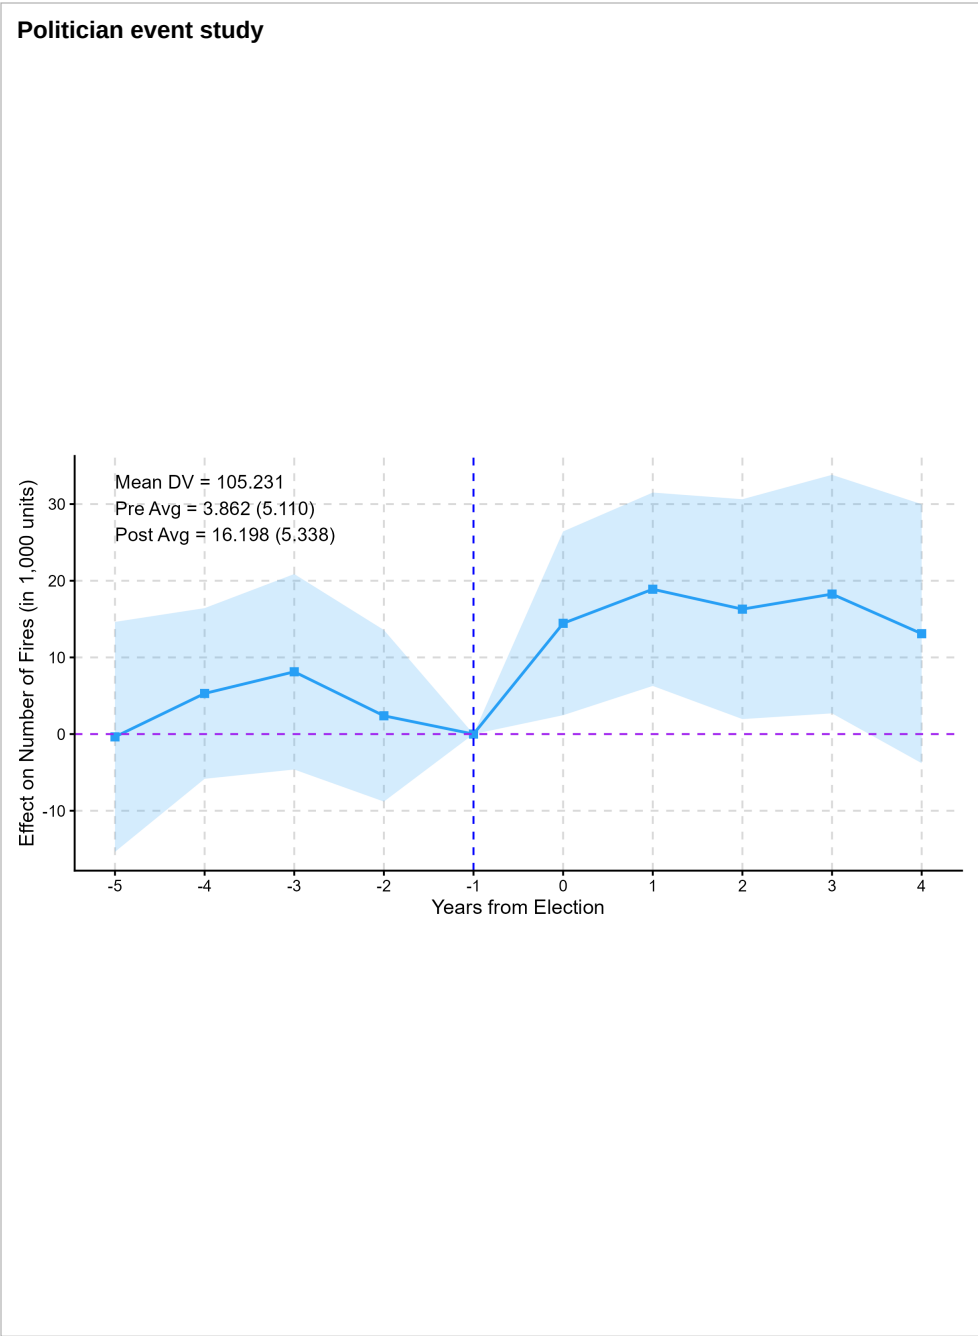

FE27: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

