

Politician Characteristics: Exploratory Fixed-Effect Results

Input: `politicians_characteristics_byprov.csv`
Full unchanged control composition

August 2026

Abstract

This report compares 32 fixed-effect specifications. For each specification, the top row presents the baseline politician event study for event years -5 through 4, with -1 omitted, before and after pretrend rotation. The lower panel presents the DiD interaction of `post` $\times$ `treat` $\times$ `downup.ac.pop`, constructed following `_app19.polischar_fe12.did.downup.inter.plot.do`. The prior event-time interaction with `downup.ac.pop` is not included. Rotated pre-period and post-period averages are computed from the rotated coefficients with the corresponding transformed covariance matrix.