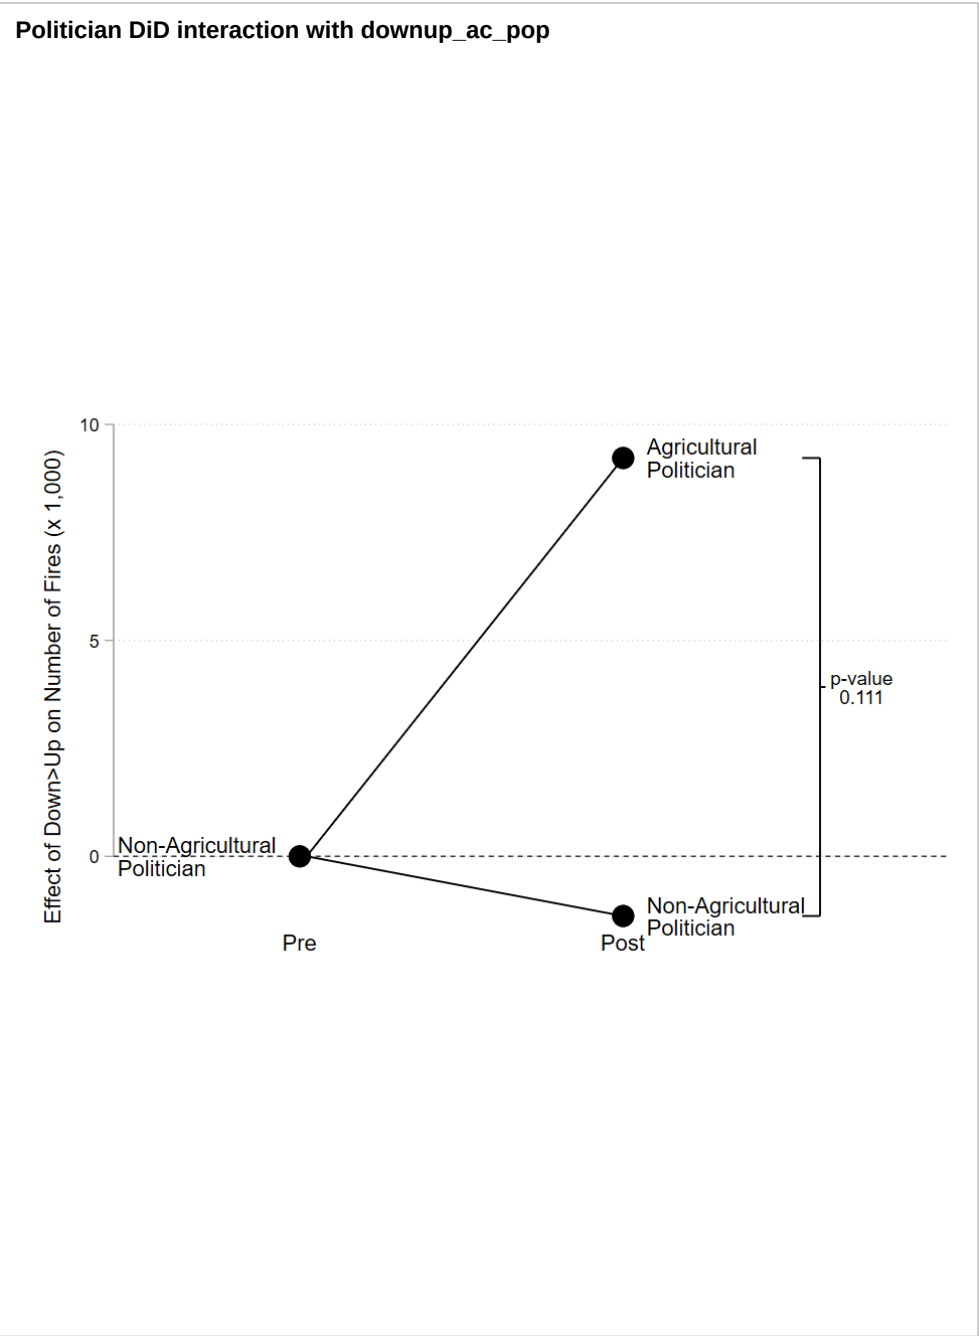

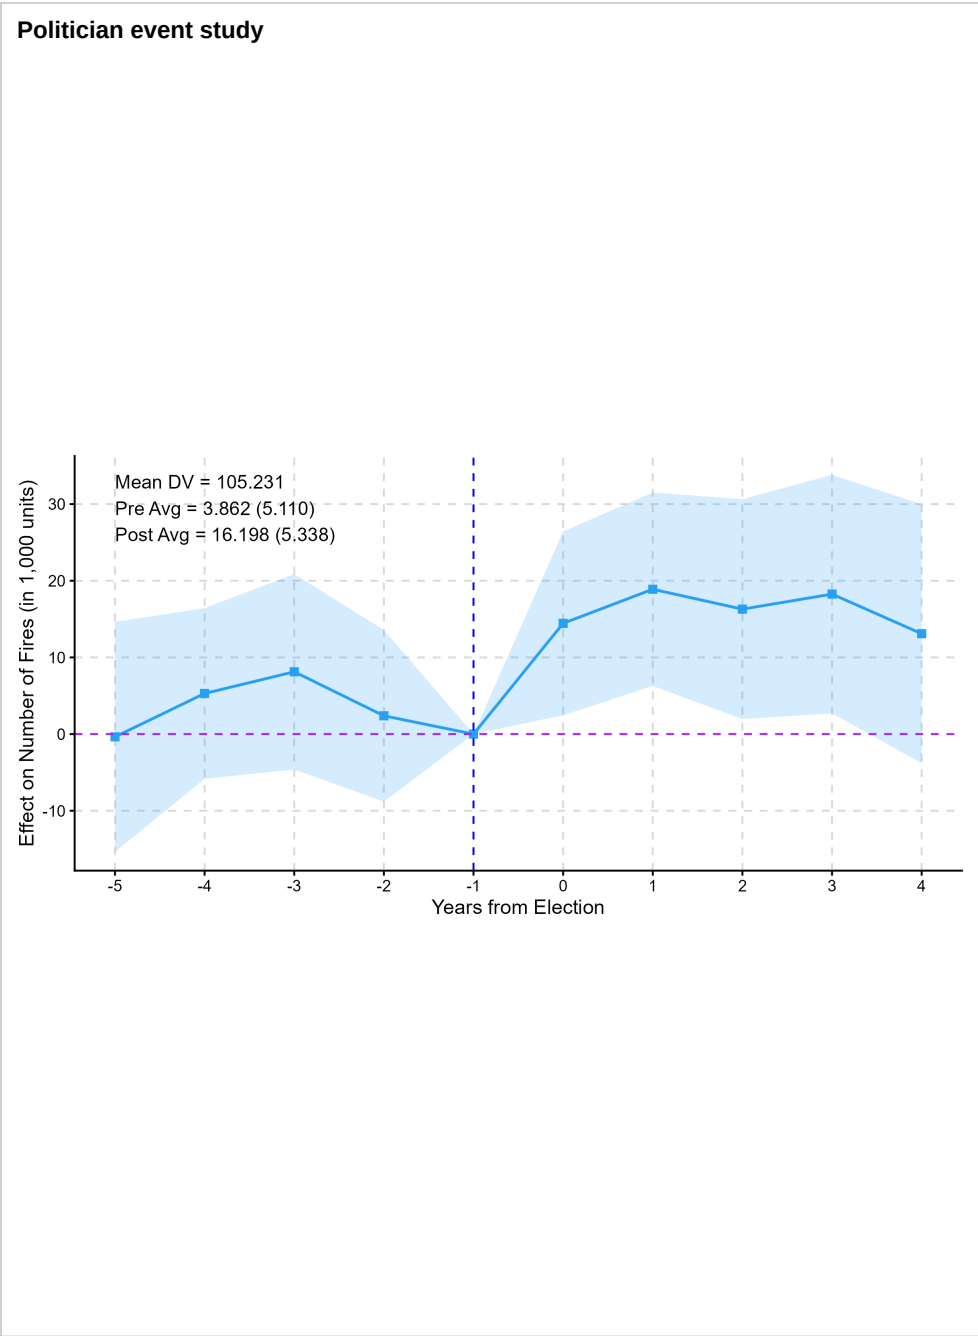

FE28: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

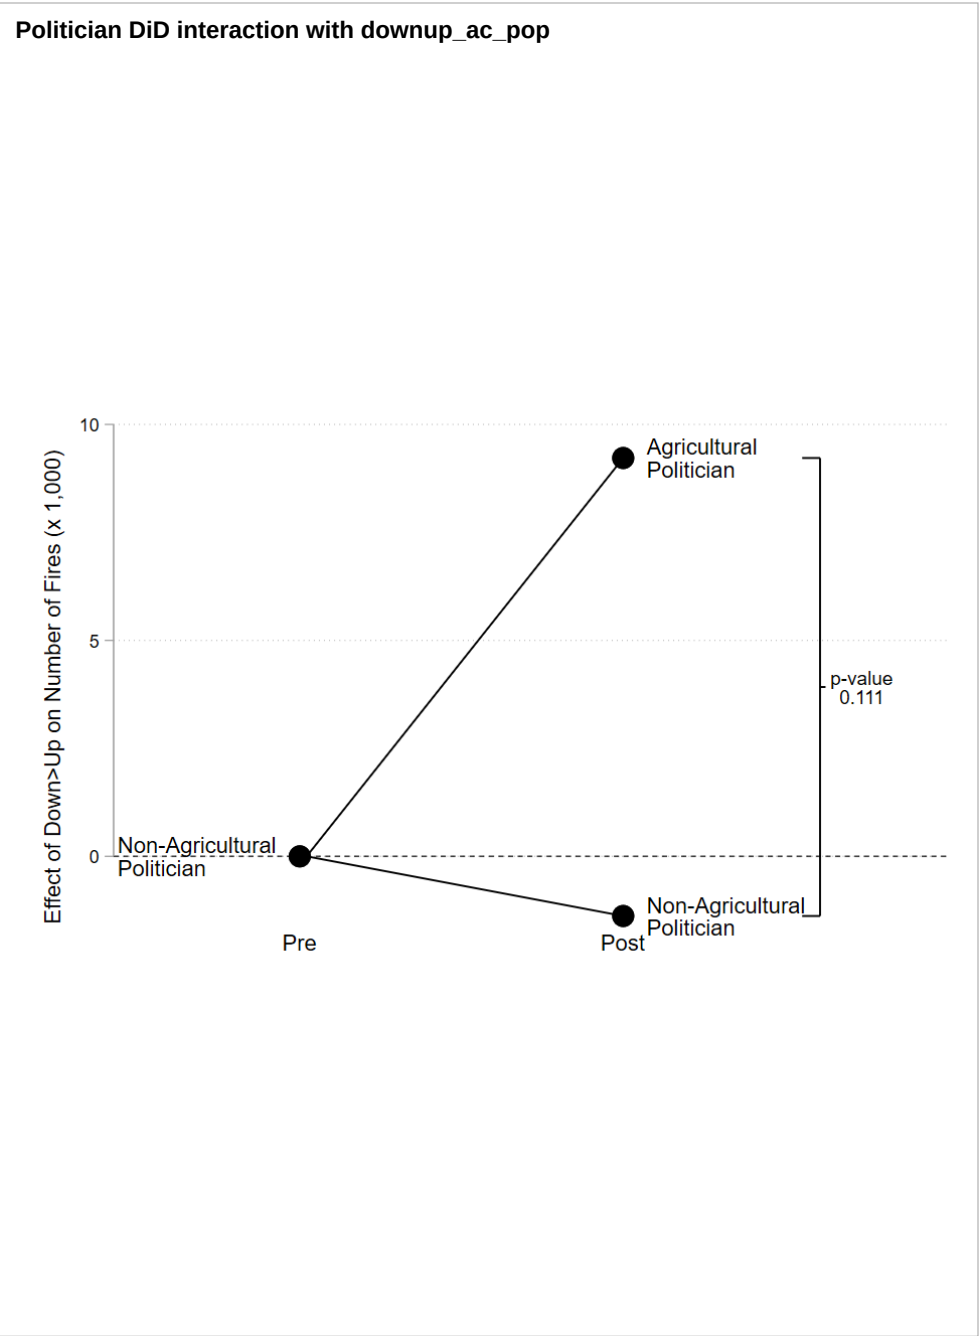

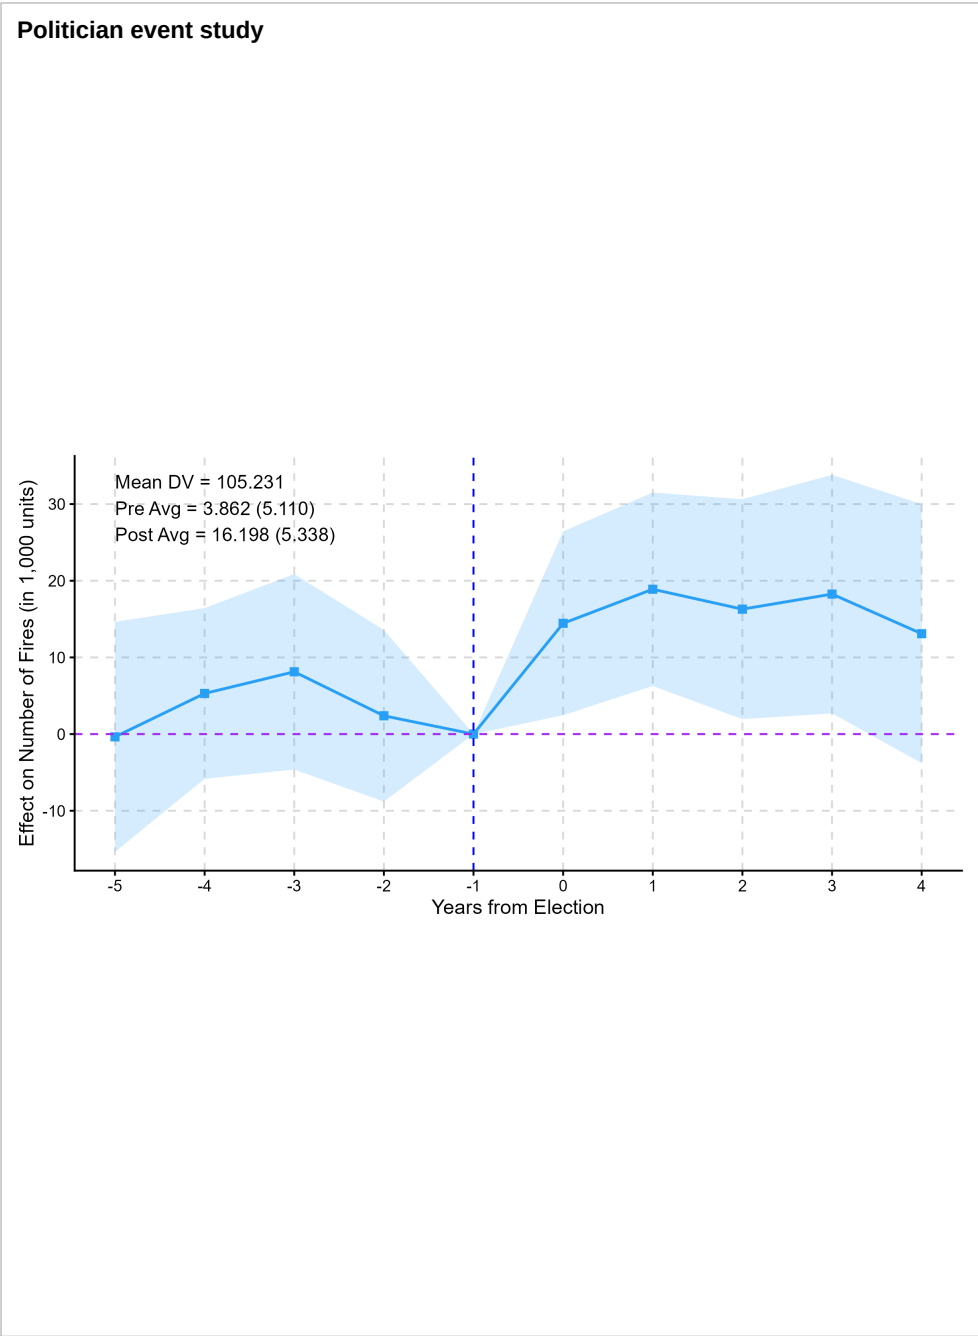

FE29: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

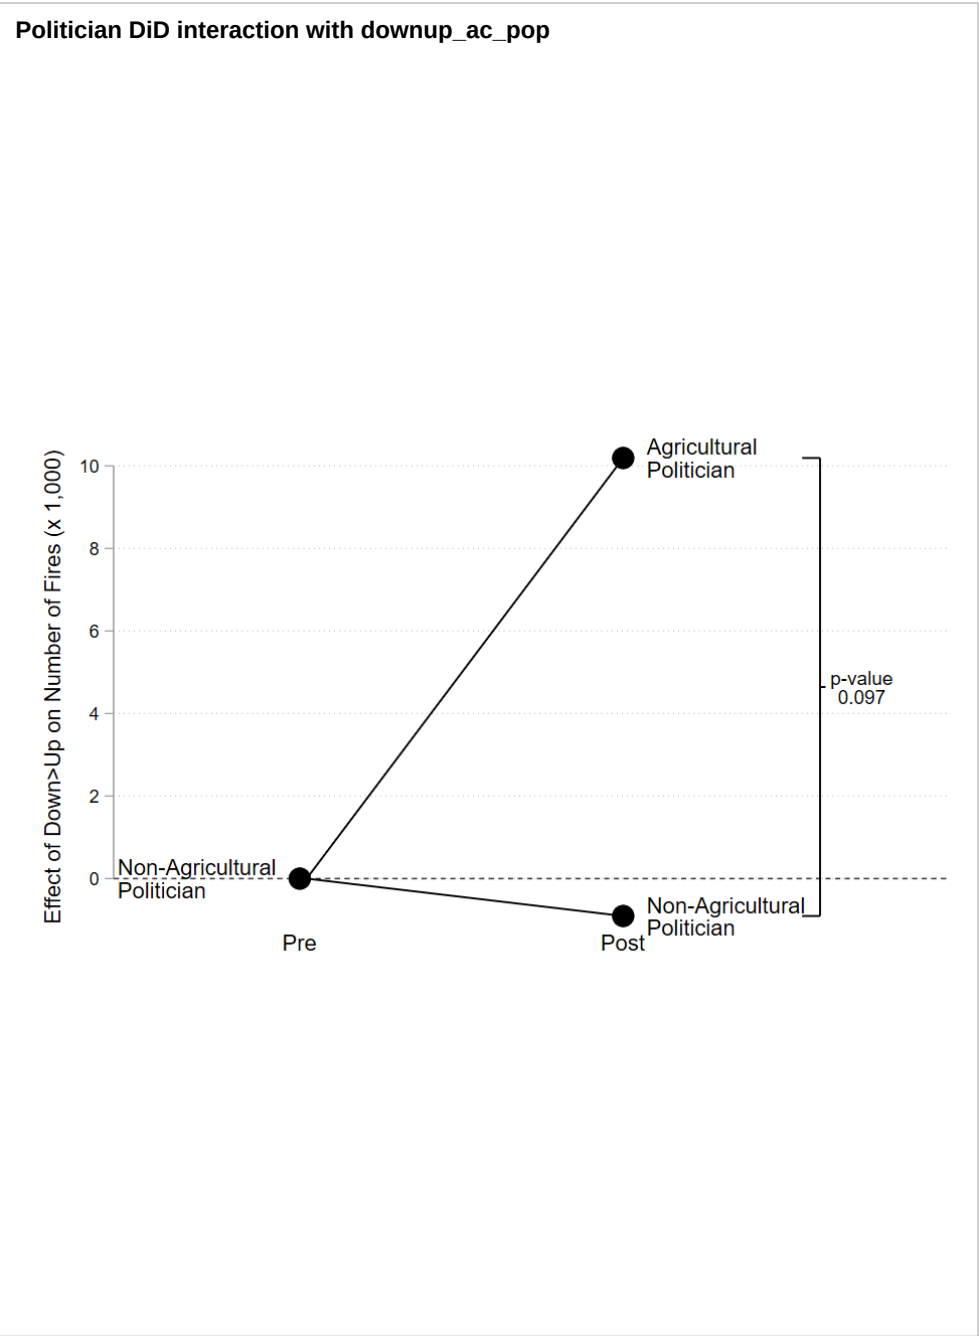

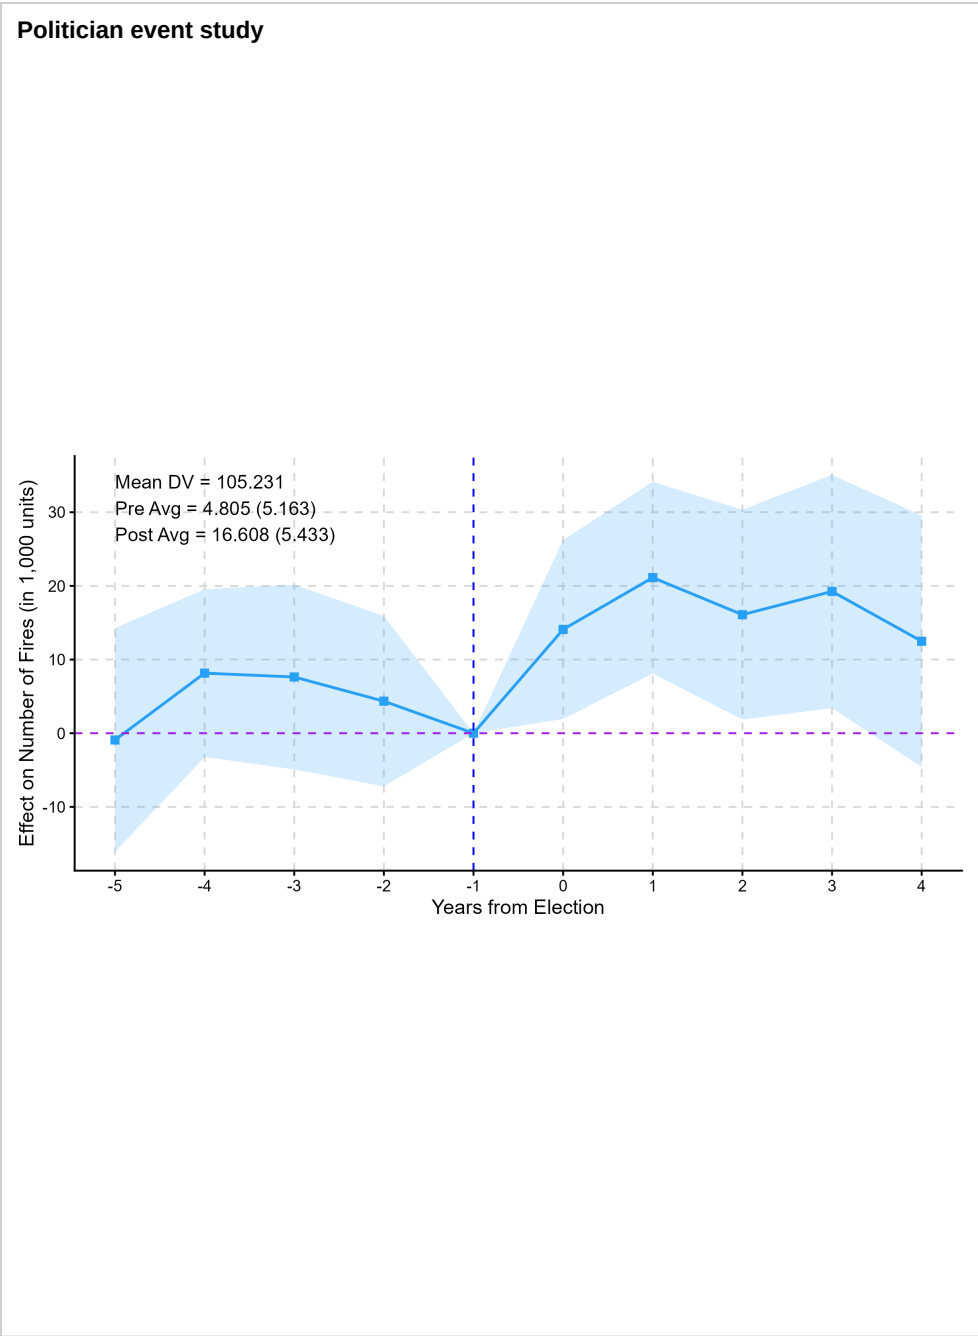

FE30: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; government year; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

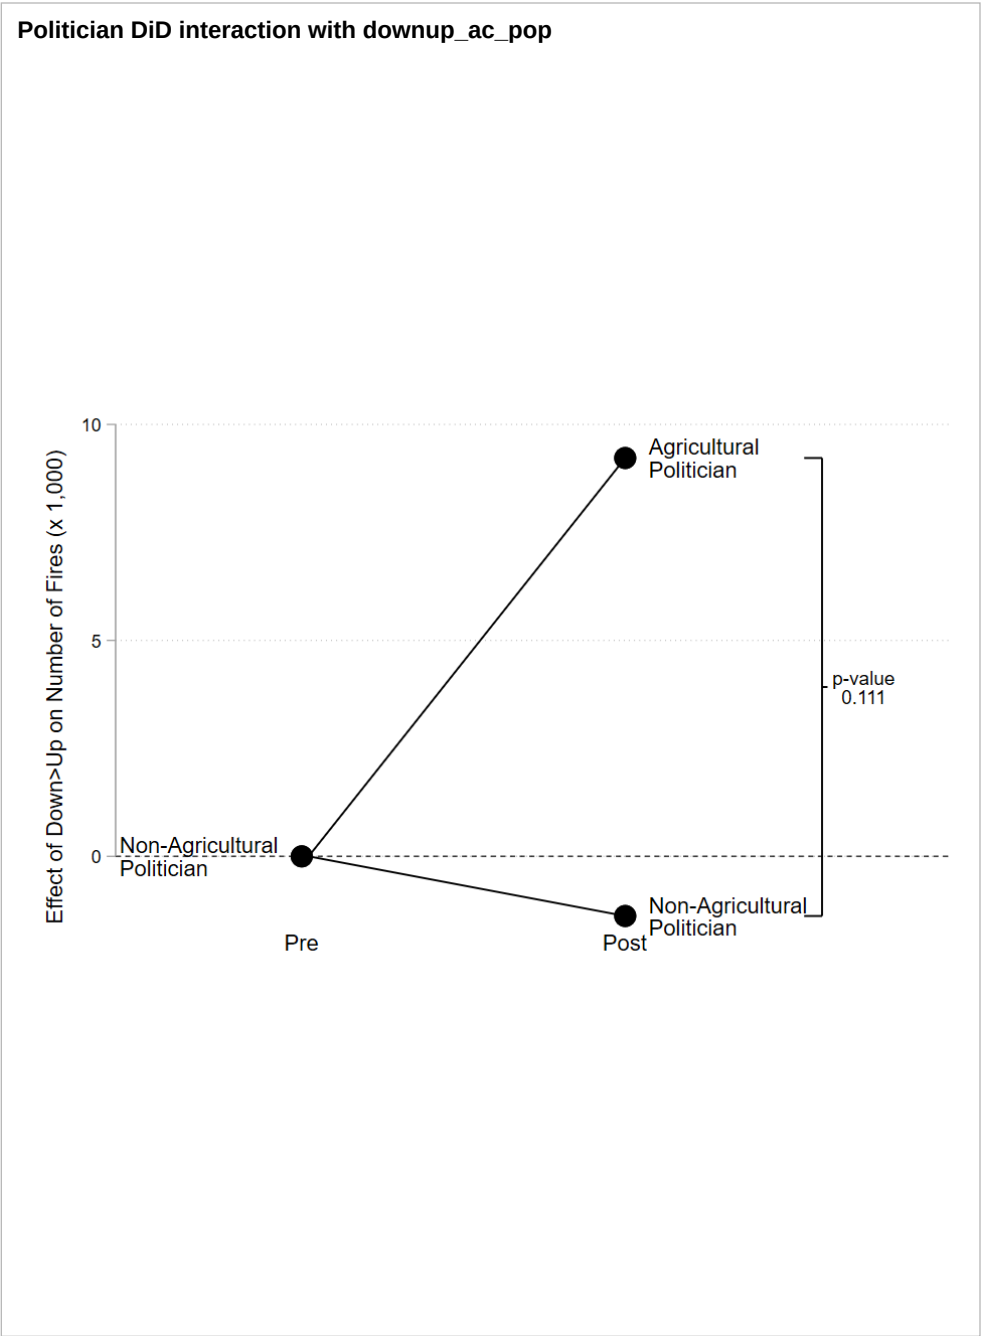

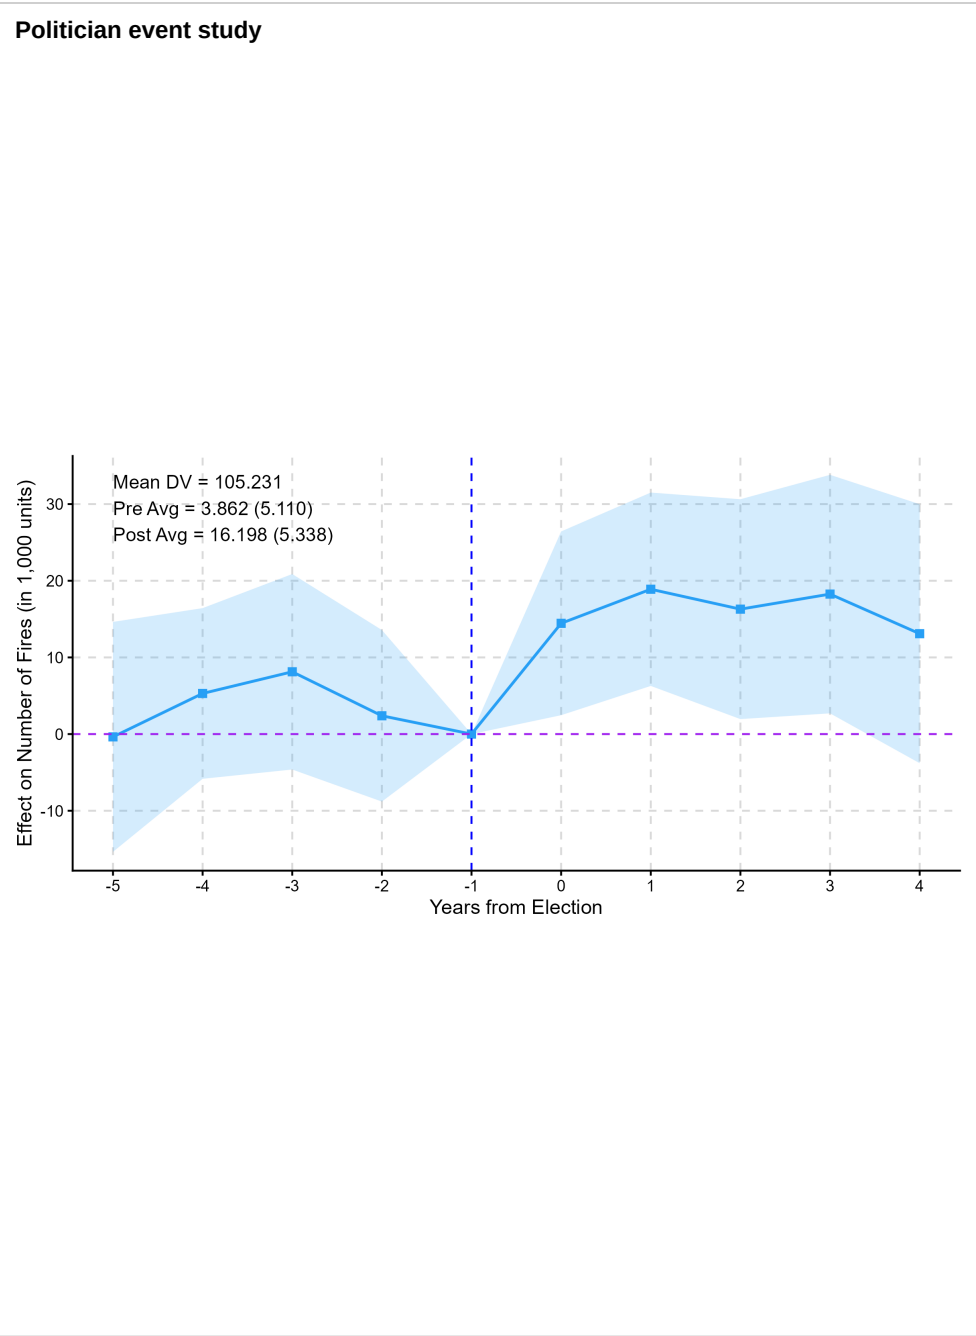

FE31: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; province-cohort linear month-year trend; government year; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

FE32: politician event study and DiD interaction

Base absorbed variables: Grid x cohort; month-year x cohort; province-cohort linear month-year trend; government year; province-cohort x election year; province-cohort x election year x government year
Additional cohort-event-time FE: relative_year_bin_aux#cohort_id.
Interaction panels omit CIs and show exact p-values rounded to three decimals; the post contrast is unchanged.

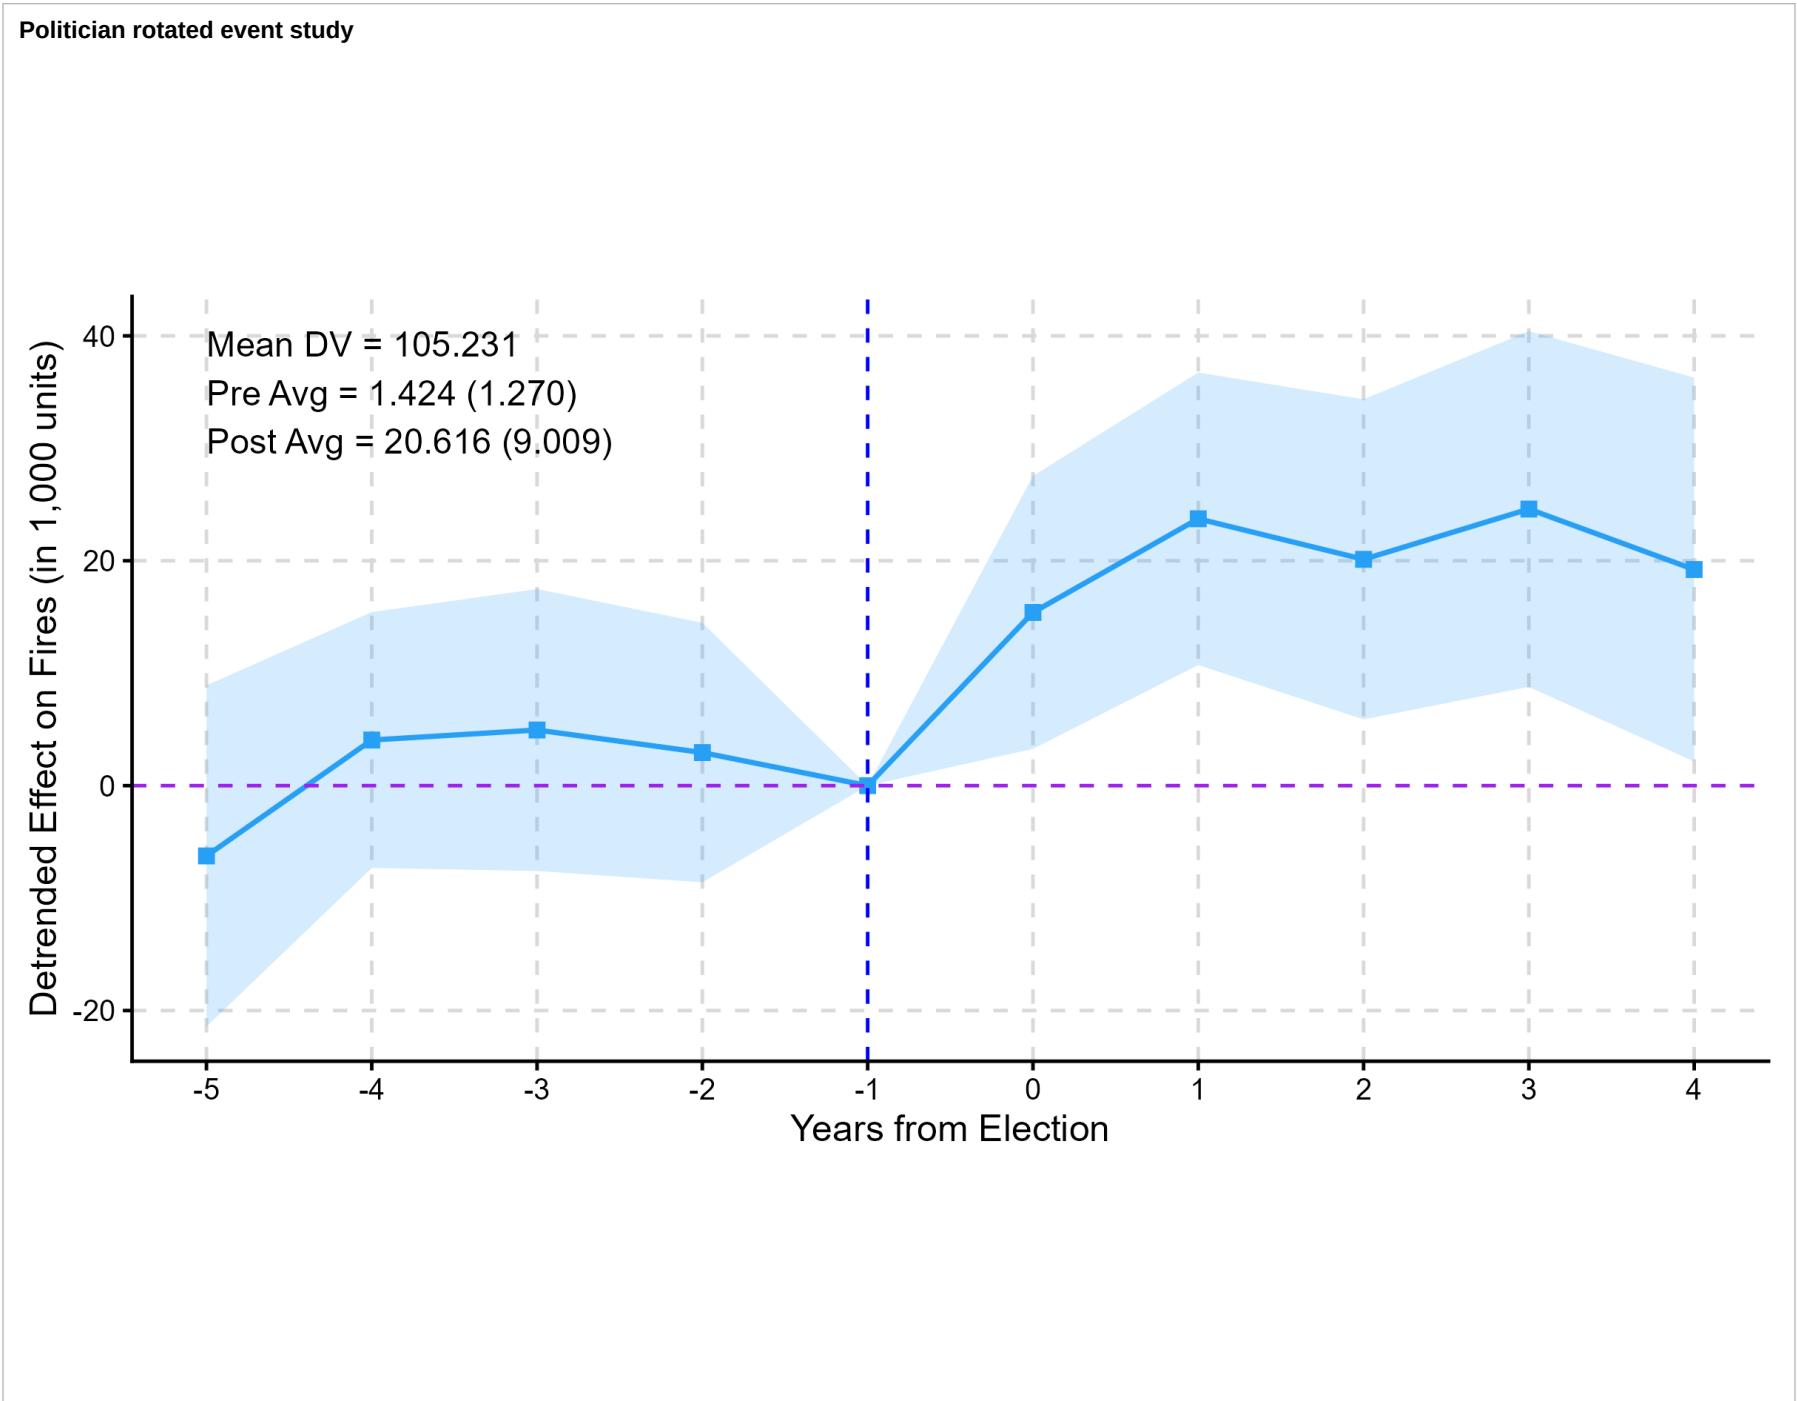

Appendix: detrended event studies

Each page presents the rotated politician event-study estimates for one FE specification.

Pre- and post-treatment averages and standard errors are recomputed after the pretrend rotation.
